

SUBJECT LECTURE ON TESTING IN SCHOOLS

The subject lecture on 'Testing in Schools' by Ms.J. Vigneshwari, Assistant Professor, Faculty of Education on 25.07. 2022 at 11.00 a.m. in K102-Smart Room, Phase 2 campus. Testing consists of identifying the nature strength and weakness in learners. In education, different types of testing exist and it helps to identify the areas of improvement where both the learner as well as teacher needs to understand about their performance. The session was organized with the objective to lead the prospective teachers towards the purpose of test and its types. It also intended in elaborating the steps involved in the test to assess the learners at the beginning stage and set the methodology for the target group.
