

# **OUTCOME BASED EDUCATION**

# **Curriculum and Syllabus**

# **B.Tech (Information Technology)**

# **2022 Regulation**

(For the Students Admitted in 2022-2023)

**DEPARTMENT OF INFORMATION TECHNOLOGY** 

# DECLARATION

I, Dr. N. KANYA, Head of Information Technology department, hereby declare that this copy of the syllabus from Page no 1 to 271 (B. Tech – Information Technology- Full Time 2022 Regulation) is the final version which is being taught in the class and uploaded in our university website. I assure that the Syllabus available in our university website is verified and found correct. The curriculum and Syllabi have been approved by our Academic Council / Vice Chancellor.

Date:

Signature

# Vision

To create technology proficient and ethically enriched IT professionals through holistic and state of art curriculum.

# Mission

- To update the IT skills of students and faculty adapting recent technology developments in the curriculum as recommended by academicians, industry experts and alumni.
- To establish equipped laboratories to present excellent education in the conventional and modern vicinity of Information Technology.
- To create responsible IT professionals with ethical values and social responsibilities.
- To stimulate entrepreneurial mind-set among the students and enhance competency through regular industrial exposure.
- To utilize the family of alma mater through strong interaction and networking making them instrumental for development of academic and industrial linkage.

# **Quality Policy**

• Learn, Teach and Practice validated procedures with Transparency

# **Program Educational Objectives (PEOs)**

Graduates will be able to:

- **PEO 1**: Excel by taking up key roles in IT and related industries, Government organizations and academia through strong leadership skills.
- **PEO 2**: Undertake higher studies and/or research in the field of Information Technology, management or other related domains.
- **PEO 3**: Develop innovative products and implement novel solutions to real world problems in IT and related interdisciplinary areas.
- **PEO 4**: Understand the societal impact of IT services and use their skills in an ethical, responsible and professional manner.
- **PEO 5**: Be updated with continuous learning and have a global perspective, so as to remain current in their profession while meeting the needs of the industry and nation at large.

# **Program Outcomes**

- **PO1 Engineering Knowledge**: Apply the Knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- **PO2 Problem analysis**: Identify, formulate, review research literature, and analyze complex engineering Problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
- **PO3 Design/development of solutions**: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental consideration.
- **PO4 Conduct investigations of complex problems**: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- **PO5 Modern tool usage**: Create, select and apply appropriate techniques, resources and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- **PO6 The engineer and society**: Apply reasoning informed by the contextual knowledge to access societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- **PO7 Environment and sustainability**: Understand the impact of the professional engineering solutions in societal and environmental contexts and demonstrate the knowledge of and need for sustainable development.
- **PO8 Ethics**: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- **PO9 Individual and team work**: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **PO10 Communication**: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- **PO11 Project management and finance**: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team to manage projects and in multidisciplinary environments.
- **PO12 Life –long learning**: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change

# **Program Specific Outcomes (PSOs)**

- **PSO1** Ability to augment the understanding of broad themes of STEM using Information Technology.
- **PSO2** Ability to analyze, design, develop and implement sustained IT solutions as a team to improve the productivity of the organization with social and economic constraints.
- **PSO3** Ability to apply ethical decision making, use IT industry recognized best practices and standards in the development, implementation and management of IT system integrating multiple domains.
- **PSO4** Ability to understand and update current trends in web technology, distributed infrastructure, data management, software engineering, system engineering and secured applications.

# Table 2: Revision/modification done in syllabus content:

S.No	Course (Subject) Code	Course (Subject) Name	Concept/ topic if any, removed in current curriculum	Concept/topic added in the new curriculum	% of Revision/ Modificatio n done
1	EBIT22001	Programme Core – Essentials of Information Technology	-	New Subject Added in second semester	100%
2	EBIT22004	Computer Organization and Architecture	-	New Subject Added in third semester	100%
3	EBIT22003	Software Engineering	Object Oriented Content has been removed.	-	50%
4	EBIT22005	Database Management Systems	-	Relational model – structure – relational algebra- relational calculus- views removed in Unit I and added in Unit II Unit IV, V is updated with new topics & content	70%
5	EBIT22006	Operating System	Unit I Assemblers Compliers Loaders & Linkers has been Removed	Syllabus had been modified with. Operating Systems Structures, File System, I/O System title & content. Instead of SSOS	80%
6	EBIT22ET2	Java Programming	Removed Unit IV streams and object serialization	Syllabus had been modified with AWT & Swings in detail as unit IV& V	50%
7	EBIT22007	Enterprise Resource Planning	-	Elective Subject Changed to core subject in fifth semester	100%
8	EBIT22008	Professional Ethics	-	New Subject Added in fifth semester	100%

S.No	Course (Subject) Code	Course (Subject) Name	Concept/ topic if any, removed in current curriculum	Concept/topic added in the new curriculum	% of Revision/ Modificatio n done
9	EBIT22ET3	Computer Graphics and Multimedia	Removed Unit III, IV& V Three- Dimensional Graphics, Polygon rendering method	Syllabus had been modified Multimedia Systems Design, Multimedia File Handling, Hypermedia Unit III, IV, V is updated with new topics & content	70%
10	EBIT22010	Mobile Communication	Removed unit 2 satellite system and broadcast system	Course title modified	30%
11	EBIT22011	Embedded System and IoT		New Subject Added in sixth semester Previously it was in elective III as IOT now it is modified as Embedded systems and IOT	100%
12	EBIT22012	Data Warehousing and Data Mining	Unit II – ETL (Extract, Transform, Load) and business tools removed	More content in unit I, II IV,V has been modified ,Unit III Association rules topic & content included.	40%
13	EBIT22013	Cloud Computing		Unit IV Cloud application completely changed	20%
14	EBIT22014	Software Testing	-	New Subject Added in seventh semester	100%
15	EBIT22015	Cryptography and Network security	-	New Subject Added in seventh semester previous it was in Elective II	100%
16	EBIT22016	Web Technology and Web Services		Unit I Website basics Unit III Client side scripting Unit V Case studies is added.	60%
Labor	atory				
17	EBIT22L03	Operating system lab	Two Programs has been altered	Two program included	25%

S.No	Course (Subject) Code	Course (Subject) Name	Concept/ topic if any, removed in current curriculum	Concept/topic added in the new curriculum	% of Revision/ Modificatio n done
18	EBIT22L04	Enterprise Resource Planning Lab	-	New Subject Added in fifth semester	100%
19	EBIT22L06	Embedded System and IoT Lab	-	New Subject Added in sixth semester	100%
20	EBIT22L07	Data Mining Lab		New Experiments have included	100%
Electi	ves				
21	EBIT22E01	Fundamentals of Digital Image Processing	-	Digital Image Fundamentals, Image Restoration, Colour, Image Processing and Multi-Resolution Processing, Image Segmentation units topic & content modified	80%
22	EBIT22E07	Agile Methodologies		New subject Added in elective-I	100%
23	EBIT22E09	Fundamental of Ethical Hacking	-	New subject Added in elective-I	100%
24	EBIT22E10	C# and .NET Programming		New subject Added in elective-II	100%
25	EBIT22E11	Social Network Analysis		New subject Added in elective-II	100%
26	EBIT22E12	Games Designing		New subject Added in elective-II	100%
27	EBIT22E14	Information Security Management		Open elective subject changed to Program elective II	100%
28	EBIT22E17	Advanced Network		New subject Added in elective-II	100%
29	EBIT22E18	Web Mining		Syllabus had been modified with title & content completely.	100%
30	EBIT22E20	Software Quality Management		New subject Added in elective-III	100%

S.No	Course (Subject) Code	Course (Subject) Name	Concept/ topic if any, removed in current curriculum	Concept/topic added in the new curriculum	% of Revision/ Modificatio n done
31	EBIT22E21	Software Project Management		New subject Added in elective-III	100%
32	EBIT22E22	Machine Learning Techniques		Syllabus had been modified with title & content completely.	100%
33	EBIT22E24	Information Retrieval		New subject Added in elective-III	100%
34	EBIT22E25	Natural Language Processing		New subject Added in elective-III	100%
35	EBIT22E41	Block chain Technologies		New subject Added in elective-III	100%
36	EBIT22E26	Robotics		New subject Added in elective-IV &V	100%
37	EBIT22E27	Distributed Computing		Syllabus had been modified with title & content completely.	100%
38	EBIT22E28	Artificial Neural Network		New subject Added in elective-IV &V	100%
39	EBIT22E29	Green Computing		New subject Added in elective-IV &V	100%
40	EBIT22E30	Service-Oriented Architecture		New subject Added in elective-IV &V	100%
41	EBIT22E34	Digital Marketing Technique		New subject Added in elective-IV &V	100%
42	EBIT22E35	Pervasive Computing		New subject Added in elective-IV &V	100%

S.No	Course (Subject) Code	Course (Subject) Name	Concept/ topic if any, removed in current curriculum	Concept/topic added in the new curriculum	% of Revision/ Modificatio n done
43	EBIT22E36	Wearable Computing		New subject Added in elective-IV &V	100%
44	EBIT22E37	Wireless Adhoc & Mesh Networks		New subject Added in elective-IV &V	100%
45	EBIT22E38	Next-Generation Network		New subject Added in elective-IV &V	100%
46	EBIT22E40	R Programming		New subject Added in elective-IV &V	100%

 Table 3: List of New courses/ value added courses//life skills/Electives/interdisciplinary /courses focusing on employability/entrepreneurship/skill development.

S. No	New courses (Subjects)	Value added courses	Life skill	Electives	Inter Disciplinary	Focus on employability/ entrepreneurship/ skill development.
1	BIT22001 Programme Core – Essentials of Information Technology	Technical Skill I	Universal human values 2: Understanding harmony	Elective I	Digital Systems	Soft Skill I (Career & Confidence Building)
2	BIT22003 Computer Organization and Architecture	Technical Skill II	The Indian Constitution*/ The Indian Traditional Knowledge*	Elective II	Digital Systems Lab	Soft Skill II (Career & Confidence Building)
3	BCS22005 Operating System	Technical Skill III		Elective III	Microprocessors and Microcontrollers	Orientation to Entrepreneurship
4	BIT22006 Enterprise Resource Planning			Elective IV	Microprocessors and Microcontrollers Lab	
5	BIT22007 Professional Ethics			Elective V

# Periyar E.V.B. High Road, Maduranoyal, Chrimai-95. Tamilnadu, Iadia.

# FACULTY OF ENGINEERING AND TECHNOLOGY

Subject Code	Subject Name TECHNICAL ENGLISH	Ty/Lb/ETL	L	T/SLr	P/R	С
EBEN22001	Prerequisite: Pass in Plus 2 English	Ту	2	0/0	0/0	2

# Unit I Vocabulary Development:

Affixes: prefixes and suffixes and word formation–synonyms and antonyms-nominal compounds, expanding using numbers and approximation - preposition, prepositional phrases, preposition + relative pronoun- adjective: degrees of comparison, formation of adjectives, irregular comparatives- Infinitive and Gerunds

# Unit II Grammar

Tenses- auxiliary and modal –voice: active, passive and impersonal passive - Questions:Wh-pattern, Yes/no questions, tag questions – adverbs and adverbial clauses- 'If' clause, cause and effect', 'purpose'- Concord: subject-verb agreement

# Unit III Reading

Comprehension: extracting relevant information from the text, by skimming and scanning and inferring, identifying lexical and contextual meaning for specific information, identifying the topic sentence and its role in each paragraph, comprehension exercises - Note - making - Précis writing-instructions, suggestions and recommendations.

# Unit IV Writing

Jumbled sentences - paragraph writing coherence devices- discourse markers. Essay writing- Letter writing, Informal and formal: seeking permission to undergo practical training, letter to an editor of a newspaper complaining about civic problems and suggesting suitable solutions

# Unit V Visual Aids in Communication

Interpretation of diagrams - tables, flow charts, pie charts and bar charts, and their use in Business reports

# **Total Hours: 30**

# **UNIT I ALGEBRA**

Binomial, Exponential, Logarithmic Series (without proof of theorems) - Problems on Summation, Approximation and Coefficients.

#### **UNIT II** MATRICES

Characteristic equation - Eigen values and Eigen vectors of a real matrix - Properties of Eigen values - Cayley - Hamilton theorem(without proof) – Orthogonal reduction of a symmetric matrix to Diagonal form.

#### UNIT III TRIGONOMETRY

Expansions of Sin  $n\theta$ , Cos  $n\theta$  in powers of Sin $\theta$  and Cos $\theta$ -Expansion of Tan  $n\theta$ -Expansions of Sin $^{n}\theta$  and Cos $^{n}\theta$ in terms of Sines and Cosines of multiples of  $\theta$  – Hyperbolic functions – Separation into real and imaginary parts.

#### UNIT IV DIFFERENTIATION

Basic concepts of Differentiation –Elementary differentiation methods –Parametric functions – Implicit function -Leibnitz theorem(without proof) - Maxima and Minima - Points of inflection.

#### UNIT V FUNCTIONS OF SEVERAL VARIABLES

Partial derivatives - Total differential - Differentiation of implicit functions - Taylor's expansion - Maxima and Minima by Lagrange's Method of undetermined multipliers – Jacobians.

EBPH22ET	Prerequisite: Higher secondary Physics	ETL	2	0/0	2/0	3

### UNIT I PROPERTIES OF MATTER

Elasticity - stress, strain and Hook's law - Poisson's ratio - three moduli of elasticity - twisting couple on a wire – Shafts – Solid & Hollow Shafts – Bending moment – Youngs Modulus Determination by nonuniform bending -I form of girders.

viscosity - flow of liquid through a narrow tube: Poiseuille's law (Qualitative)- Ostwald's viscometer - Lubrication

### Lab Component – 1. Coefficient of Viscosity determination using Poiseuille's Method UNIT II ACOUSTICS & ULTRASONICS

Fundamentals of acoustics - reverberation- reverberation time - factors affecting acoustics. Ultrasonics-Production of ultrasonic waves - detection of ultrasonic waves+ - acoustic grating - application of ultrasonic waves.

### Lab Component – 2. Ultrasonic Velocity Determination

### UNIT III WAVE OPTICS

Huygen's principle - interference of light – wave front splitting and amplitude – air wedge - Newton's rings - Michelson interferometer and its applications - Fraunhofer diffraction from a single slit - diffraction grating

# Lab Component – 3. Spectrometer – Grating

### UNIT IV LASER

Laser principle and characteristics - amplification of light by population inversion - properties of laser beams: mono-chromaticity, coherence, directionality and brightness - different types of lasers - Ruby laser-Nd-YAG laser-He-Ne laser-CO<sub>2</sub> laser - semiconductor laser - applications of lasers in science, engineering and medicine. Lab Component – 4. Determination of Wavelength of the given Laser source& Particle size determination UNIT V FIBER OPTIC COMMUNICATION 12 Hrs

Total Internal Reflection – Propagation of Light in Optical Fibers – Numerical aperture and Acceptance Angle – Types of Optical Fibers (material, refractive index, mode) – Fiber Optical Communication system (Block diagram) – Attenuation–Transmitter, Receiver, Dispersion, Modulation/Demodulation Advantages of Fiber Optical Communication System – IMT, PMT, Wavelength Modulated & Polarization Modulated Sensors – Endoscope Applications.

Lab Component – 5. Determination of Numerical Aperture of Optical Fiber

### **UNIT -I CHEMICAL THERMODYNAMICS**

Introduction, Terminology in thermodynamics -System, Surrounding, State and Path functions, Extensive and intensive properties. Laws of thermodynamics – I and II laws-Need for the II law. Enthalpy, Entropy, Gibbs free energy, Helmholtz free energy - Spontaneity and its criteria. Maxwell relations, Gibbs -Helmholtz equation (relating E & A) and (relating H & G).

### **UNIT -II TECHNOLOGY OF WATER**

Water quality parameters – Definition and expression. Analysis of water – alkalinity, hardness and its determination (EDTA method only). Boiler feed water and Boiler Troubles-Scales and sludges, Caustic embrittlement, Priming and Foaming and Boiler corrosion. Water softening processes – Internal conditioning, external conditioning – Demineralization methods. Desalination processes-RO and Electrodialysis.

