

## **Benjamin Bloom Journal Club – JC Meeting 002**

The Faculty of Education, BENJAMIN BLOOM'S JOURNAL CLUB meeting-2 was organized on 25.06.2021 at 2.30 pm. The special invitee Dr.S.Valliammai, HOD, Dept. of Chemistry presented and discussed about 'ORIGIN SOFTWARE' With its rich set of features which is an object oriented design, and programmatic access to all graphing and analysis functionality and explained about the ideal platform it provides for custom application development that includes creating custom graph templates for repeated use. The session featured the template feature that can be extended to analysis, where a workbook with custom analysis settings and desired output can be saved as an Analysis Template for repeated use where in Analysis Templates can then be used to perform batch analysis on multiple files and datasets and how the Origin worksheet can be customized by inserting objects such as images and graphs and merging cells to create custom reports. Faculty members and research scholars gained more knowledge about the subject. Questions were raised by faculty members. Explanation was made through power point.

The session exposed a new software which was new to the participants that provides easy access to graphing and analysis features allowing a user to create custom script code which can be assigned to toolbar buttons for creating quick and easy custom tools.
