Contact Person: Mr. S.S. Naga Nandagopal, Mob - 09741405058
Sir,

Sub: Dr. MGR Educational and Research Institute University, Chennai -
Installation of 100 KWP Off-Grid without battery Solar Rooftop System -
Amendment to P.O. 659/2013, dated 30.10.2013 issued - Reg.

Ref : (i) Our P.O. 659/2013, dated 30.10.2013

(ii) Our letter Dr. MGR Univ./P.O. 659-1/2013, dt: 30.10.2013

In the reference 1st cited, we have issued orders for supply and installation of 99.36 KWP Off-Grid without batter Solar Rooftop System at our Premises at a total cost of Rs. 60,00,400/- after deducting the 30% subsidy.

In the reference 2nd cited, we have authorized you to take this Project forward and submit the documents required for capital subsidy with MNRE.

Since, the proposal submitted to MNRE is getting delay and as suggested by you, we are issuing this amendment to our earlier order to implement the Project without MNRE subsidy. Accordingly the following amendments are issued to the order in the reference 1st cited.

S.No.	Description	As per P.O.659/2013	As amended
1.	Plan capacity	99.36 KWP	100 KWP
2.	Commercial term:		
	(i) Design, Manufacture, Supply, Forwarding and Transportation to site of PV Plant & Equipment	Rs.75,04,129.99/-	Rs. 58,42,654/-
	(ii) Installation, Testing and Commissioning	Rs. 6,46,137.42.	Rs. 4,77,038.10
	(iii) CST @ 5.5%	Rs. 4,12,727.15	Rs. 3,21,346.00
	(iv) Service Tax @ 12.36%	Rs. 79,862.58	Rs. 58,961.91
	(v) Total Project cost	Rs. 86,42,857.14	Rs. 67,00,000.00
	(vi) Subsidy @ 30%	Rs. 25,92,857.14	Rs. -
	Net Project cost inclusive of Taxes and all other expenses	Rs. 60,50,000/-	Rs. 67,00,000/-

Research Abstract

What's Next ? – Stepping towards the future of ETD

Hepsibah Sharmil^{1,2}, Rama Vaidyanathan^{1,2}, Prathap Das³, Anindita Sengupta³

Dr. A.P.J. Abdul Kalam Centre of Excellence¹, Dr.MGR Educational and Research Institute² (Deemed to be University), ProQuest³

Electronic Thesis and Dissertations (ETD) has evolved as a sole genre in building the Networked Digital Library of Thesis and Dissertations (NDLTD). Already digitalisation of thesis and dissertations has enhanced its quality, it is also broadly shaped owing to the intense interest of ETD users. Across the globe many ETDs are downloaded thousands of times. It's now time, to work on future path for meticulous deliberation. In order to contemplate functional strategies to make appropriate decisions, often organisations make efforts to forecast events and future relationships. Likewise, to explore the future of ETD those who are believed to have relevant exposure and experience having insight on factors affecting the present and future state of ETD will be included as collaborative participants of this study. Delphi method of research design will be applied to diligently forecast the future pathway of ETD. The End Users, Application Developers and Marketing Executives are the three major categories of personals involved in ETD. Contemplating their rich experiences with linguistic distinction on ETD will explore the unforeseen huddles, and determine the key driven force to exhibit the future. As years pass there will be thousands and millions of updates. The more we refine and evolve in the technical aspects of ETD, the users will adopt and locate their search at ease. This research approach will have anticipated and unanticipated benefits. The findings from this study shall build on the constructive criticism of scholarly authors, technical and marketing experts on ETD to reflect on the perspective scheme on taking ETD to compete the global market which is a step ahead towards the future.