### Lab Component-1. Analyze the water quality parameters for the given water sample. UNIT -III ANALYTICAL AND CHARACTERIZATION TECHNIQUES

Chromatographic techniques – column, thin layer and paper. Instrumentation-working with block diagram- UV-Visible Spectroscopy, IR Spectroscopy, Scanning electron microscope, Transmission electron microscope.

### Lab Component-1. Determination of Rf values of various components using thin layer chromatography. 2. Compute and interpret the structures of the given molecules using Chem Draw. 12 Hrs

**UNIT – IV ELECTROCHEMISTRY** 

Conductance – Types of conductance and its Measurement. Electrodes and electrode potential, Nernst equation - EMF measurement and its applications-Electrochemical series- Types of electrodes- Reference electrodes-

Standard hydrogen electrode- Saturated calomel electrode-Determination of P<sup>H</sup> using these electrode. Lab Component-1. Studies on acid-base conduct metric titration. 2. Determination of redox potentials using potentiometry

### **UNIT – VPOLYMERS AND NANO COMPOSITES**

Polymers-Introduction-Monomers – Functionality – Degree of polymerization-Tactility. Classification- Plastics - Thermoplastics and thermosetting plastics, Compounding of plastics - Compression moulding, injection moulding and extrusion processes. Nano composites: particulates, clay and carbon nano tubes. nano composites and its applications.

Lab Component-1. Polymeric analysis using capillary viscometer

### **Total Periods: 60**

#### ENGINEERING **EBME22ET1 Prerequisite:** None

**BASIC MECHANICAL & CIVIL** 

Subject Name

### UNIT I THERMAL ENGINEERING

Subject Code

Classification of internal combustion engine – Working of two stroke, four stroke petrol and diesel engines. Classification of Boilers - Cochran boiler - Locomotive boilers - Power plant classification - Working of Thermal and Nuclear power plant- Working of Solar-Wind - Tidal and Geothermal power plants.

### Lab component: Study of Boilers and IC engines

### **UNIT II MANUFACTURING PROCESS**

Metal forming processes – Rolling, forging, drawing, extrusion and sheet metal operations- fundamentals only. Metal Joining processes - Welding - arc and gas welding, Soldering and Brazing. Casting process - Patterns -Moulding tools - Types of moulding - Preparation of green sand mould -Operation of Cupola furnace.

### Lab component: Sheet metal works,

### Fitting- Cutting (T, V, L and dovetail joints)

#### MACHINING PROCESS UNIT III

Basics of metal cutting operations - Working of lathe- parts-Operations performed. Drilling machine -Classification – Radial drilling machine - Twist drill nomenclature. Milling machine-types-different operations performed.

### Lab component: Lathe operation: Step turning and Taper turning

### **Drilling operation- Making hole drilling**

UNIT IV **BUILDING MATERIALS AND CONSTRUCTION** 

**Materials**: Brick - Types of Bricks - Test on bricks - Cement – Types, Properties and uses of cement – Steel -Properties and its uses – Ply wood and Plastics.

Construction: Mortar - Ingredients - Uses - Plastering - Types of mortar - Preparation - Uses - Concrete -Types – Grades – Uses – Curing – Introduction to Building Components (foundation to roof) – Masonry – Types of masonry (Bricks & Stones)

Lab component: Carpentry: Joints (Tee halving, Cross Lap, Dovetail Joint)

### **Plumbing works- Pipe connections**

#### UNIT V **ROADS, RAILWAYS, BRIDGES & DAMS**

Roads - Classification of roads - Components in roads - Railways -Components of permanent way and their function – Bridges – Components of bridges – Dams – Purpose of dams – Types of dams.

### UNIT I CHARACTERISTICS OF A SUCCESSFUL ENTREPRENEUR

Introduction to entrepreneurship education – Myths about entrepreneurship – How has entrepreneurship changed the country - Dream it. Do it - Idea planes - Some success stories - Global Legends - Identify your own heroes.

### UNITH ENTREPRENEURIAL STYLE

Entrepreneurial styles - Introduction, concept & Different types - Barrier to Communication - Body language speaks louder than words

### UNIT III DESIGN THINKING

Introduction to Design thinking – Myth busters – Design thinking Process - Customer profiling – Wowing your customer - Personal selling - concept & process - show & tell concept - Introduction to the concept of Elevator Pitch

### UNIT IV RISK MANAGEMENT

Introduction to risk taking & Resilience - Managing risks (Learning from failures, Myth Buster) -Understanding risks through risk takers – Why do I do? – what do I do?

### **UNIT V PROJECT**

How to choose a topic – basic skill sets necessary to take up a project – creating a prototype – Pitch your project - Project presentation.

### FORM .No.F/CDD/004 Rev.00 Date:20.03.2020

### FACULTY OF ENGINEERING AND TECHNOLOGY

Subject Code EBCS22ET1	Subject Name C PROGRAMMING AND MS OFFICE TOOLS	Ty/Lb/ ETL	L	T/ S.Lr	P/R	С
	Prerequisite: Nil	ETL	1	0/0	2/0	2

### **UNIT I Introduction**

Basic Structure of C programme - Constants, Variables and data types, Keywords, Identifiers- Operators and expressions- executing a C Program

### **UNIT II Decision making statements and looping statements**

Decision making with if statement, Simple if statement, else-if statement, Nesting if-else statement, The else if ladder, The switch statement, The go to statement, The while statement, The do while statement, The for statement, jumps in loops 9 Hrs

### **UNIT III Arrays and Functions**

Introduction to Arrays- One dimensional arrays, Two dimensional array, and Multidimensional array-Introduction to Functions- calling a function, category of functions- arguments with return values, argument with no return values- parameter passing Mechanism: Call by Value and Call by Reference. Recursion.

### **UNIT IV Structures & Pointers**

Structures definition, giving values to members, Structure initialization, comparison of structure variables, Structure within structures, Understanding pointers, accessing the address of the variable, declaring and initializing pointer, accessing a variable through its pointer and arrays

### **UNIT VMS-Office**

Introduction to MS-Word- Menus- Introduction to MS-Excel: features of MS- Excel, spread sheet/worksheet, parts of MS-excel window, functions in excel sheet, chart, Introduction to MS-Power point

### **TEXT BOOKS:**

- 1. E. Balaguruswamy, Programming in ANSI C
- 2. Padma Reddy ,Computer Concepts & 'C' Programming
- 3. Shobha Hangirke, Computer Application For Business

### List of Experiments : C PROGRAMMING

- 1. Find the factorial of a given positive number using function.
- 2. Calculate X raised to y using function.
- 3. Find GCD and LCM of two given integer numbers using function.
- 4. Find the sum of N natural numbers using function.
- 5. Book information using Structure.
- Student information using Structure. 6.
- Print the address of a variable and its value using Pointer 7.
- 8. Find area and perimeter of a circle
- Check whether the given number is palindrome or not 9
- 10. Check whether the given number is prime or not
- 11. Calculate sum of the digits of the given number
- 12. Display Fibonacci series up to N terms
- 13. Check whether a given character is alphabetic, numeric or special character
- 14. Count vowels and consonants in a given string
- 15. Find product of two matrices

### **MS-OFFICE**

- 16. Preparing a news letter:
- 17. To prepare a newsletter with borders, two columns text, header and footer and inserting a graphic image and page layout.
- 18. Creating and editing the table
- 19. Printing envelopes and mail merge.

B.Tech - Information Technology (Full time) - 2022 Regulation

- 20. Using formulas and functions: To prepare a Worksheet showing the monthly sales of a company in different branch offices
- 21. Prepare a Statement for displaying Result of 10 students in 5 subjects.

# **UNIT I INTEGRATION**

Subject Name

Subject

Basic concepts of Integration – Methods of Integration – Integration by substitution – Integration by parts – Definite integrals- Properties of definite integrals - Problems on finding Area and Volume using single integrals (simple problems).

### **UNIT IIMULTIPLE INTEGRALS**

Double integral in Cartesian and Polar Co-ordinates - Change of order of integration - Triple integral in Cartesian Co-ordinates – Spherical Polar Co-ordinates – Change of variables (simple problems).

### UNIT III ORDINARY DIFFERENTIAL EQUATIONS

First order differential equations – Second and higher order linear differential equations with constant coefficients and with RHS of the form:  $e^{ax}$ ,  $x^n$ , Sin ax, Cos ax,  $e^{ax}f(x)$ , x f(x) where f(x) is Sin bx or Cos bx – Differential equations with variable coefficients (Euler's form) (simple problems).

### UNIT IV THREE-DIMENSIONAL ANALYTICAL GEOMETRY

Direction Cosines and Ratios – Equation of a straight line – Angle between two lines – Equation of a plane – Co-planar lines – Shortest distance between skew lines – Sphere – Tangent plane.

### **UNIT V VECTOR CALCULUS**

Scalar and Vector functions – Differentiation – Gradient, Divergence and Curl – Directional derivatives – Irrotational and Solenoidal fields-Line, Surface and Volume integrals - Green's, Stoke's and Gauss divergence theorems (statement only) – Verification.

### UNIT I CRYSTAL STRUCTURE

Space Lattice – Unit cell – Bravais lattice – Lattice planes – Miller indices – Calculation of number of atoms per unit cell – Atomic radius – Coordination number – Packing factor for SC, BCC, FCC and HCP structures – Ceramic Materials & Graphite Structures – Crystal Growth Techniques (Slow Evaporation Method & Melt Growth)

### UNIT II CONDUCTORS & SUPER CONDUCTORS

Qualitative analysis of Free electron theory – Electrical & Thermal Conductivity (Derivation) - Fermi energy & its importance – Qualitative analysis of conductors, semiconductors & insulators – Important electrical materials Superconductors – Transition temperature – BCS theory – Properties of super conductors – Types – Low & High temperature superconductors – AC & DC Josephson effect – SQUIDS, Magnetic Levitation – Applications of super conductors

### UNIT III SEMICONDUCTOR PHYSICS

Bonds in Semiconductors – Types – Importance of Germanium & Silicon – Other Commonly Used Semiconducting materials - Carrier concentration in Intrinsic Semiconductors (Electron and Hole Density) – Band Gap Determination – Carrier Transport in Semiconductors – Drift, Mobility and Diffusion – Hall effect – Determination of Hall Coefficient and its Applications – Dilute Magnetic Semiconductors (DMS) & their Applications construction, working and characteristics of semiconductor diode, Zener diode, transistor (n-p-n and p-n-p transistor), Transistor characteristics (CB, CE, CC), JFET (Construction and its characteristics).

### UNIT IV MAGNETIC & DIELECTRIC PHYSICS

Magnetic Materials: Types – Comparison of Dia, Para and Ferro Magnetism – Heisenberg's interpretation – Domain theory – Hysteresis – Soft and Hard Magnetic Materials – Application of Magnetic Resonance Imaging – Important Magnetic, Insulating & Ferro electric materials.

Dielectric Materials: Electrical Susceptibility – Dielectric Constant – Concept of Polarization – Frequency and Temperature Dependence of Polarization – Dielectric loss – Dielectric breakdown – Commonly used Dielectric materials and their practical applications.

### UNIT V OPTO ELECTRONICS

Properties & Classification of Optical Materials – Absorption in Metals, Insulators & Semiconductors – Composite Materials – Nano Materials – Bio Materials – MEMS – NEMS – LED's – Organic LED's – LCD's – Laser diodes – Photodetectors – Tunneling – Resonant Tunneling Diodes (RTD's) – Carbon Nanotubes – Various Types of Optical Materials with Properties.

### **UNIT – 1 CHEMISTRY OF SEMICONDUCTORS**

Semiconductors – Introduction – holes and electrons-Band theory-properties of semi conductors-Types of semiconductors-Intrinsic-Extrensic semiconductors -Mobility of electrons and Holes -Fermi level in Semiconductors- Industrial application of Semiconductors-Semiconductors in Optics - LEDs, OLEDs, Semiconductors in solar cells- Types - First generation solar cells - Single crystalline and poly crystalline solar cells -Czochralski Process of single crystalline silicon synthesis

## UNIT -2 ELECTROCHEMICAL CELLS AND BATTERY TECHNOLOGY 9 Hrs

Electrochemical cells: Galvanic cell (Daniel cell);Batteries: Classification of batteries, primary batteries (dry cells) and secondary batteries -nickel-cadmium ,lead-acid battery, Solid state batteries – Lithium battery, Lithium Sulphur battery, Fuel cells.

### UNIT -3 DEVICECORROSION

Introduction – chemistry of IC and PCB- causes of corrosion on IC, PC-miniaturization, complex material utilization, production and service factors –environmental contamination (airborne contaminants) - Forms of corrosion – anodic, cathodic corrosion- Electrical Contact and metallic joints degradation- fretting corrosion - corrosion costs – corrosion protection of computer hardware.

### **UNIT-4 COMPUTATIONAL CHEMISTRY**

Introduction, Software tools available for chemistry and its applications, Chem Draw- Designing a Chemical Structure- Shortcuts and Hotkeys on designing a chemical structure, Biopolymer Drawing, Advanced drawing Techniques. Structure Analysis, Creating 3D Models, Estimating and displaying Proton and carbon-13 NMR chemical shifts, Creating TLC Plates to find Rf values, Chem Draw/Excel functions.

## UNIT -5 MODERN ENGINEERING MATERIALS FOR ELECTRONIC DEVICES 9 Hrs

Alloys and Need for Alloys - Modern Electronic grade alloys-Applications in electrical components, transducers, electromagnetic shielding of computers, telecommunications equipment and rocket motor casings. Thin films- Preparation by the Sol-Gel Method-Application of thin films.

EBME22001	Prerequisite: None	TY	2	0/0	2/0	3

1.2010 C

FACULTY OF ENGINEERING AND TECHNOLOGY

D TO BE UNIVERSIT

### **CONCEPTS AND CONVENTIONS (Not for examination)**

Introduction to drawing, importance and areas of applications – BIS standards – IS: 10711 – 2001 : Technical products Documentation – Size and layout of drawing sheets – IS 9606 – 2001: Technical products Documentation - Lettering - IS 10714 & SP 46 - 2003: Dimensioning of Technical Drawings - IS : 15021 -2001 : Technical drawings - Projections Methods - drawing Instruments, Lettering Practice - Line types and dimensioning - Border lines, lines title blocks Construction of polygons - conic sections - Ellipse, Parabola, Hyperbola and cycloids. 12 Hrs

### UNIT I PROJECTION OF POINTS, LINES AND PLANE SURFACES

Projection of points and straight lines located in the first quadrant – Determination of true lengths and true inclinations – projection of polygonal surface and circular lamina in simple position only. **PROJECTION OF SOLIDS** UNIT II 12 Hrs

Projection of simple solids like prism, pyramid, cylinder and cone in simple position Sectioning of above solids in simple vertical position by cutting plane inclined to any one of the reference plane and perpendicular to the other.

### UNIT III DEVELOPMMENT OF SURFACES

Development of lateral surfaces of simple and truncated solids – prisms, pyramids, cylinders, and cones. UNIT IV ISOMETRIC PROJECTION 12 Hrs

Principles of isometric projection – isometric scale – isometric projections of simple solids, like prisms pyramids, cylinders and cones. 12 Hrs

### UNIT V **ORTHOGRAPHICS PROJECTIONS**

Orthographic projection of simple machine parts – missing views **BUILDING DRAWING** Building components – front, Top and sectional view of a security shed. (Basic Auto CAD commands to be taught- not for Examinations)

**Total periods: 60** 

### Note: First angle projection to be followed.

### UNIT-I **INTRODUCTION**

Characteristics of computers-Evolution of Computers-Computer generations- Coding data in storage - Program planning- Algorithms- Evaluation of Algorithms- Flowcharts-Pseudo codes.

### UNIT – II **SOFTWARE & HARDWARE**

Generation of Languages - Types of Software - Application Software - System Software -Compiler& Interpreters– Procedural programming – Object oriented programming Basiccomputeroperations-Classificationofcomputers-Hardwarecomponents- I/O Devices - Storage Devices.

### **UNIT-III** FUNDAMENTALS OF OPERATINGSYSTEMS 9 Hrs

Introduction to OS - Concepts of OS - structure of OS - Operations of OS - Role of OS - Types of OS – Functions of OS.

