

Development of CAN SAT

by

Students

A Team of Students Expertise from Chandigarh University mounted a Technical session (24.05.2022) on In-House Space Laboratory by sharing the knowledge and their findings on the prototype of Cansat and its power stabilization standards, the precepts of gravity and magnetism behind the safe landing, techniques of deployment of CanSAT and its drag parameters.

The competition is an enticement for participants to excel, thereby fostering innovation and desire to achieve. A team of students from Dr.MGR-ACS Satellite team coordinated by faculty team indented to participate in **CANSAT INDIA 2022** organized by Astronautical Society of India (ASI), as a firsthand performer task to **design-develop-launch their own can sized satellite**.
