

Department of CSE Event Report

EVENT TYPE	: Subject Lecture
EVENT TITLE	: “DATA MINING AND HEALTHCARE”
SPONSORED BY	: NA
DATE / TIME	: 02-02-2022/02:00PM –3:00 PM
VENUE	: Zoom
SPEAKER/RESOURCE PERSON:	Dr.G.Gunasekaran, Professor/CSE
ORGANISING SECRETARY	: Mrs.I.Golda Selina
DEPARTMENT HEAD	: Dr.S.Geetha
TARGET AUDIENCE	: 4 th year Final Year Students of B.Tech CSE
EVENT DESCRIPTION:	

The Subject Lecture on “Data Mining and Healthcare” was organised by Department of Computer Science and Engineering for CSE Students. Devika Kotecha, 4th year, B.Tech CSE hosted the event and extended a warm welcome to participants and speaker of the event. Dr.S.Geetha, Hod of CSE addressed the gathering. The introduction of the speaker was conveyed by Dheeraj, 4th Year, B.Tech CSE.

Dr.G.Gunasekaran Started his session on “Data Mining and Healthcare” “He suggested that getting numbers doesn't matter, just do the thing whatever you want with only dedication and right determination. He mainly highlighted that growing is more important than earning. He started the session with data mining introduction continued with implementation process of data mining. Its types, Business understanding, Data understanding, Data Preparation, Modeling, Evaluation, Deployment. In Business Understanding, he mentioned about the business and data mining goals are established. In Data Understanding, Sanity check on data is performed to check whether it's approximate for the data mining goals. Next, Data Preparation, Data is made preparation ready. Data

Transformation is about the operation would towards the success of the mining process. Furthermore, he mentioned about the Smoothing, Aggression, Generalization, Normalization, Attribute Construction. Modeling is about the mathematical models are used to determine data patterns. Evaluation is about the patterns identified are evaluated against the business objectives. At last, Deployment to ship data mining your data mining discoveries to everyday business operations. He mentioned about the Data mining techniques, which is Classification, Clustering, Regression, Outer, Sequential Patterns, Prediction, and Association Rules. Mainly about the challenges of implementation of Data Mine, Data Mining Application and Healthcare Management. Went deeper into the concept of healthcare that is performance of the Europe & United State Health Care System Internationally. Thesession continued with Q/A session.

Finally, the vote of thanks was given by Surya S, 4th year, B.Tech CSE. It was an amazing session which is very useful and enriched the knowledge of the students. The Session ended by Devika Kotecha, 4th Year, B.Tech CSE.