### UNIT-IV FUNDAMENTALS OF DATABASE MANAGEMENT 9 Hrs

File based approach and Database approach– Evolutions of data models–Three levels architecture for DBMS - Data independence - Database users.

### UNIT-V **FUNDAMENTALS OF NETWORKS** 9 Hrs

Definition and purpose of computer Networks – Types of networks – Topologies in Network Design - Open systems interconnections (OSI Layers)- Internet (www).

## **Total Periods:45**

### Unit I Listening

Authentic audios and videos Prescribed Book: English Pronunciation in use - Mark Hancock,

### Unit II Speaking

Individual- Solo: Self introduction, Describing, anchoring, welcome address, vote of thanks, Pair & Group: Role play- formal -informal, narrating stories, film review, analysing newspaper headings and reports, interpreting Advertisement pamphlets Group discussion, mock interviews, formal presentation, power point presentation

Prescribed Book: J. C. Richards with J. Hull &S.Proctor, Interchange, Cambridge University Press, 2015.

## **Unit III Reading**

Extensive, focused reading,

Strategies for effective reading - Reading comprehensions – Note making- summarizing- paraphrasing, Review

Suggested reading: Short stories, news paper reports, film reviews

### Unit IV Writing

Extensive writing practices - note taking, Cognitive and metacognitive strategies to inculcate a sense of organising ideas into coherent sentences and paragraphs, Formal letters, Business letters. Resume with covering letter

### Unit VNon verbal communication/ charts, diagrams and table

Interpretation of charts Flow chart, pie chart, bar diagram, table, tree diagram, etc.,

### **Prescribed Text:**

1. J. C. Richards with J. Hull &S.Proctor, Interchange, Level 2, Cambridge University Press, 2021.

### UNIT I INTRODUCTION

History of Python, Need of Python Programming, Applications Basics of Python Programming Using the REPL(Shell), Running Python Scripts, Variables, Assignment, Keywords, Input-Output, Indentation.

### UNIT IITYPES, OPERATORS AND EXPRESSIONS

Types - Integers, Strings, Booleans; Operators- Arithmetic Operators, Comparison (Relational) Operators, Assignment Operators, Logical Operators, Bitwise Operators, Membership Operators, Identity Operators, Expressions and order of evaluations Control Flow- if, if-elif-else, for, while, break, continue, pass.

### **UNIT IIIFUNCTIONS**

Defining Functions, Calling Functions, Passing Arguments, Keyword Arguments, Default Arguments, Variablelength arguments, Anonymous Functions, Fruitful Functions (Function Returning Values), Scope of the Variables in a Function - Global and Local Variables.

### UNIT IVLISTS, TUPLES, DICTIONARIES

Lists: list operations, list slices, list methods, list loop, mutability, aliasing, cloning lists, list parameters; Tuples: tuple assignment, tuple as return value; Dictionaries: operations and methods; advanced list processing - list comprehension; Illustrative programs: selection sort, insertion sort, mergesort, histogram.

### UNIT VOBJECT ORIENTED PROGRAMMING OOP IN PYTHON

Classes, 'self variable', Methods, Constructor Method, Inheritance, Overriding Methods, Data hiding.

### List of Experiments:

1. Develop a Python program using function to compute the factorial of a given number.

- 2. Develop a Python program to find the sum of 'N' natural number using function.
- 3. Develop a Python program to display only the positive elements of the list.
- 4. Develop a Python program to find the second largest digit from a number using function.
- 5. Develop a Python program to find the largest digit from a number using function.
- 6. Develop a Python program to check the given string is palindrome or not.
- 7. Develop a Python program to count the number of vowels in the given string.

8. Develop a Python program to calculate the number of characters and the number of words present in a string without using built- in functions and string methods.

9. Develop a Python program to remove the duplicate items from a list.

10.Develop a Python program to read in a list of 'N' integers and print its elements in reverse order without using reverse slicing, reverse method.

### **TEXT BOOKS:**

- 1. Python Programming: A Modern Approach, VamsiKurama, Pearson.
- 2. Think Python: How to Think Like a Computer Scientist", 2nd editionUpdated for Python 3, Shroff/O'Reilly Publishers, Allen B. Downey
- 3. Learning Python, Mark Lutz, Orielly.

### **REFERENCE BOOKS:**

- Core Python Programming, W.Chun, Pearson. 1.
- 2. Introduction to Python, Kenneth A. Lambert, Cengage

### UNIT I ENVIRONMENT AND ECOSYSTEM

Prerequisite: None

Definition, Scope and Importance of environment – need for public awareness – concept, structure and function of an ecosystem- producers, consumers and decomposers - energy flow in the ecosystem. Biodiversity at national and local levels - India

### UNIT II **ENVIRONMENT POLLUTION**

Definition – causes, effects and control measures of: (a) Air pollution (b) Water pollution (c) Soil pollution (d) Marine pollution (e) Noise pollution (f) Nuclear hazards (g) E-Wastes and causes, effects and control measures NATURAL RESOURCES **UNIT III** 6 Hrs

Forest resources: Use and over-exploitation, deforestation. Water resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems. Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems. 6 Hrs

### **UNIT IV** SOCIAL ISSUES AND THE ENVIRONMENT

From unsustainable to sustainable development – urban problems related to energy – water conservation, rain water harvesting, watershed management – resettlement and rehabilitation of people; its problems and concerns climate change, global warming, acid rain, ozone layer depletion, nuclear accidents, central and state pollution control boards- Public awareness.

### UNIT V HUMAN POPULATION AND THE ENVIRONMENT

Population growth, variation among nations – population explosion, environment and human health – human rights - value education - HIV/AIDS - women and child welfare - role of information technology in environment and human health

## (A) AWARENESS ACTIVITIES:

i) small group meetings about water management, promotion of recycle use, generation of less waste, avoiding electricity waste

ii) Slogan making event iii) Poster making event

iv) Cycle rally v) Lectures from experts

### **(B) ACTUAL ACTIVITIES:**

i) Plantation ii) Gifting a tree to see its full growth

iii) Cleanliness drive iv) Drive for segregation of waste

- v) To live some big environmentalist for a week or so to understand his work
- vi) To work in kitchen garden for mess

vii) To know about the different varieties of plants

viii) Shutting down the fans and ACs of the campus for an hour or so

### TEXT BOOKS

- 1. Gilbert M.Masters, 'Introduction to Environmental Engineering and Science', 2nd edition, Pearson Education (2004).
- 2. Benny Joseph, 'Environmental Science and Engineering', Tata McGrawHill, NewDelhi, (2006).

### UNIT I LOGIC

Statements – Truth Table – Connectives – Normal Forms – Predicate Calculus – Inference Theory.

### UNIT II **COMBINATORICS**

Mathematical Induction – Pigeon Hole Principle – Principle of Inclusion and Exclusion – Recurrence Relations - Generating Functions.

### **UNIT III** GROUPS

Basic Concepts - Groups - Subgroups - Homomorphism - Kernel - Cosets - Lagrange's theorem - Group Homomorphisms – Rings and Fields (Definitions and simple theorems and problems).

### UNIT IV **AUTOMATA**

Finite Automata - Regular grammar - Introduction - Context free grammar - Introduction to Turing machine - Finite state machine - Introduction - Language Recognition

### UNIT V GRAPHS

Introduction to Graphs - Terminology - Matrix representation of Graphs: Incidence matrix, Adjacency matrix - Graph Isomorphism - Connectivity - Euler and Hamiltonian Paths (simple theorems and problems).

## Total Hrs: 60

### LINEAR DATA STRUCTURES UNIT I

Algorithm Basics and Analysis-List-Stacks- Queues - Implementation and Applications - Singly linked list-Doubly linked Lists-Applications

### **UNIT II** NON LINEAR DATA STRUCTURES

Trees – Binary Trees – Binary Search Tree Implementation – Tree Traversals – AVL trees- 2-3 tree, 2-3-4 tree.

### **UNIT III** SEARCHING AND SORTING TECHNIQUES

Types of searching - Linear and Binary Searching Analysis - types of sorting-Quick Sort - Heap Sort - Merge Sort - Selection Sort - Bubble Sort - Insertion Sort - Sorting Comparison.

### **UNIT IV GRAPH ALGORITHMS**

Graph Operations - DFS - BFS - Applications of Graphs - Minimum Cost Spanning Tree - Kruskal's Algorithm - Prim's Algorithm

### UNIT V ALGORITHM DESIGN METHODS

Greedy method - Traveling Sales Person Problem - Divide and Conquer - Strassen's Matrix Multiplication -Dynamic Programming - Knapsack problem- Back Tracking - N Queens Problem.

### **TEXT BOOKS :**

1. Horowitz, E. Sahani, S. & Mehta. (2007) Fundamentals of Data Structures in C++, Galgotia.

### Unit I SOFTWARE PROCESS AND AGILE DEVELOPMENT

**Introduction to Software Engineering -** Professional software development, Software engineering ethics, **Software processes**- Software process models, Process activities, Coping with change, Process improvement, **Agile software development**- Agile methods, Agile development techniques, Agile project management, Scaling agile methods

### Unit II REQUIREMENTS ANALYSIS AND SPECIFICATION

**Software Requirements**: User requirements, System requirements, Functional and Non-Functional, Software Requirements Document – **Requirement Engineering Process**: Feasibility Studies, Requirements elicitation, Requirement Specification, Requirements validation, Requirement change.

### Unit III SOFTWARE DESIGN AND IMPLEMENTATION

**System modeling-**Context models, Interaction models, Structural models, Behavioral models, Model-driven architecture, **Architectural design**- Architectural design decisions, Architectural views, Architectural patterns, Application architectures, **Design and implementation**- Object-oriented design using the UML, Design patterns, Implementation issues

### Unit IV SOFTWARE TESTING AND QUALITY MANAGEMENT

**Software testing** - Development testing, Test-driven development, Release testing, User testing, **Quality management**- Software quality, Software standards, Reviews and inspections, Quality management and agile development, Software measurement

### **Unit VSOFTWARE MANAGEMENT**

**Project management**- Risk management, Managing people, Teamwork, **Project planning**- Software pricing, Plan-driven development, Project scheduling, Agile planning, Estimation techniques, COCOMO cost modeling

# FACULTY OF ENGINEERING AND TECHNOLOGY

UNIT I	BASIC	STRUCTU	<b>RE OF CO</b>	MPUTERS					9 Hrs	
Basic stru	cture of Co	omputer Hard	lware-Von-N	Neumann Arc	hitecture-	Function	nal uni	ts – Bus S	Structures	- Software
						-				

performance - Memory locations and addresses - Memory operations -Instruction and instruction sequencing

SUBJECT NAME

**COMPUTER ORGANIZATION AND** 

### Fixed point arithmetic operation-addition – subtraction – multiplication - division Floating point arithmetic operation-Design of ALU

### **UNIT III PROCESSOR UNIT**

Data path implementation-Control unit-hardwired control - micro programmed control, Nano programming -Concepts of pipelining - Pipeline hazards

### UNIT IV MEMORY SYSTEM

Memory hierarchy-Internal organization of RAM - ROM - Interleaved memory-Cache and associative memories -Virtual memory - Memory organization and cache coherence issues

### UNIT V **INPUT/OUTPUT AND PERIPHERALS**

ARCHITECTURE

**ARITHMETIC AND LOGIC UNIT** 

Accessing I/O devices - Programmed Input/ Output -Interrupts - Direct Memory Access - IO Processor - Buses - Interface circuits - Standard I/O Interfaces (PCI, SCSI, USB) - I/O devices

### **TEXT BOOKS:**

**SUBJECT** 

CODE

**EBIT22004** 

UNIT II

- 1. John Hayes (2012), (2007) digitized Computer Architecture and Organization, Tata McGraw Hill

SUBJECT CODE	SUBJECT NAME	Ty/ Lb/ ETL	L	T/ S.Lr	P/R	С
EBEC22ID1	DIGITAL PRINCIPLES AND SYSTEM DESIGN	Ту	3	0/0	0/0	3

### **UNIT I NUMBER SYSTEMS**

Review of Decimal, Binary, Octal And Hexadecimal Number Systems- Binary Addition Subtraction, Multiplication& Division—Number Conversions – Signed Magnitude form – 1's and 2's Complement - Binary weighted codes- Binary arithmetic – codes – BCD code, Gray code, Excess-3 Code.

### UNIT II BOOLEAN ALGEBRA

Binary logic Functions- Boolean laws –Boolean Algebra – Reduction of Boolean Expressions De Morgan's Theorems, Sum of Products –Product of Sums –Karnaugh map- Quine McCluskey Method.

### UNIT III COMBINATIONAL LOGIC

Logic gates – AND, OR, NOT, NOR, NAND and EX-OR Gates– Half adder –Full adder- Half subtractor–Full subtractor - Multiplexer - Demultiplexer- Encoder – Decoder.

### **ÛNIT IV SYNCHRONOUS/ASYNCHRONOUS SEQUENTIAL LOGIC** 9 Hrs

Latches-R-S- Flip Flop, S-R Flip Flop, D Flip Flop, JK Flip Flop, T Flip-Flop - Master slave Flip-Flop - Counters –Up Down counters- Binary counters-Ring counter- Shift Registers. Asynchronous counters –Decade counters - State diagram - State Table – State Reduction – State Assignment- Excitation Table-Analysis of Asynchronous sequential circuits - Design of Asynchronous Sequential Circuits.

### UNIT V MEMORY DEVICES

Basic memory structure – ROM – PROM – EPROM – EEPROM – EAPROM, RAM – Static and dynamic RAM – Programmable Logic Devices – Programmable Logic Array (PLA) - Programmable Array Logic (PAL) – Field Programmable Gate Arrays (FPGA) – Implementation of combinational logic circuits using PLA, PAL.

### TEXT BOOKS:

### FACULTY OF ENGINEERING AND TECHNOLOGY

SUBJECT CODE	SUBJECT NAME	Ty/Lb/ ETL	L	T/S.L r	P/R	С
	<b>UNIVERSAL HUMAN VALUES 2:</b>	ETL	1	0/0	2/0	2
EBCC22ET1	UNDERSTANDING HARMONY			0/0	2/0	2

### UNIT I Introduction - Need, Basic Guidelines, Content and Process for Value Education

Purpose and motivation for the course, recapitulation from Universal Human Values-I – Self Exploration–what is it? - Its content and process; 'NaturalAcceptance'andExperientialValidation-astheprocessforself-exploration. – Continuous Happiness and Prosperity-A look at basic Human Aspirations - Right understanding, Relationship and Physical Facility- the basic requirements for fulfilment of aspirations of every human being with their correct priority – UnderstandingHappinessandProsperitycorrectly-Acriticalappraisalof the current scenario – Method to fulfil the above human aspirations : understanding and living in harmony at various levels. Include practice sessions to discuss natural acceptance in human being as the innate acceptance for living with responsibility (living in relationship, harmony and co-existence) rather than as arbitrariness in choice based on liking-disliking.

UNIT II Understanding Harmony in the Human Being - Harmony in Myself!

Understanding human being as a co-existence of the sentient 'I' and the material 'Body'.- Understanding the needs of Self ('I') and 'Body' - happiness and physical facility. - Understanding the Body as an instrument of 'I' (I being the doer, seer and enjoyer). -Understanding the characteristics and activities of 'I' and harmony in 'I' - Understanding the harmony of I with the Body: Sanyam and Health; correct appraisal of Physical needs, meaning of Prosperity in detail - Programs to ensure Sanyam and Health. Include practice sessions to discuss the role others have played in making material goods available tome. Identifying from one's own life. Differentiate between prosperity and accumulation. Discuss program for ensuring health vs dealing with disease

**UNIT III Understanding Harmony in the Family and Society- Harmony in Human-Human Relationship 9 Hrs** Understanding values in human-human relationship; meaning of Justice (nine universal values in relationships) and program for its fulfilment to ensure mutual happiness; Trust and Respect as the foundational values of relationship - Understanding the meaning of Trust; Difference between intention and competence - Understanding the meaning of Respect, Difference between respect and differentiation; the other salient values in relationship - Understanding the harmony in the society (society being an extension of family): Resolution, Prosperity, fearlessness (trust) and co-existence as comprehensive Human Goals - Visualizing a universal harmonious order in society- Undivided Society, Universal Order- from family to world family. Include practice sessions to reflect on relationships in family, hostel and institute as extended family, real life examples, teacher-student relationship, goal of education etc. Gratitude as a universal value in relationships. Discuss with scenarios. Elicit examples from students' lives

UNIT IV Understanding Harmony in the Nature and Existence - Whole existence as Coexistence 9 Hrs Understanding the harmony in the Nature - Interconnectedness and mutual fulfillment among the four orders of naturerecyclability and self-regulation in nature - Understanding Existence as Co-existence of mutually interacting units in all-pervasive space - Holistic perception of harmony at all levels of existence - Include practice sessions to discuss human being as cause of imbalance in nature (film "Home" can be used), pollution, depletion of resources and role of technology etc.

