

Industrial Visit to BSNL

Date: 22/03/2024 to 23/03/2024

Time: 09.15AM to 04.00PM

Venue: BSNL Menambakkam

No. of Participants: 100

REPORT:

- The aim of the industrial visit to BSNL Rajiv Gandhi Memorial Telecom Training Centre is to provide participants with practical insights into the telecommunications industry, including its infrastructure, technologies, and operational processes.
- Through this visit, participants can gain first hand knowledge of telecom equipment, network management, and training methodologies employed by a prominent telecom training center like BSNL.
- Additionally, the visit aims to facilitate interaction with industry professionals, fostering networking opportunities and enhancing understanding of career prospects in the telecom sector.

INTRODUCTION:

The industrial visit to BSNL Rajiv Gandhi Memorial Telecom Training Centre provided participants with an immersive experience into the dynamic world of telecommunications. Nestled within the heart of cutting-edge technology and innovative learning methodologies, the visit offered invaluable insights into the telecom industry's infrastructure, operations, and training paradigms.

PROJECT DEMONSTRATIONS:

During the project demonstration at BSNL Rajiv Gandhi Memorial Telecom Training Centre, participants were able to witness firsthand the practical applications of telecommunications concepts learned during the industrial visit. Engaging with state-of-the-art equipment and software, they delved into real-world scenarios, troubleshooting network issues, configuring systems, and exploring innovative solutions.

INTERACTIVE SESSIONS:

During the interactive sessions at BSNL Rajiv Gandhi Memorial Telecom Training Centre, participants were immersed in a dynamic exchange of knowledge and ideas. Led by seasoned professionals from the telecommunications industry, these sessions delved into the intricate workings of telecom equipment, network management, and emerging technologies. Through hands-on demonstrations and real-world casestudies, participants gained practical insights into troubleshooting techniques, system optimization strategies, and the deployment of advanced communication solutions.
