"Taxonomy of Educational Objectives"
(1956) edited by Benjamin S. Bloom.

'Taxonomy' is a term derived from *two Greek words*

'taxis' meaning '*arrangement*' and

'nomos' meaning '*law*'.

In this derivative sense, taxonomy means '*orderly arrangement*'. They classified the educational objectives into three broad categories or domains.

The Domains are:

- Cognitive Domain (knowing)
- Affective Domain (feeling)
- Psycho-Motor Domain (doing)