UNIT V Implications of the above Holistic Understanding of Harmony on Professional Ethics9 HrsNatural acceptance of human values - Definitiveness of Ethical Human Conduct - Basis for Humanistic Education, HumanisticConstitution and Humanistic Universal Order - Competence in professional ethics: a. Ability to utilize the professionalcompetence for augmenting universal human order b. Ability to identify the scope and characteristics of people friendly and eco-<br/>friendly production systems, c. Ability to identify and develop appropriate technologies and management patterns for above<br/>production systems. - Case studies of typical holistic technologies, management models and production systems - Strategy for<br/>transition from the present state to Universal Human Order: ((a) At the level of individual: as socially and ecologically<br/>responsible engineers, technologists and managers, (b)At the level of society: as mutually enriching institutions and organizations<br/>- Sum up

Include practice Exercises and Case Studies will be taken up in Practice (tutorial) Sessions e.g. To discuss the conduct as an engineer or scientist etc.

**Total Hours: 45**

#### **EXERCISES:**

- 1) Operation on arrays insertion and deletion
- 2) Linked lists-creation, insertion, deletion of single lists.
- 3) Linked lists-creation, insertion, deletion of double lists.
- 4) Stack- operations using arrays
- 5) Stack- operations using linked list
- 6) Infix to postfix conversion and evaluation
- 7) Queue operations using arrays
- 8) Queue operations using linked list
- 9) Binary tree traversals- In order, pre order, post order using recursion
- 10) Binary search
- Sorting Selection Sort
   Sorting Quick sort.
- 13) Depth first search of a graph
- 14) Breath first search of a graph
- 15) Prim's algorithm
- 16) Knapsack problem
- 17) N-Queens problem
- 18) Travels sales problem

EBIT22ET1	<b>OBJECT ORIENTED PROGRAMMING WITH</b> C++	ETL	2	0/0	2/0	3

#### UNIT I **BASICS, TOKENS, EXPRESSIONS**

Software Evolution, Procedure Oriented Programming, Object Oriented Programming Paradigm, Basic Concepts of OOP, Benefits of OOP, Object Oriented Languages, Features of OOP. How OOP Differ from POP. Applications of OOP, A Simple C++ Program, Structure of C++ Program. Tokens, Keywords, Identifiers and Constants, Basic Data Types, User Defined Data Types, Derived Data Types, Dynamic Initialization of Variables, Reference Variables, Operators in C++, Scope Resolution Operator, Member Dereferencing Operators, Memory Management Operators.

#### **UNIT II** FUNCTIONS, CLASSES AND OBJECTS

Introduction of Classes, Specifying a Class, Defining a Member Functions, A C++ Program with Class Access Specifiers, Inline functions, Nesting of Member Functions, Memory Allocation for Objects, Static Data Members, Static Member Functions, Arrays of Objects, Objects as Function Arguments, Default Arguments, Const Arguments, Function Overloading, Friend Functions.

#### **CONSTRUCTORS AND DESTRUCTORS UNIT III**

Introduction, Constructors, Default constructors, Copy Constructors, Dynamic Constructors, Parameterized Constructors, Multiple Constructors in a Class, Constructors with Default Arguments, Dynamic initialization of Objects, Destructors.

#### **UNIT IV INHERITANCE**

LIST OF EXPERIMENTS

Introduction to inheritance, Defining Derived Classes, Single Inheritance, Multiple Inheritance, Multi Level Inheritance, Hierarchical Inheritance, Hybrid Inheritance, Abstract Classes, Constructors in Derived Classes, Containership.

#### UNIT V POINTERS, VIRTUAL FUNCTIONS AND POLYMORPHISM

Introduction to Memory Management, new Operator and delete Operator, Pointer to Objects, this Pointer, Pointers to Derived Classes, Polymorphism, Compile time polymorphism, Run time polymorphism, Virtual Functions, Pure Virtual Functions, Virtual Base Classes, Virtual Destructors, Operator overloading, Rules for Operator overloading, overloading of binary and unary operators

#### **Total Hours: 60**

# 1. Implementation of various Operators.

- Arithmetic Operator a.
- b. Logical Operators
- c. Relational Operator
- d. Assignment operator
- 2. Programs to understand Classes and Objects.
- 3. Programs to understand Access Specifier.
- 4. Implementation of function and Inline Function.
- 5. Implementation of Friend function

#### **12 Hrs**

12 Hrs

12 Hrs

12 Hrs

# **12 Hrs**

- 6. Programs to understand different function call mechanism
  - a. Call by reference
  - b. Call by value
- 7. Implementation of constructor and destructor
- 8. Implementation of use of "this" pointer using class
- 9. Implementation of inheritance and function overriding
- 10. Implementation of Operator Overloading

#### **TEXT BOOK:**

1. E. Balagurusamy, "Object Oriented Programming in C++", 6thed., Tata McGraw-Hill, 2013

#### **REFERENCE BOOKS:**

- 1. K.R.Venugopal, "Mastering C++", published by Tata McGraw-Hill. -2013, Second Edition.
- 2. Rohit Khurana, "Object Oriented Programming With C++", Vikas Publishing House- 2014, Second Edition.

#### UNIT I BASICS OF STATISTICS

Variables – Uni-variate Data – Frequency Distribution – Measures of Central Tendency – Mean – Median – Mode – Quartiles – Measures of Dispersion – The Range – Mean deviation - Quartile Deviation – Standard Deviation – Relative Measures of Dispersion – Coefficient of Variation – Quartile Coefficient of Variation – Skewness and Kurtosis (Definition and Simple problems).

#### UNIT II PROBABILITY AND RANDOM VARIABLE

Axioms of Probability - Independent Events – Mutually exclusive Events– Conditional probability – Total probability – Baye's Theorem – Random variable – Probability mass function – Probability density function – Properties(Definition and simple problems).

#### UNIT III CORRELATION & REGRESSION

Bi-variate data – Applications of Correlation: Karl Pearson's Coefficient of Correlation – Rank Correlation: Spearman's Rank Correlation – Linear Regression.

#### UNIT IV STANDARD DISTRIBUTIONS

Binomial – Poisson – Geometric –Uniform – Exponential –Normal distributions.

#### UNIT V TESTING OF HYPOTHESIS

Tests of Significance – Null hypothesis – Alternative hypothesis – Critical points - Large Sample Tests – Mean proportions– Small Sample Tests – t, F, Chi-square Tests: Independence of Attributes, Goodness of Fit.

#### **Total Hrs: 60**

#### UNIT I FUNDAMENTALS OF DATABASE

Introduction to File and Database systems — Database System Structure -Data Abstraction -Data models – Instances and schemas –Data Independence – DDL – DML – Database user – ER model – Entity sets- keys – ER diagram.

#### UNIT II RELATIONAL MODEL AND SQL

Relational model – structure – relational algebra- relational calculus- views-SQL - Queries in SQL -QBE level – Basic Structure – various operations – relational database design – problems in the relational database design – normalization – normalization using functional – Multi valued join dependence

#### UNIT III DATA STORAGE AND QUERY PROCESSING

File and system structure – overall system structure – file transaction – data dictionary – indexing and Hashing- basic concepts and B+ tree Indices - static and dynamic hash functions- Overview - Measures of Query Cost - Selection Operation – Sorting - Join Operation

#### UNIT IV TRANSACTIONS AND CONCURRENCY CONTROL

Transaction Concept- A Simple Transaction Model - Storage Structure – Transaction Processing – Need for Concurrency Control – Desirable Properties of Transaction – Schedule and Recoverability – Serializability and Schedules – Concurrency Control –Types of Locks – Two Phases Locking – Deadlock - Deadlock Handling – Time Stamp Based Concurrency Control –Recovery Techniques - Recovery and Atomicity - Recovery Algorithm– Immediate Update – Deferred Update – Shadow Paging.

#### **UNIT V CURRENT TRENDS**

Object Oriented Databases– Distributed Databases – Homogenous and Heterogeneous – Distributed Data Storage – XML – Structure of XML – Data – XML Document –Schema – Querying and Transformation – Data Mining and Data Warehousing-JDBC-ODBC connectivity

#### **Total Hours: 45**

EBIT22006	<b>OPERATING SYSTEM</b>	Ту	3	0/0	0/0	3

#### **OPERATING SYSTEM AND STRUCTURES** UNIT I

Introduction - operating system operations - process management, memory management, storage management, protection and security, distributed systems. Operating Systems Structures: Operating system services and systems calls - system programs - operating system structure - operating systems generations.

#### UNIT II PROCESS MANAGEMENT AND SYNCHRONIZATION

Threads-Multithreading Models. CPU Scheduling concepts-Scheduling Criteria-Scheduling Algorithms-Threads and Multiple-Processor Scheduling-Real Time Scheduling-Process Synchronization-The Critical Section Problem-Synchronization Hardware-Semaphores-Classical Problems of Synchronization.

#### UNIT III DEADLOCKS AND MEMORY MANAGEMENT

Deadlocks-Deadlock Characterization - Methods of Handling Deadlocks-Deadlock Prevention-Deadlock Avoidance - Deadlock Detection - Recovery from Deadlock - Memory Management: Swapping - contiguous memory allocation - paging - structure of the page table - segmentation - virtual memory - demand paging page-replacement algorithms - allocation of frames - thrashing.

#### **UNIT IV FILE SYSTEM**

Concept of a file - access methods - directory structure - file system mounting - file sharing - protection. File system implementation: file system structure - file system implementation - directory implementation allocation methods - free-space management - efficiency and performance - comparison of UNIX and windows.

#### UNIT V **I/O SYSTEM**

Mass storage structure - overview of mass storage structure - disk structure - disk attachment - disk scheduling algorithms - swap space management - stable storage implementation - tertiary storage structure. I/O: Hardware - application I/O interface - kernel I/O subsystem - transforming I/O requests to hardware operations - streams - performance.

EBEC22ID2	Microprocessor and Microcontrollers	Ту	3	0/0	0/0	3

#### **UNIT I THE 8086 MICROPROCESSORS**

Introduction to 8086 – Microprocessor architecture – Addressing modes - Instruction set and assembler directives – Assembly language programming.

#### **UNIT II 8086 SYSTEM BUS STRUCTURE**

8086 signals – Basic configurations – System bus timing –System design using 8086 – I/O programming – Introduction to Multiprogramming – System Bus Structure – Multiprocessor configurations – Coprocessor, closely coupled and loosely Coupled configurations.

#### UNIT III I/O INTERFACING

Memory Interfacing and I/O interfacing - Parallel communication interface – Serial communication interface – D/A and A/D Interface - Timer – Keyboard /display controller – Interrupt controller – DMA controller

#### UNIT IV MICROCONTROLLER

Architecture of 8051 – Special Function Registers (SFRs) - I/O Pins Ports and Circuits - Instruction set - Addressing modes.

#### UNIT V INTERFACING MICROCONTROLLER

Programming 8051 Timers - Serial Port Programming - Interrupts Programming – LCD & Keyboard Interfacing - ADC, DAC & Sensor Interfacing - External Memory Interface- Stepper Motorand Waveform generation.

#### I. Program to learn DDL and DML commands

- 1. Execution of data description language commands
- 2. Execution of data manipulation language commands
- 3. Execution of data control language commands
- 4. Execution of transaction control language commands
- 5. Insert command
- 6. Select, from and where clause
- 7. Set operation [union, intersection, except]
- 8. String operations
- 9. Nested queries
- 10. Join operation
- 11. Modification of the database

#### II. PL / SQL programs

- 1. Control statements (for loop)
- 2. Control statements (while loop)
- 3. Control statements (for reverse loop)
- 4. Control statements (loop end loop)
- 5. Sum of even numbers
- 6. Sum of odd numbers
- 7. Series generation
- 8. Implementation of sub-program
- 9. Implementation of cursor using pl/sql
- 10. Control statement (if-else end if)

#### LIST OFEXPERIMENTS:

1. Basic UNIX commands-learning and usage.

2. Shell Programming.

3. File system related system calls. (Learn to create, open, read, write, seek into, close files & open, read, write, search, close directories).

4. Process management – Fork, Exec (Learn to create a new process and to overlay an executable binary image on an existing process).

5. Inter-process communication between related processes using pipes.

6. Process synchronization using semaphores (Solutions to synchronization problems like producer consumer problem, dining philosopher's problem etc...).

7. Inter-process communication among unrelated processes using Shared memory.

8. Implementation of Threading & Synchronization

9. CPU Scheduling algorithms.

10. Continuous memory allocation strategies-best fit, first fit and worst fit strategies.

11. Page replacement algorithms.

#### UNIT I OVERVIEW OF JAVA LANGUAGE

Introduction to Java, Features of Java, Comparison with C and C++, Java and World Wide Web, Java Environment, Java Development kit (JDK), Java Runtime Environment(JRE), Application Programming Interface (API), Java Virtual Machine (JVM), Primitive Data types, Declarations, Ranges, Variable Names Conventions, Numeric Literals, Character Literals, String Literals, Arrays(One dimensional, two-dimensional), Enumerated Data Types.

#### UNIT II CLASSES, OBJECTS AND METHODS

Classes and Objects, Defining a class; Defining instance variables and methods, Creating objects out of a class, Method calls via object references, Abstraction, Packages, Interfaces and Abstract classes, Abstract and non-abstract methods, Inheritance, extends and implements keywords in Java, Super class and Sub class, this keyword, super keyword in Java for inheritance, Concrete classes in Java, Polymorphism, Compile time polymorphism - Overloading of methods ,Run time polymorphism - Overriding of methods, Method Overriding rules and method overloading rules, Encapsulation.

#### UNIT III EXCEPTION AND MULTITHREADED PROGRAMMING 12Hrs

Exception handling, Need for exceptions, API hierarchy for Exceptions, Types of Exceptions, Keywords in Exception API: try, catch, finally, throw, throws, -Introduction to Threads – Creating Threads, Extending the Thread Class, Implementing the runnable interface, life cycle of a thread, priority of a thread, Multithreading, Synchronization, Dead Lock.

#### UNIT IV AWT CONTROLS

The AWT class hierarchy, user interface components- Labels, Button, Text Components, Check Box, Check Box Group, Choice, List Box, Panels – Scroll Pane, Menu, Scroll Bar. Working with Frame class, Colour, Fonts and layout managers. EVENT HANDLING: Events, Event sources, Event Listeners, Event Delegation Model (EDM), Handling Mouse and Keyboard Events, Adapter classes, Inner classes.

#### UNIT V SWINGS

Introduction to Swings, Hierarchy of swing components. Containers, Top level containers - JFrame, JWindow, JDialog, JPanel, JButton, JToggleButton, JCheckBox, JRadioButton, JLabel, JTextField, JTextArea, JList, JComboBox, JScrollPane.APPLETS: Life cycle of an Applet, Differences between Applets and Applications, Developing applets, simple applet.

- 2 .Kathy Sierra, Bert Bates," Head First Java", Oreilly Publication, 2nd Edition, 2005

#### **OBJECT OREINTED**

Subject Code	Subject Name	Ty/ Lb/ ETL	L	T/ S.Lr	P/R	С
EBIT22I01	TECHNICAL SKILL I	IE	0	0/0	2/0	1

#### **OBJECTIVES:**

- To make the students expert in domain specific knowledge.
- To develop professionals with idealistic, practical and moral values.
- To facilitate the students with emerging technology.

Students should acquire skill in the domain/inter disciplinary area from government/private training centers/industries /University for a minimum period of 15 calendar days. The training can be through off line, online or mixed mode. Students are supposed to prepare Technical skill report at the end of the training and submit the report along with the certificate in proof of the training, during the viva voce examination conducted by the examiners duly appointed by the head of the department.

EBIT22007	ENTERPRISE RESOURCE PLANNING	Ту	3	0/0	0/0	3

#### UNIT I Introduction

Overview of enterprise systems – Evolution - Risks and benefits - Fundamental technology - Issues to be consider in planning design and implementation of cross functional integrated ERP systems - Case studies.

#### **UNIT II ERP Solutions And Functional Modules**

Overview of ERP software solutions- Small medium and large enterprise vendor solutions, BPR, Business Engineering and best Business practices - Business process Management. Overview of ERP modules -sales and Marketing, Accounting and Finance, Materials and Production management etc. -Case studies.

#### **UNIT III ERP** Implementation

Planning Evaluation and selection of ERP systems-Implementation life cycle - ERP implementation, Methodology and Frame work- Training – Data Migration. People Organization in implementation-Consultants, Vendors and Employees-Case studies.

#### **UNIT IV Post Implementation**

Maintenance of ERP- Organizational and Industrial impact; Success and Failure factors of and ERP Implementation -case studies.

#### UNIT V **Emerging Trends on ERP**

Extended ERP systems and ERP bolt -on -CRM, SCM, Business analytics etc- Future trends in ERP systemsweb enabled, Wireless technologies so on-Case studies.

	Prerequisite: Related papers	IE	1	0/0	1/0	1

#### ONLINE COURSE

Students should register for the online course with a minimum course duration of 4 weeks through the online portals such as NPTEL/SWAYAM/Any MOOC in the beginning of the semester. A mentor will be assigned by the department for monitoring the students.

Students are expected to attend the online classes regularly and submit the weekly assignments before the due dates. Students should appear for the online examination and submit the certificate at the end of the semester .Internal Examination will be conducted by the examiners duly appointed by the head of the department.

EBIT22L04	ENTERPRISE RESOURCE PLANNING LAB	Lb	0	0/0	3/0	1

#### EXERCISES

- 1. Study of case in Sales Order Management
- 2. Case study in Marketing System
- 3. Business Accounting System
- 4. Finance Management System
- 5. Materials Management System
- 6. Production Management System
- 7. Vendors Management System
- 8. Employee Management System

#### **SOFTWARE REQUIRED:**

Languages: .NET and ASP.NET, Java, Ruby, Python, PHP Any Front End (JavaScript, AngularJS, React.js) Any Back End (Like Postgre SQL, MSSQL, Oracle SQL)

EBIT22L05	NETWORK PROGRAMMING LAB	Lb	0	0/0	3/0	1

- 1. Networking Commands with options. (Case Study).
- 2. Socket program to extent communication between two deferent ends using TCP.
- 3. Socket program to extent communication between two deferent ends using UDP
- 4. Create a Socket (TCP) between two computers and enable file transfer between them.
- 5. Implementation of RPC in server-client model
- 6. Implementation of ARP/RARP.
- 7. HTTP Socket program to download a web page.
- 8. File transfer in Client-Server architecture using following methods
- a) Using RS232C b) Using TCP/IP
- 9. To implement RMI (Remote Method Invocation)
- 10. Write a network program to broadcast/ multicast a message to a group in the same network.
- 11. Demonstration of Network Simulators.

# FACULTY OF ENGINEERING AND TECHNOLOGY

Subject Code	Subject Name	Ty/ Lb/ ETL	L	T/ S.Lr	P/R	С
EBIT22ET3	COMPUTER GRAPHICS AND MULTIMEDIA	ETL	2	0/0	2/0	3

#### UNIT I OUTPUT PRIMITIVES AND TWO-DIMENSIONAL CONCEPTS

Introduction – Output primitives – points and lines, Line, Curve and ellipse drawing algorithms - CASE STUDY: Implementation of Bresenham's algorithms for line, circle and ellipse drawing – Attributes – Two dimensional geometric transformations –CASE STUDY: perform 2D Transformations such as translation, rotation, scaling, reflection and sharing – Two dimensional clipping and viewing – Input techniques

#### UNIT II THREE-DIMENSIONAL CONCEPTS AND COLOR MODELS

Three-dimensional object representations – Three dimensional geometric and modeling transformations-CASES STUDY: To perform 3D Transformations such as translation, rotation and scaling. – Three dimensional viewing – OpenGL Functions for 3D Transformations and 3D Viewing. – Color models- Intuitive color concepts - RGB color model -; Color selection- CASE STUDY: To conversion between color models(YIQ color model - CMY color model - HLS color model).

#### UNIT III MULTIMEDIA SYSTEMS DESIGN

An introduction – Multimedia applications – Multimedia system architecture – Evolving technologies for multimedia – Defining objects for multimedia systems – Multimedia data interface standards –Multimedia databases.

#### UNIT IV MULTIMEDIA FILE HANDLING

Compression and decompression – Data and file format standards – Multimedia I/O technologies –Digital voice and audio – Video image and animation -CASE STUDY: To perform animation using any Animation software – Full motion video – Storage and retrieval technologies. CASE STUDY: To perform basic operations on image using any image editing software.

#### **UNIT V HYPERMEDIA**

Multimedia authoring and user interface – Hypermedia messaging – Mobile messaging – Hypermedia message component – Creating hypermedia message – Integrated multimedia message standards –Integrated document management – Distributed multimedia systems, CASE STUDY: BLENDER GRAPHICS Blender Fundamentals – Drawing Basic Shapes – Modelling – Shading & Textures.

EBIT22I02	TECHNICAL SKILL II	IE	0	0/0	2/0	1

#### **OBJECTIVES:**

- To make the students expert in domain specific knowledge.
- To develop professionals with idealistic, practical and moral values.
- To facilitate the students with emerging technology.

Students should acquire skill in the domain/inter disciplinary area from government/private training centers/industries /University for a minimum period of 15 calendar days. The training can be through off line, online or mixed mode. Students are supposed to prepare Technical skill report at the end of the training and submit the report along with the certificate in proof of the training, during the viva voce examination conducted by the examiners duly appointed by the head of the department.

#### UNIT I FUNDAMENTALS OF EMBEDDED SYSTEMS

Embedded System Vs General Computing System - Classification of Embedded System, Purpose of Embedded system, Quality Attributes of Embedded System - Typical Embedded System- Core of Embedded System, Memory, Sensors and Actuators, Communication Interface- Onboard communication interface, External communication interface.

#### UNIT II EMBEDDED FIRMWARE DESIGN AND DEVELOPMENT

Embedded Firmware Design Approaches- Embedded Firmware Development Languages - Embedded System Development Environment - IDE, Compiler, Linker - Types of File Generated on Cross Compilation-Simulator, Emulator and Debugging- Fundamental issues in Hardware Software Co-design- Integration and Testing of Embedded Hardware and Firmware.

#### **UNIT III EMBEDDED DESIGN TECHNIQUES**

Introduction-Characteristics - Physical design - protocols – Logical design – Enabling technologies – IoT Levels - Domain Specific IoTs - IoT vs. M2M. IoT systems management - IoT Design Methodology - Specifications Integration and Application Development.

#### UNIT IV FUNDAMENTALS OF IoT

Physical device – Raspberry Pi Interfaces – Programming – APIs / Packages – Web services. Intel Galileo Gen2 with Arduino- Interfaces - Arduino IDE - Programming - APIs and Hacks. Various Real time applications of IoT- Connecting IoT to cloud – Cloud Storage for IoT – Data Analytics for IoT – Software & Management Tools for IoT.

#### UNIT V IMPLEMENTATION OF IoT IN REAL WORLD

IoE - Overview - Architecture-Smart objects and LLNs-Secure mobility. Home automation - Cities: Smart parking – Environment: Weather monitoring – Agriculture: Smart irrigation – Data analytics for IoT – Software & management tools for IoT cloud storage models & Communication APIs - Cloud for IoT - Amazon Web Services for IoT.

DATA WAREHOUSING AND DATA MINING

UNIT I	DATA WAREHOUSING	

Introduction to Data warehouse, Difference between operational database systems and data warehouses, Data warehouse Characteristics, Data warehouse Architecture and its Components, Extraction- Transformation-Loading, Logical(Multi-Dimensional), Data Modeling, Schema Design, Star and Snow-Flake Schema, Fact Constellation, Fact Table, Fully Addictive, Semi-Addictive, Non Addictive Measures; Fact-Less-Facts, Dimension Table Characteristics; OLAP Cube, OLAP Operations, OLAP Server Architecture-ROLAP, MOLAP and HOLAP.

#### UNIT II **DATA MINING**

**EBIT22012** 

Introduction: Fundamentals of data mining, Data Mining Functionalities, Classification of Data Mining systems, Data Mining Task Primitives, Integration of a Data Mining System with a Database or Data Warehouse System, Major issues in Data Mining.

Data Preprocessing: Need for Preprocessing the Data, Data Cleaning, Data Integration & Transformation, Data Reduction, Discretization and Concept Hierarchy Generation.

#### UNIT III ASSOCIATION RULES

Problem Definition, Frequent Item Set Generation, The APRIORI Principle, Support and Confidence Measures, Association Rule Generation; APRIOIRI Algorithm, The Partition Algorithms, FP-Growth Algorithms, Compact Representation of Frequent Item Set- Maximal Frequent Item Set, Closed Frequent Item Set.

#### UNIT IV CLASSIFICATION

Problem Definition, General Approaches to solving a classification problem, Evaluation of Classifiers, Classification techniques, Decision Trees-Decision tree Construction, Methods for Expressing attribute test conditions, Measures for Selecting the Best Split, Algorithm for Decision tree Induction; Naive-Bayes Classifier, Bayesian Belief Networks; K- Nearest neighbor classification-Algorithm and Characteristics, prediction: Accuracy and Error measures, Evaluating the accuracy of a classifier or a predictor, Ensemble methods ..

#### UNIT V CLUSTERING

Clustering Overview, A Categorization of Major Clustering Methods, partitioning methods, hierarchical methods, , partitioning clustering-k-means algorithm, pam algorithm; hierarchical clustering-agglomerative methods and divisive methods, Basic Agglomerative Hierarchical Clustering Algorithm, Key Issues in Hierarchical Clustering, Strengths and Weakness, Outlier Detection.

#### **PROGRAMS/ EXPERIMENTS:**

- 1. Programming and Simulation of 8051 in Keil IDE.
- 2. Alphanumeric LCD interface using 8051.
- 3. Study of ARM evaluation system.
- 4. Flashing of LEDs using ARM (LPC2148)
- 5. Interfacing keyboard and LCD using ARM (LPC2148).
- 6. Temperature sensor interface using ARM (LPC2148).
- 7. Study of FPGA evaluation system.
- 8. Design of logic gates using FPGA.
- 9. Design of UP/Down counter using FPGA
- 10. Interfacing EPROM and interrupt.
- 11. Interrupt performance characteristics of ARM and FPGA.
- 12. Control raspberry Pi using local server.
- 13. Rasberry Pi as Server
- 14. Transfer data using serial communication.

EBIT22I03	TECHNICAL SKILL III	IE	0	0/0	2/0	1

#### **OBJECTIVES:**

- To make the students expert in domain specific knowledge.
- To develop professionals with idealistic, practical and moral values.
- To facilitate the students with emerging technology.

Students should acquire skill in the domain/inter disciplinary area from government/private training centers/industries /University for a minimum period of 15 calendar days. The training can be through off line, online or mixed mode. Students are supposed to prepare Technical skill report at the end of the training and submit the report along with the certificate in proof of the training, during the viva voce examination conducted by the examiners duly appointed by the head of the department.

EBIT22I04	MINI PROJECT / INTERNSHIP	IE	0	0/0	3/0	1

#### MINI PROJECT:

Students will have an opportunity to expose their knowledge and talent to make an innovative project. Students are supposed to do innovative projects useful to industries/society in the area of relevant Engineering, inter and multi-disciplinary areas, under the guidance of a staff member. They have to prepare a project report and submit to the department.

At the end of the semester Viva-Voce examination will be conducted by the internal Examiner duly appointed by the Head of the department and the students will be evaluated.

#### **INTERNSHIP**

Students are supposed to undergo internship in related Industries for a minimum period of 30days cumulatively during the semester. They have to prepare a report on the Internship with a certificate in proof from competent authority in the industry. At the end of the semester Viva-Voce examination will be conducted by the Examiners duly appointed by the Head of the department and the students will be evaluated.

#### UNIT I CLOUD COMPUTING INTRODUCTION

Introduction - Characteristics - cloud models - cloud services - cloud based services and applications - virtualization -Load balancing - deployment - replication - monitoring - MapReduce - Identity and Access management.

#### UNIT II CLOUD SERVICES AND PLATFORMS

Compute services – storage services – database services – application services – content delivery services – analysis services – Deployment & management services – identity and Access management services – open source private cloud software – Hadoop MapReduce job execution – Hadoop schedulers – Hadoopcluster setup

#### UNIT III CLOUD APPLICATION DESIGN & PYTHON

Design consideration for cloud applications –reference architecture for cloud applications –cloud application design methodologies - data storage approaches –Python data types & data structures –control flow –functions –modules –packages –file handling –classes

#### UNIT IV CLOUD APPLICATION DEVELOPMENT

Concept of a file - access methods - directory structure - file system mounting - file sharing - protection. File system implementation: file system structure - file system implementation - directory implementation - allocation methods - free-space management - efficiency and performance - comparison of UNIX and windows.

#### UNIT V ADVANCED APPICATIONS

Clustering Big Data – Classification of Big Data – multimedia cloud – Streaming protocols – cloud application benchmarking and tuning – workload characteristics – application performance matrix – design consideration – benchmarking tools- deployment prototyping – CSA cloud security architecture – authentication – authorization – data security – auditing.

D TO BE UNIVERSITY

#### UNIT I **INTRODUCTION**

Testing as an Engineering Activity – Testing as a Process – Testing Maturity Model- Testing axioms – Basic definitions – Software Testing Principles - The Tester's Role in a Software Development Organization - Origins of Defects - Cost of defects - Defect Classes - The Defect Repository and Test Design -Defect Examples- Developer/Tester Support of Developing a Defect Repository

#### TEST CASE DESIGN STRATEGIES UNIT II

Test case Design Strategies – Using Black Box Approach to Test Case Design – Boundary Value Analysis – Equivalence Class Partitioning – State based testing – Cause-effect graphing – Compatibility testing – user documentation testing – domain testing - Random Testing - Requirements based testing - Using White Box Approach to Test design - Test Adequacy Criteria – static testing vs. structural testing – code functional testing – Coverage and Control Flow Graphs – Covering Code Logic - Paths - code complexity testing - Additional White box testing approaches- Evaluating Test Adequacy Criteria.

#### **UNIT III** LEVELS OF TESTING

The need for Levels of Testing – Unit Test – Unit Test Planning – Designing the Unit Tests – The Test Harness – Running the Unit tests and Recording results - Integration tests - Designing Integration Tests - Integration Test Planning - Scenario testing - Defect bash elimination System Testing - Acceptance testing - Performance testing - Regression Testing -Internationalization testing – Ad-hoc testing – Alpha, Beta Tests – Testing OO systems – Usability and Accessibility testing Configuration testing – Compatibility testing – Testing the documentation – Website testing.

#### UNIT IV TEST MANAGEMENT

People and organizational issues in testing - Organization structures for testing teams - testing services - Test Planning -Test Plan Components – Test Plan Attachments – Locating Test Items – test management – test process – Reporting Test Results – Introducing the test specialist – Skills needed by a test specialist – Building a Testing Group- The Structure of Testing Group- .The Technical Training Program.

#### UNIT V **TEST AUTOMATION**

Software test automation – skills needed for automation – scope of automation – design and architecture for automation – requirements for a test tool - challenges in automation - Test metrics and measurements - project, progress and productivity metrics.

#### UNIT I WEB SITE BASICS AND HTML

Web Essentials: Clients, Servers, and Communication: The Internet - Basic Internet Protocols - The World Wide Web - HTTP Request message – HTTP Response message - Web Clients - Web Servers. Markup Languages: An Introduction to HTML – History and Versions - Some Fundamental HTML Elements - Relative URLs – Lists – Tables – Frames - Forms.

#### UNIT II CSS

Style Sheets: Introduction to Cascading Style Sheets - CSS Features - Core Syntax - Style Sheets and HTML - Style Rule Cascading and Inheritance - Text Properties – CSS Box Model - Normal Flow Box Layout - Beyond the Normal Flow.

#### UNIT III CLIENT SIDE SCRIPTING

Client-Side Programming: The JavaScript Language - History and Version of JavaScript - Introduction to JavaScript - JavaScript in Perspective – Literals – Functions – Objects – Arrays - Built-in Objects -JavaScript Debuggers.

#### UNIT IV SERVER SIDE SCRIPTING

Java Servlets: Servlet Architecture Overview – A "Hello World!" Servlet – Servlets Generating Dynamic Content – Servlet Life Cycle – Parameter Data – Sessions – Cookies. Introduction to Java Server Page (JSP) – JSP and Servlets – Running JSP Applications – Basic JSP - JavaBeans Classes and JSP.

#### UNIT V SOAP AND CASE STUDIES

Overview of SOAP - HTTP – XML - RPC - Introduction to SGML - COM – DCOM – CORBA. Case Studies: Creating web pages using HTML & CSS - Client Side Scripting for Validating Web Form Controls – Creating JSP Application - Creating a blog.

EBIT22L08	WEB TECHNOLOGY AND WEB SERVICES LAB	Lb	0	0/0	3/0	1

- 1. Create a web page with the following using HTML
  - i) To embed an image map in a web page
  - ii) To fix the hot spots
  - iii) Show all the related information when the hot spots are clicked.
- 2. Create a web page with all types of Cascading style sheets.
- 3. Client Side Scripts for Validating Web Form Controls using DHTML
- 4. Write a program in Java to create applets incorporating the following features:
  - i. Create a color palette with matrix of buttons Set background and foreground of the control text area by selecting a color from color palette.
  - ii. In order to select Foreground or background use check box control as radio buttons
  - iii. To set background images
- 5. Programs using XML Schema XSLT/XSL
- 6. Create a Web form for an online library. This form must be able to accept the Membership Id of the person borrowing a book, the name and ID of the book, and the name of the book's author. On submitting the form, the user (the person borrowing the book) must be thanked and informed of the date when the book is to be returned. You can enhance the look of the page by using various ASP.NET controls.
- 7. Create a JSP application. Send a simple E-Mail to your friends
- 8. Consider a case where we have a web Service- an airline service and a travel agent and the travel agent is searching for an airline. Implement this scenario using Web Services and Data base.

TITUTE

Subject Code	Subject Name	Ty/Lb/ ETL	L	T/ S.Lr	P/R	С
EBIT22ET4	MOBILE APPLICATION DEVELOPMENT	ETL	2	0/0	2/0	3

### UNIT I INTRODUCTION

Introduction to Mobile Platforms – Exploring Android Platform – Android Studio, Java, XML – Exploring Apple IPhone Platform – XCode, Objective C, Swift – Options for development

### UNIT II USER INTERFACE (UI) DEVELOPMENT FOR MOBILE APPS 12 Hrs

UI Elements – User Interface Frameworks – Layouts – Gesture based interfaces – Applying Styles & Themes – Adding Settings.

### UNIT III GOOGLE ANDROID PLATFORM

Google Application Architecture – Basic Building Blocks - The Android Emulator – Event based programming – SQLite Database Access – ADB – Location based Services

### UNIT IV APPLE IPHONE PLATFORM

UI Kit for Interfaces - Event Handling and Graphics Services - SQLite Database Access - Application Debugging - Location Handling.

### UNIT V IMPLEMENTING SOFTWARE AS A SERVICE

Service Oriented Computing Examples – Google Maps – Enabling Map based services in Application – Amazon Web Services – Exploring AWS S3 & AWS IoT APIs

### LIST OF EXPERIMENTS

1. Develop An Application That Uses Gui Components, Font And Colours (unit 2)

2. Develop An Application That Uses Layout Managers And Event Listeners(unit 3)

3. Develop A Native Calculator Application(unit 3)

4. Write An Application That Draws Basic Graphical Primitives On The Screen In Android (unit 3)

- 5. Develop An Application That Makes Use Of Database (unit 3)
- 6. Develop A Native Application That Uses GPS Location Information (unit 5)

7. Develop A Mobile Application For Simple Needs (Mini Project)

### TEXT BÔOKS:

1. Ed Burnette (2015) Hello, Android: Introducing Google's Mobile Development Platform, 4th edition, Pragmatic Bookshelf.

### **REFERENCE BOOKS:**

- 1. Richard Rodger (2012) Beginning Mobile application development in the cloud, Wrox Publication.
- 2. Jonathan A. Zdziarski (2008), iPhone Open Application Development, 2nd edition, O'Reilly Media Publication.

EBIT22105	PROJECT PHASE – I	IE	0	0/0	3/3	2

Students are expected to do the Project in a group of 3 to 4 students. They should identify the area/topic of the Project and should collect the literatures related to the project. Students intending to do Industrial projects will approach the industries with the support of the university, identify the industrial problem and finalize the project. In case of Industrial projects apart from Industry guide, a guide has to be appointed by the department. At the end of the Semester the students should submit their Project Phase - I report to the Department and Viva -Voce examination will be conducted by the examiners duly appointed by the Head of the department.

SUBJECT CODE	SUBJECT NAME	Ty/Lb/ ETL	L	T/S Lr	P/R	С
EBCC22ID2	PRINCIPLES OF MANAGEMENT AND BEHAVIORAL SCIENCE	Ту	3	0/0	0/0	3

#### UNIT I INTRODUCTION

Definition of Management – Science or Art – Manager Vs Entrepreneur - types of managers - managerial roles and responsibilities – Evolution of Management – need and Importance of Organizational Behavior, Leadership styles – Theories – Leaders Vs Managers.

### **UNIT II PLANNING & ORGANISING**

Nature and purpose of planning – planning process – types of planning – Planning premises objectives – hierarchy of objectives, Management By Objectives (MBO)— Decision making process. Nature and purpose of Formal and informal organization structure- types - Line and staff authority- delegation of authority centralization and decentralization.

UNIT III STAFFING AND COORDINATING

Human Resource Planning, Job Analysis, Recruitment, Selection, Training and Development, Performance Management, Career planning. Coordination -Nature and purpose - Coordination at various levels: Top management, Middle management, Supervisory management and workers. Techniques for effective coordination

#### UNIT IV DIRECTING AND CONTROLING

Direction: Principles of direction – Need and Importance for directing, process of controlling – budgetary and non-budgetary control techniques - use of technology. Recent Trends in Management controlling.

#### UNIT V GROUP BEHAVIOUR AND MOTIVATION

Group Dynamics - How Groups Work, Stages of Group Development, Team building, Motivation - Theories of motivation Organizational Conflict - Causes - Types of Conflicts, Managing conflicts.

EBIT22L09	PROJECT (PHASE – II)	Lb	0	0/0	12/12	8

Students are expected to do a Project work either in an Industry or at the University in the field of relevant Engineering /inter-disciplinary /multi-disciplinary area in a group of 3 or 4 students. The work to be carried out in Phase II should be continuation of Phase I. Each group will be allotted a guide based on the area of Project work. In case of industrial Project external guide has to be allotted from Industry. Inter disciplinary/multi-disciplinary project can be done with students of different disciplines as a group. Monthly reviews will be conducted during the semester to monitor the progress of the project by the project review committee. Students have to submit the Project thesis at the end of the semester and appear for the Project Viva-Voce examination conducted by the examiners duly appointed by the Controller of Examination. In case of industrial project certificate in proof has to be included in the report along with the bonafide certificate.

EBIT22E01	FUNDAMENTAL OF DIGITAL IMAGE PROCESSING	Ту	3	0/0	0/0	3

#### UNIT I DIGITAL IMAGE FUNDAMENTALS

Light and Electromagnetic spectrum - Components of Image processing system - Image formation and digitization concepts -Neighbours of pixel adjacency connectivity -Regions and boundaries - Distance measures - Applications.

#### UNIT II IMAGE ENHANCEMENT IN THE SPATIAL DOMAIN

Spatial Domain: Gray level transformations – Histogram processing – Basics of Spatial Filtering– Smoothing and Sharpening Spatial Filtering, Frequency Domain: Introduction to Fourier Transform– Smoothing and Sharpening frequency domain filters – Ideal, Butterworth and Gaussian filters, Homomorphic filtering, Colour image enhancement.

### UNIT III IMAGE RESTORATION

Various noise models, image restoration using spatial domain filtering, image restoration using frequency domain filtering, Estimating the degradation function, Inverse filtering.

#### UNIT IV COLOUR IMAGE PROCESSINGAND MULTI-RESOLUTION PROCESSING 7 Hrs

Colour fundamentals - Colour models - Colour transformation - Smoothing and Sharpening - Colour segmentation - Image pyramids - Multi-resolution expansion - wavelet transform.

### UNIT VIMAGE COMPRESSION AND IMAGE SEGMENTATION9 Hrs

Introduction- Image compression model - Error-free compression- Lossy compression - Detection of discontinuities - Edge linking and boundary detection- Thresholding.

FACULTY OF ENGINEERING AND TECHNOLOGY

#### UNIT I INTRODUCTION

Notion of an Algorithm – Fundamentals of Algorithmic Problem Solving – Important Problem Types - Fundamentals of the Analysis of Algorithm Efficiency - Analysis Framework - Asymptotic Notations and its properties – Mathematical analysis for Recursive and Non-recursive algorithms.

### UNIT II BRUTE FORCE AND DIVIDE-AND-CONQUER

Brute Force - Closest-Pair and Convex Hull Problems-Exhaustive Search - Traveling Salesman Problem -Knapsack Problem – Assignment problem. Divide and conquer methodology – Merge sort – Quick sort – Binary search Multiplication Large of Integers - Strassen's Matrix Multiplication-Closest-Pair and Convex Hull Problems.

#### UNIT III DYNAMIC PROGRAMMING AND GREEDY TECHNIOUE

Computing a Binomial Coefficient - Warshall's and Floyd' algorithm - Optimal Binary Search Trees - Knapsack Problem and Memory functions. Greedy Technique- Prim's algorithm- Kruskal's Algorithm- Dijkstra's Algorithm-Huffman Trees.

#### UNIT IV ITERATIVE IMPROVEMENT

The Simplex Method-The Maximum-Flow Problem – Maximum Matching in Bipartite Graphs- The Stable marriage Problem.

UNIT V COPING WITH THE LIMITATIONS OF ALGORITHM POWER 9Hrs Limitations of Algorithm Power-Lower-Bound Arguments-Decision Trees-P, NP and NP-Complete Problems-Coping with the Limitations – Backtracking – n-Queens problem – Hamiltonian Circuit Problem – Subset Sum Problem-Branch and Bound – Assignment problem – Knapsack Problem – Traveling Salesman Problem-Approximation Algorithms for NP – Hard Problems – Traveling Salesman problem – Knapsack problem.

UNIT I	INTRODUCTION AND PROBLEM SOLVING

Introduction– Intelligent agent – Types of agents – Agent Structure – Problem solving agents – Problem Formulation - Uninformed search strategies – Breadth first search – Uniform cost search – Depth first search – Depth limited search – Bidirectional search – Searching with partial Information

#### UNIT II INFORMED SEARCH METHODS AND GAME PLAYING

Subject Name

**ARTIFICIAL INTELLIGENCE** 

Informed search Strategies – A\* Heuristic function – Hill Climbing search – Constraint Satisfaction problem - Optimal decisions in games – Pruning –Alpha-Beta pruning - State-of-the-Art Game Programs

#### UNIT III KNOWLEDGE AND REASONING

Knowledge based agent – The Wumpus world environment – First-order logic –Building a Knowledge base – Properties of Good and Bad Knowledge bases – The Grocery Shopping World - Inferences in FOL – Forward and backward chaining algorithm

### UNIT IV ACTING LOGICAL

Planning-Simple planning agent-Planning with state space search-Partial order planning-Practi cal planning – Practical planners – Planning and Acting – Conditional Planning – Fully Integrated planning and execution

#### UNIT V UNCERTAIN KNOWLEDGE REASONING AND ROBOTICS

Acting under Uncertainty - Knowledge Engineering for Uncertain Reasoning - Case study: The Pathfinder system – Robotics Introduction – Goods of Robots – Parts of Robots – Navigation and Motion planning. Total Hours: 45

UNIT I	HUMANS IN HCI	

**Subject Code** 

**EBIT22E06** 

Introduction-implications for HCI-overview of HCI-Mentor models in HCI-emotions in HCI-cognitive architecture –task loading and stress in HCI-theoretical framework and mitigation strategies-motivating, influencing and persuading users – human error identification in HCI

### UNIT II COMPUTERS IN HCI

Input technologies and techniques – sensor and recognition based input for interaction-visual displays-haptic interfaces-nonspeech auditory output-network based interaction-wearable computers-design of computer workstation

### UNIT III APPLICATION/DOMAIN SPECIFIC DESIGN

HCI in health care-designing emotions for games, entertainment interfaces and interactive products-motor vehicle driver interfaces-HCI in aerospace-user centred design in games

### UNIT IV DESIGNING FOR DIVERSITY

The digital divide-the role of gender in HCI-IT and older adults-HCI for kids-IT for cognitive support-physical disabilities and computing technologies – an analysis of impairments-computing technologies for deaf and hard of hearing users

### UNIT V MANAGING HCI AND EMERGING ISSUES

Technology transfer-augmenting cognition in HCI-human values, ethics and design, cost justification-future trends in HCI

# FACULTY OF ENGINEERING AND TECHNOLOGY

Subject Code	Subject Name	Ty/ Lb/ ETL	L	T/ S.Lr	P/R	С
EBIT22E07	AGILE METHODOLOGIES	Ту	3	0/0	0/0	3

#### UNIT I AGILE METHODOLOGY

Theories for Agile Management - Agile Software Development - Traditional Model vs. Agile Model -Classification of Agile Methods – Agile Manifesto and Principles – Agile Project Management – Agile Team Interactions – Ethics in Agile Teams - Agility in Design, Testing – Agile Documentations – Agile Drivers, Capabilities and Values.

#### UNIT II AGILE PROCESSES

Lean Production - SCRUM, Crystal, Feature Driven Development - Adaptive Software Development -Extreme Programming: Method Overview – Lifecycle – Work Products, Roles and Practices.

#### AGILITY AND KNOWLEDGE MANAGEMENT UNIT III

Agile Information Systems - Agile Decision Making - Earl\_S Schools of KM - Institutional Knowledge Evolution Cycle – Development, Acquisition, Refinement, Distribution, Deployment, Leveraging – KM in Software Engineering – Managing Software Knowledge – Challenges of Migrating to Agile Methodologies – Agile Knowledge Sharing – Role of Story-Cards – Story-Card Maturity Model (SMM).

#### UNIT IV AGILITY AND REQUIREMENTS ENGINEERING

Impact of Agile Processes in RE–Current Agile Practices – Variance – Overview of RE Using Agile – Managing Unstable Requirements – Requirements Elicitation – Agile Requirements Abstraction Model – Requirements Management in Agile Environment, Agile Requirements Prioritization – Agile Requirements Modeling and Generation - Concurrency in Agile Requirements Generation.

#### UNIT V AGILITY AND QUALITY ASSURANCE

Agile Product Development – Agile Metrics – Feature Driven Development (FDD) – Financial and Production Metrics in FDD – Agile Approach to Quality Assurance - Test Driven Development – Agile Approach in Global Software Development.

### **Total Hours: 45**

#### **TEXT BOOK:**

- 1. David J. Anderson and Eli Schragenheim, —Agile Management for Software Engineering: Applying the Theory of Constraints for Business Results, Prentice Hall, 2003.
- 2. Hazza and Dubinsky, —Agile Software Engineering, Series: Undergraduate Topics in Computer Sciencell, Springer, 2009.

#### **REFERENCE BOOKS**:

- 1. Craig Larman, —Agile and Iterative Development: A Manager\_s Guidel, Addison-Wesley, 2004.
- 2. Kevin C. Desouza, —Agile Information Systems: Conceptualization, Construction, and Managementl, Butterworth-Heinemann, 2007.

# FACULTY OF ENGINEERING AND TECHNOLOGY

SUBJECT COL	SUBJECT NAME	Ty/Lb/ ETL	L	T/ S.Lr	P/R	С
EBIT22E08	E-COMMERCE	Ту	3	0/0	0/0	3

#### UNIT I **INTRODUCTION**

History of E-Commerce -E-Commerce Vs E-Business-Emergence of the Internet- Advantages-Disadvantages-Business model- E – Business Models based on the relationship of Transaction Parties- E – Business Models based on the relationship of Transaction Types- Technologies of World Wide Web- Internet Client Server Applications-Networks and Internets-Software Agents-Internet Standards and Specification-Internet Service Provider-Markup Language and the web-JavaScript-XML-Intranets and Extranets.

#### **UNIT II E-MARKETING**

Identifying Web Presence Goals- The Browsing Behaviour Model-Online Marketing-E-Advertising-Internet Marketing Trends-Targets Markets-E-Branding-Marketing Strategies E-Security: Security on the Internet-E-Business Risk Management Issues-E-Payment Systems: Digital Token based e-payment System-Classification of New Payment System- Electronic Cash-Risk and E-Payment System-Designing E-payment System- Digital Signature.

#### **E-CUSTOMER RELATIONSHIP MANAGEMENT UNIT III**

CRM-ECRM Solutions- ECRM Toolkit-Typical Business Touch point. E-Supply Chain Management-Supply Chain Management- Supply chain Management for Various Industries- E- Strategy and Knowledge management.

#### **UNIT IV MOBILE COMMERCE**

Information System for Mobile Commerce-Mobile Payments-Cellular Networks-Different Generations in wireless Communication- Technologies for mobile Commerce-WAP Programming Model. Portals for E-Business: Portals-Requirements of Intelligent Websites.

#### UNIT V APPLICATIONS

Plan your Business and create a web Site with word press.

#### **TEXT BOOK:**

1. P.T. Joseph, S.J. (2015), E-Commerce Indian Perspective Fifth Edition, PHI Learning

#### **REFERENCE BOOKS:**

- 1. Zheng Qin(2009), Introduction to E-Commerce, Springer.
- 2. Mamta Bhusry, E-Commerce, Laxmi Publications PVT Ltd.

EBIT22E09	FUNDAMENTALS OF ETHICAL HACKING	Ту	3	0/0	0/0	3

#### UNIT I INRODUCTION TO ETHICAL HACKING

Information Security - Types of Data Stolen From the Organizations - Security Challenges - Effects of Hacking - Hacker - Types of Hacker - Ethical Hacker - Hacktivism - Networking & Computer Attacks - Malicious Software (Malware) - Protection against Malware - Intruder Attacks on Networks and Computers - Addressing Physical Security - Key Loggers and Back Doors.

#### UNIT II FOOTPRINTING AND SOCIAL ENGINEERING

Web Tools for Foot Printing - Conducting Competitive Intelligence - Google Hacking - Scanning Enumeration, Trojans & Backdoors - Virus & Worms - Proxy & Packet Filtering - Denial of Service – Sniffing - Social Engineering – shoulder surfing - Dumpster Diving - Piggybacking.

#### UNIT III DATA SECURITY & ATTACK VECTORS

Physical Security – Attacks and Protection, Steganography – Methods, Attacks and Measures, Cryptography – Methods and Types of Attacks, Wireless Hacking, Windows Hacking, Linux Hacking – Buffer Overflow - Denial of Service Attack - Methodical Penetration Testing.

#### UNIT IV NETWORK PROTECTION SYSTEM & HACKING WEB SERVERS 9Hrs

Routers - Firewall & Honeypots - IDS & IPS - Web Filtering – Vulnerability Assessment & Penetration Testing - Role of Security and Penetration Tester - Penetration Testing Methodology – Session Hijacking - Web Server - SQL Injection - Cross Site Scripting - Buffer Overflow - Email Hacking - Incident Handling & Response -Mobiles Phone Hacking.

#### UNIT V ETHICAL HACKING LAWS

An introduction to the legal, professional and ethical issues - ethical responsibilities - professional integrity - appropriate use of the tools and techniques associated with ethical hacking - Host Reconnaissance - UNIX, LINUX, Microsoft, NOVEL Server.

#### **Total Hours:45**

Ethical Hacking & Network Defense – Michael T. Simpson, Kent Backman, and James E. Corley

#### **REFERENCE BOOKS:**

**TEXT BOOK:**

#### UNIT I **C# AND .NET PLATFORM INTRODUCTION**

**Subject Name** 

C# and .Net Programming

Introduction c# - .Net Architecture -Building blocks of the.net platform-Literals-Variable-Data types-Operators-Checked and unchecked operators-Expressions-Branching-Looping-Methods-Implicit and Explicit casting-Constant- Array-Array classes- Arrary list-String -String Buffer-Structure-Enumeration-Boxing and unboxing.

#### UNIT II **OBJECT ORIENTED ASPECTS OF C#**

Introduction about class and object-Constructors and its types- Inheritance-Properties-Indexers-Index overloading-Operator overloading-Interface-Polymorphism-Delegates-Events handling-Threads

#### **APPLICATION DEVELOPMENT ON .NET UNIT III**

Building Windows Application-Creating our own window form with events and controls-Menu creation-Inherting windows form-SDI and MDI application-dialog box (Modal and Modeless)- Accessing data with ADO.NET-SOL server with ADO.NET-Handling Exceptions-Validating Controls

#### APPLICATION DEVELOPMENT USING WEB BASED **UNIT IV**

Programming web application with web forms - ASP.NET introduction - working with XML and.NET-Creating virtual Directory and Web Application-Session management techniques-Web config-Web service – Passing dataset - Returning datasets from web services

#### UNI

Type discovery – Reflecting on a Ass fying a server with an interface – type Building a server – Building the client – Using single call – Threads.

ED TO BE UNIVERSITY

Subject Code	Subject Name	Ty/Lb/ ETL	L	T/ S.Lr	P/R	С
<b>EBIT22E11</b>	SOCIAL NETWORK ANALYSIS	Ту	3	0/0	0/0	3

#### UNIT I INTRODUCTION

Introduction to Semantic Web: Limitations of current Web - Development of Semantic Web - Emergence of the Social Web - Social Network analysis: Development of Social Network Analysis - Key concepts and measures in network analysis - Electronic sources for network analysis: Electronic discussion networks, Blogs and online communities - Web-based networks - Applications of Social Network Analysis.

UNIT II MODELLING, AGGREGATING AND KNOWLEDGE REPRESENTATION 9Hrs Ontology and their role in the Semantic Web: Ontology-based knowledge Representation - Ontology languages for the Semantic Web: Resource Description Framework - Web Ontology Language - Modelling and aggregating social network data: State-of-the-art in network data representation - Ontological representation of social individuals - Ontological representation of social relationships - Aggregating and reasoning with social network data - Advanced representations.

#### UNIT III EXTRACTION AND MINING COMMUNITIES IN WEB SOCIAL NETWORKS 9 Hrs

Extracting evolution of Web Community from a Series of Web Archive - Detecting communities in social networks - Definition of community - Evaluating communities - Methods for community detection and mining - Applications of community mining algorithms - Tools for detecting communities social network infrastructures and communities - Decentralized online social networks - Multi-Relational characterization of dynamic social network communities.

#### UNIT IV PREDICTING HUMAN BEHAVIOUR AND PRIVACY ISSUES

Understanding and predicting human behaviour for social communities - User data management - Inference and Distribution - Enabling new human experiences - Reality mining - Context - Awareness - Privacy in online social networks - Trust in online environment - Trust models based on subjective logic - Trust network analysis - Trust transitivity analysis - Combining trust and reputation - Trust derivation based on trust comparisons - Attack spectrum and countermeasures.

#### UNIT V VISUALIZATION AND APPLICATIONS OF SOCIAL NETWORKS

Graph theory - Centrality - Clustering - Node-Edge Diagrams - Matrix representation - Visualizing online social networks, Visualizing social networks with matrix-based representations - Matrix and Node-Link Diagrams - Hybrid representations - Applications - Cover networks - Community welfare - Collaboration networks - Co-Citation networks.

#### UNIT I COMMUNICATION

Concept, definition and elements of human communication - Intrapersonal communication - Interpersonal communication - Group Communication - Public Communication - Verbal & Nonverbal communication -Visual Communication - Signs, Symbols & Code systems

#### UNIT II ANIMATION

History of Animation - Animation: Meaning, definition & types - Basic Principles of Animation - Anatomy & Body Language - Introduction to Animation Technologies

#### UNIT III UI & UX Design

Introduction to UX Design - Concepts UI & UX Design - Design Thinking & stages - Divergent and Convergent Thinking - Brainstorming versus Game storming & Observational Empathy

#### **UNIT IV DESIGN**

Principles of Design - Elements of Design - Color Wheel - Primary and Secondary Colors - Black & White -Warm and Cool Colors - Understanding Lights - Lighting and Shading - Visual and Imagery Techniques - Direct & Indirect Approach - Thinking in various point of view

#### **UNIT V PRODUCT DESIGN**

Principles of product design - Types of Products & Solutions -Design Psychology -Strategy of UX Business -Design Thinking Life Cycle - Design thinking, 7 Keys of Design Thinking - Importance of User Research & Iteration - Ideation - Storyboarding & evaluating a prototype

## FACULTY OF ENGINEERING AND TECHNOLOGY

UNIT I	THE RISK MANAGEMENT PROCESS
Introduction to	software risk management, why do we need to manage risk in software

Introduction to software risk management, why do we need to manage risk in software development, Use, Objectives, Risk Management Paradigm, Risk management and litigation. Models for Risk Management.

#### UNIT II DISCOVERING RISK IN SOFTWARE DEVELOPMENT

Risk attributes and Identification, Identifying software risk, Common software project risks, Risk Taxonomy, Risk Mapping, statements, reviews., Risk ownership and stakeholder management.

#### UNIT III **RISK ASSESSMENT**

Objectives and goals. Approach to assessment, Risk assessment tools and techniques, presenting the risk findings.

#### UNIT IV PLANNING RISK MITIGATION STRATEGIES

Risk Planning, Best practices in the risk planning, Risk management tools, Risk mitigation strategies, Formulating and Implementing risk management plans.

#### MONITORING RISK IN SOFTWARE PROJECTS UNIT V

Developing a process for monitoring risk, formulating a project risk database, Managing and tracking risk, Risk support tools. Software Risk Metrics, organization, estimation, development methodology.

**Total Hours: 45**

### FACULTY OF ENGINEERING AND TECHNOLOGY

Subject Code	Subject Name	TyLb / ETL	L	T/ S.Lr	P/R	С
EBIT22E14	INFORMATION SECURITY MANAGEMENT	Ту	3	0/0	0/0	3

### UNIT I INTRODUCTION TO INFORMATION SECURITY AND MANAGEMENT 9 Hrs

Information sensitivity classification-governance-computing environment- security of various components – Management Concepts: traditional management skills and security literacy, managerial skills, redefining Mintzberg's Managerial roles, IS Security management activities- information security management life cycles-security management vs functional management

### UNIT II INFORMATION SECURITY LIFECYCLE

Introduction-Security planning in SLC-Security analysis-security design- security implementation – design-continual security

### UNIT III SECURITY PLAN AND POLICY

Security plan: Development guidelines-security plan methodologies- Policy: security policy, standards and guidelines- security policy methodologies

### UNIT IV SECURITY RISK MANAGEMENT

Introduction- risk management life cycle- preparation efforts- security culture-factors affecting security risk-ALE risk methodology- operational, functional and strategic risks- ABLE methodology

### UNIT V SECURITY DESIGN AND IMPLENTATION

ISO/IEC 27002- Using ISO/IEC 27002 to enhance security- measurement and implementation- general ISMS Framework- ISMS Model and design- integration of ISMS Subsystems-self assessment for compliance- Security solutions: security management, access control, security analysis

### **TEXT BOOK:**

EBIT22E15	TCP/IP DESIGN AND IMPLEMENTATION	Ту	3	0/0	0/0	3

#### UNIT I INTRODUCTION

Protocols and standards-standards organizations-internet standards-internet administration – Protocol layers-OSI model-TCP/IP Protocol suite-addressing.

### UNIT II UNDERLYING TECHNOLOGIES

Wired LANs: IEEE Standards, frame format, addressing, Ethernet evolution, standard Ethernet, fast Ethernet Gigabyte Ethernet, Ten-Gigabyte Ethernet-Wireless LAN- Point-to-Point WANS-Switched WANs-Connecting Devices- Case study – developing simple LAN setup using ns-2 simulator

#### UNIT III IP ADDRESSES AND ROUTING

Switching-network layer services- issues- IPv4 Addresses: Classful addressing, classless addressing, special addresses-delivery-forwarding- IPv4: datagrams, fragmentation, options, checksums, IP package-ARP- RARP-ICMP-IGMP- Case study – Analyzing the trace file using awk and plot graph using xgraph.

#### UNIT IV UNICAST AND MULTICAST ROUTING PROTOCOLS

Unicast routing – intra and inter domain routing – distance vector routing :Routing Information Protocol(RIP) – link state routing: Open Shortest Path First (OSPF) – path vector routing: Border Gateway Protocol (BGP) – Multicasting and Multicast routing protocols - - Case study – Developing a topology using more than two router and analyze the routing.

### UNIT V TCP & UDP

Introduction to Transport Layer – Services – Protocols. UDP – user datagram – UDP services – UDP package – UDP applications. TCP – segment - flow control – error control – congestion control – state transition diagram – TCP package. SCTP – services – features – Case study – Develop a network, attach various type TCP variant and analyze the trace file.

### UNIT I NETWORK LAYER

Network Layer Services: Packet Switching - Implementation connectionless services - Implementation connection-oriented services - Comparison of virtual –Circuit and datagram subnets - IPV4 Address - Forwarding of IP Packets - Internet Protocol - ICMP v4 - Mobile IP

### UNIT II ROUTING ALGORITHMS

Distance Vector routing - Link State Routing - Path Vector Routing – Uni cast Routing Protocol-Internet Structure - Routing Information Protocol - Open-Source Path First - Border Gateway Protocol V4 - Broadcast routing - Multicasting routing -Multicasting Basics- Intra domain Multicast Protocols - IGMP.

### UNIT III PV6 ADDRESSING AND TRANSPORT LAYER

IPv6 Protocol - Transition from IPv4 to IPv6 - Transport Layer Services - Connectionless versus connectionoriented protocols - Transport Layer Protocols: Simple Protocol, Stop and Wait, Go-Back-N, Selective repeat, Piggy Backing. - UDP: User datagram, Services, Applications - TCP: TCP services, TCP features, Segment -TCP connection, Flow control, Error control, Congestion control.

### UNIT IV SCTP

SCTP services: SCTP features, Packet format – SCTP Association: Flow control, Error control -Quality of Services: Flow characteristics, Flow control to improve QOS: Scheduling, Traffic shaping, Resource reservation, Admission control.

### UNIT V APPLICATION LAYER

WWW and HTTP- FTP- Telnet- Domain name system- SNMP- Multimedia data- Multimedia in the Internet.

#### **UNIT – I INTRODUCTION TO WEB MINING**

Introduction to Web Data Mining and Data Mining Foundations, Introduction – World Wide Web (WWW), A Brief History of the Web and the Internet, Web Data Mining-Data Mining, Web Mining. Data Mining Foundations – Association Rules and Sequential Patterns – Basic Concepts of Association Rules, Apriori Algorithm- Frequent Itemset Generation, Association Rule Generation, Data Formats for Association Rule Mining, Mining with multiple minimum supports – Extended Model, Mining Algorithm, Rule Generation, Mining Class Association Rules, Basic Concepts of Sequential Patterns, Mining Sequential Patterns on GSP, Mining Sequential Patterns on PrefixSpan, Generating Rules from Sequential Patterns.

#### **UNIT – II LEARNING ALGORITHMS**

Supervised and Unsupervised Learning Supervised Learning – Basic Concepts, Decision Tree Induction – Learning Algorithm, Impurity Function, Handling of Continuous Attributes, Classifier Evaluation, Rule Induction – Sequential Covering, Rule Learning, Classification Based on Associations, Naïve Bayesian Classification , Naïve Bayesian Text Classification – Probabilistic Framework, Naïve Bayesian Model . Unsupervised Learning – Basic Concepts , K-means Clustering – K-means Algorithm, Representation of Clusters, Hierarchical Clustering – Single link method, Complete link Method, Average link method, Strength and Weakness.

#### **UNIT – III INFORMATION RETRIEVAL**

Information Retrieval and Web Search: Basic Concepts of Information Retrieval, Information Retrieval Methods – Boolean Model, Vector Space Model and Statistical Language Model, Relevance Feedback, Evaluation Measures, Text and Web Page Preprocessing – Stopword Removal, Stemming, Web Page Preprocessing, Duplicate, Detection, Inverted Index and Its Compression – Inverted Index, Search using Inverted Index, Index Construction, Index Compression, Latent Semantic Indexing – Singular Value Decomposition, Query and Retrieval, Web Search, Meta Search, Web Spamming.

#### UNIT -IV LINK ANALYSIS AND WEB CRAWLING

Link Analysis and Web Crawling: Link Analysis – Social Network Analysis, Co-Citation and Bibliographic Coupling, Page Rank Algorithm, HITS Algorithm, Community Discovery-Problem Definition, Bipartite Core Communities, Maximum Flow Communities, Email Communities. Web Crawling – A Basic Crawler Algorithm- Breadth First Crawlers, Preferential Crawlers, Implementation Issues – Fetching, Parsing, Stopword Removal, Link Extraction, Spider Traps, Page Repository, Universal Crawlers, Focused Crawlers, Topical Crawlers, Crawler Ethics and Conflicts.

#### **UNIT - V: OPINION MINING AND WEB USAGE MINING**

Opinion Mining – Sentiment Classification – Classification based on Sentiment Phrases, Classification Using Text Classification Methods, Feature based Opinion Mining and Summarization – Problem Definition, Object feature extraction, Feature Extraction from Pros and Cons of Format1, Feature Extraction from Reviews of Format 2 and 3, Comparative Sentence and Relation Mining, Opinion Search and Opinion Spam. Web Usage Mining – Data Collection and Preprocessing-Sources and Types of Data, Key Elements of Web usage Data Preprocessing, Data Modeling for Web Usage Mining, Discovery and Analysis of Web usage Patterns -Session and Visitor Analysis, Cluster Analysis and Visitor Segmentation, Association and Correlation Analysis, Analysis of Sequential and Navigation Patterns.

#### **Total Hours: 45**

#### **TEXT BOOK:**

**1.** Web Data Mining: Exploring Hyperlinks, Contents, and Usage Data by Bing Liu (Springer Publications) **REFERENCES BOOKS**:

- 1. Data Mining: Concepts and Techniques, Second Edition Jiawei Han, Micheline Kamber (Elsevier Publications)
- 2. Web Mining: Applications and Techniques by Anthony Scime

### FACULTY OF ENGINEERING AND TECHNOLOGY

SUBJECT CODE	SUBJECT NAME	Ty/ Lb/ ETL	L	T/ S.Lr	P/R	С
EBIT22E19	DATA SCIENCE AND BIG DATA ANALYTICS	Ту	3	0/0	0/0	3

#### UNIT I INTRODUCTION

Big data overview - State of the practice in analytics, BI vs data science, current analytical architecture, drivers of big data - Big data ecosystem - **Data analytics lifecycle -** overview – Discovery Phase - Data preparation Phase - Model Planning Phase - Model building Phase - Communicate results Phase - Operationalization Phase.

### UNIT II BASIC DATA ANALYTIC METHODS USING R

Introduction to R, R Graphical User interfaces, Data import and export, Attribute and data types, descriptive statistics - Exploratory data analysis, visualization data analysis, dirty data, visualizing a single variable, examining multiple variables, data exploration vs presentation, - Statistical methods for evaluation, Hypothesis testing, Difference of Means, Wilcoxon Rank-sum test, Type I and II errors, power and sample size, ANOVA

#### UNIT III ADVANCED ANALYTICAL THEORY & METHODS (CLUSTERING, ASSOCIATION RULES AND REGRESSION 9Hrs

Clustering- k-means, use cases, determining the number of clusters, diagnostics, Reasons to choose and cautions, additional algorithms - Association rules- Apriori algorithm, Evaluation of candidate rules, Application of association rules, an example- transactions in a grocery store, the groceries dataset, frequent itemset generation, rule generation and visualization, validation and testing, diagnostics - Regression- linear and logistic regression, usecases, model description, diagnostics – Additional Regression Models

#### UNIT IV ADVANCED ANALYTICAL THEORY & METHODS (CLASSIFICATION, TIME SERIES ANALYSIS AND TEXT ANALYSIS) 9 Hrs

Classification - Decision Trees, general algorithm, evaluating a decision tree, Decision trees in R - Naive Bayes - Bayes theorem, Naive Bayes classifier, Smoothing, diagnostics, Additional Classification Methods - Time Series Analysis- Box-Jenkins Methodology, ARIMA Model, Auto correlation Function(ACF), Auto regressive models, moving average models, ARMA and ARIMA Models, building and evaluating a ARIMA Model - Text Analysis- collecting raw text, representing text, term frequency-Inverse document frequency(TFIDF), Categorizing documents by topics, determining sentiments, gaining insights

#### UNIT V ADVANCED ANALYTICS-TECHNOLOGY AND TOOLS: MAPREDUCE AND HADOOP 9Hrs

Analytics for unstructured data, usecases, Mapreduce, Apache Hadoop - The Hadoop Ecosystem - Pig, Hive, HBase, Mahout, NoSQL - **In-database analytics** - SQL Essentials, Joins, Set operations, Grouping extensions, In-Database text analytics, Advanced SQL, Window functions, User-defined functions and aggregates, Ordered Aggregates, MADlib.

### **Total Hours: 45**

Subject Code	Subject Name	Ty/Lb/ ETL	L	T/ S.Lr	P/R	С
EBIT22E20	SOFTWARE QUALITY MANAGEMENT	Ту	3	0/0	0/0	3

#### UNIT I INTRODUCTION TO SOFTWARE QUALITY

Software Quality – Hierarchical models of Boehm and McCall – Quality measurement – Metrics measurement and analysis – Gilb's approach – GQM Model

### UNIT II SOFTWARE QUALITY ASSURANCE

Quality tasks – SQA plan – Teams – Characteristics – Implementation – Documentation – Reviews and Audits

### UNIT III QUALITY CONTROL AND RELIABILITY

Tools for Quality – Ishikawa's basic tools – CASE tools – Defect prevention and removal – Reliability models – Rayleigh model – Reliability growth models for quality assessment

#### UNIT IV QUALITY MANAGEMENT SYSTEM

Elements of QMS – Rayleigh model framework – Reliability Growth models for QMS – Complexity metrics and models – Customer satisfaction analysis.

#### UNIT V QUALITY STANDARDS

Need for standards – ISO 9000 Series – ISO 9000-3 for software development – CMM and CMMI – Six Sigma concepts.

Subject Code	Subject Name	Ty/Lb/ ETL	L	T/ S.Lr	P/R	С
EBIT22E21	SOFTWARE PROJECT MANAGEMENT	Ту	3	0/0	0/0	3

#### UNIT I: INTRODUCTION AND SOFTWARE PROJECT PLANNING

Fundamentals of Software Project Management (SPM), Need Identification, Vision and Scope document, Project Management Cycle, SPM Objectives, Management Spectrum, SPM Framework, Software Project Planning, Planning Objectives, Project Plan, Types of project plan, Structure of a Software Project Management Plan, Software project estimation, Estimation methods, Estimation models, Decision process.

#### UNIT II: PROJECT ORGANIZATION AND SCHEDULING

Project Elements, Work Breakdown Structure (WBS), Types of WBS, Functions, Activities and Tasks, Project Life Cycle and Product Life Cycle, Ways to Organize Personnel, Project schedule, Scheduling Objectives, Building the project schedule, Scheduling terminology and techniques, Network Diagrams: PERT, CPM, Bar Charts: Milestone Charts, Gantt Charts.

#### UNIT III: PROJECT MONITORING AND CONTROL

Dimensions of Project Monitoring & Control, Earned Value Analysis, Earned Value Indicators: 23 Budgeted Cost for Work Scheduled (BCWS), Cost Variance (CV), Schedule Variance (SV), Cost Performance Index (CPI), Schedule Performance Index (SPI), Interpretation of Earned Value Indicators, Error Tracking, Software Reviews, Types of Review: Inspections, Deskchecks, Walk through, Code Reviews, Pair Programming.

### UNIT IV: SOFTWARE QUALITY ASSURANCE AND TESTING

Testing Objectives, Testing Principles, Test Plans, Test Cases, Types of Testing, Levels of Testing, Test Strategies, Program Correctness, Program Verification & validation, Testing Automation & Testing Tools, Concept of Software Quality, Software Quality Attributes, Software Quality Metrics and Indicators, The SEI Capability Maturity Model CMM), SQA Activities, Formal SQA Approaches: Proof of correctness, Statistical quality assurance, Clean room process.

### UNIT V: PROJECT MANAGEMENT AND PROJECT MANAGEMENT TOOLS 9 Hrs

Software Configuration Management: Software Configuration Items and tasks, Baselines, Plan for Change, Change Control, Change Requests Management, Version Control, Risk Management: Risks and risk types, Risk Breakdown Structure (RBS), Risk Management Process: Risk identification, Risk analysis, Risk planning, Risk monitoring, Cost Benefit Analysis, Software Project Management Tools: CASE Tools, Planning and Scheduling Tools, MS-Project.

### TEXT BOOKS

1. "Project Management: The Managerial Process with MS" – Clifford F. Gray and Erik W. Larson, Mc Graw Hill

#### UNIT I INTRODUCTION

Learning Problems – Perspectives and Issues – Concept Learning – Version Spaces and Candidate Eliminations – Inductive bias – Decision Tree learning – Representation – Algorithm – Heuristic Space Search.

#### UNIT II NEURAL NETWORKS AND GENETIC ALGORITHMS

Neural Network Representation – Problems – Perceptrons – Multilayer Networks and Back Propagation Algorithms – Advanced Topics – Genetic Algorithms – Hypothesis Space Search – Genetic Programming – Models of Evaluation and Learning.

### UNIT III BAYESIAN AND COMPUTATIONAL LEARNING

Bayes Theorem – Concept Learning – Maximum Likelihood – Minimum Description Length Principle – Bayes Optimal Classifier – Gibbs Algorithm – Naïve Bayes Classifier – Bayesian Belief Network – EM Algorithm – Probability Learning – Sample Complexity – Finite and Infinite Hypothesis Spaces – Mistake Bound Model.

### UNIT IV INSTANT BASED LEARNING

K- Nearest Neighbour Learning – Locally weighted Regression – Radial Basis Functions – Case Based Learning.

### UNIT V ADVANCED LEARNING

Learning Sets of Rules – Sequential Covering Algorithm – Learning Rule Set – First Order Rules – Sets of First Order Rules – Induction on Inverted Deduction – Inverting Resolution – Analytical Learning – Perfect Domain Theories – Explanation Base Learning – FOCL Algorithm – Reinforcement Learning – Task – Q-Learning – Temporal Difference Learning

SUBJECT CODE	SUBJECT NAME	Ty/ Lb/ ETL	L	T/ S.Lr	P/R	С
EBIT22E23	CYBER FORENSICS AND INTERNET SECURITY	Ту	3	0/0	0/0	3

#### **UNIT I CYBER FORENSICS FUNDAMENTALS**

Introduction to Cyber forensics: Information Security Investigations, Corporate Cyber Forensics, Scientific method in forensic analysis, investigating large scale Data breach cases. Analyzing Malicious software.

#### UNIT II COMPUTER FORENSICS TECHNOLOGY

Types of Computer Forensics Technology, Types of Military Computer Forensic Technology, Types of Law Enforcement: Computer Forensic Technology, Types of Business Computer Forensic Technology, Specialized Forensics Techniques, Hidden Data and How to Find It, Spyware and Adware, Encryption Methods and Vulnerabilities, Protecting Data from Being Compromised Internet Tracing Methods, Security and Wireless Technologies, Avoiding Pitfalls with Firewalls Biometric Security Systems

#### **UNIT III COMPUTER FORENSICS SYSTEMS**

Internet Security Systems, Intrusion Detection Systems, Firewall Security Systems, Storage Area Network Security Systems, Network Disaster Recovery Systems, Public Key Infrastructure Systems, Wireless Network Security Systems, Satellite Encryption Security Systems, Instant Messaging (IM) Security Systems, Net Privacy Systems, Identity Management Security Systems, Identity Theft, Biometric Security Systems

#### UNIT IV NETWORK SECURITY TECHNIQUES

Network Security Applications, Authentication Mechanisms: Passwords, Cryptographic authentication protocol, Smart Card, Biometrics, Digital Signatures and seals, Kerberos, X.509 LDAP, Directory. Web Security: SSL Encryption, TLS, SET

#### UNIT V CASE STUDY

E-mail Security, Pretty Good Privacy (PGPs) / MIME, IP Security, Access and System Security, Intruders, Intrusion Detection and Prevention, Firewall, Hardware Firewall, Software Firewall, Application Firewall, Packet Filtering, Packet Analysis, Proxy Servers, Firewall setting in Proxy, ACL in Proxy.

#### Total Hours: 45

### **UNIT I INTRODUCTION - MOTIVATION**

Basic Concepts - Practical Issues - Retrieval Process - Architecture - Boolean Retrieval - Retrieval Evaluation - Open Source IR Systems-History of Web Search - Web Characteristics- The impact of the web on IR —IR Versus Web Search–Components of a Search engine.

### UNIT II MODELING

Taxonomy and Characterization of IR Models – Boolean Model – Vector Model - Term Weighting – Scoring and Ranking – Language Models – Set Theoretic Models - Probabilistic Models – Algebraic Models – Structured Text Retrieval Models – Models for Browsing.

### UNIT III TEXT CLASSIFICATION AND CLUSTERING

A Characterization of Text Classification – Unsupervised Algorithms: Clustering – Naïve Text Classification - Supervised Algorithms - Decision Tree - k-NN Classifier - SVM Classifier - Feature Selection or Dimensionality Reduction – Evaluation metrics – Accuracy and Error – Organizing the classes – Indexing and Searching – Inverted Indexes – Sequential Searching – Multi-dimensional Indexing.

### UNIT IV WEB RETRIEVAL AND WEB CRAWLING

The Web – Search Engine Architectures – Cluster based Architecture – Distributed Architectures – Search Engine Ranking – Link based Ranking – Simple Ranking Functions – Learning to Rank – Evaluations – Search Engine Ranking – Search Engine User Interaction – Browsing – Applications of a Web Crawler – Taxonomy – Architecture and Implementation – Scheduling Algorithms – Evaluation.

### UNIT V RECOMMENDER SYSTEM

Recommender Systems Functions - Data and Knowledge Sources - Recommendation Techniques - Basics of Content-based Recommender Systems - High Level Architecture - Advantages and Drawbacks of Contentbased Filtering – Collaborative Filtering – Matrix factorization models – Neighborhood models.

### UNIT -I INTRODUCTION TO NLP

What is NLP? Why NLP is Difficult? History of NLP, Advantages of NLP, Disadvantages of NLP, Components of NLP, Applications of NLP, How to build an NLP pipeline? Phases of NLP, NLP APIs, NLP Libraries.

### UNIT –II LANGUAGE MODELING AND PART OF SPEECH TAGGING

Unigram Language Model, Bigram, Trigram, N-gram, Advanced smoothing for language modeling, Empirical Comparison of Smoothing Techniques, Applications of Language Modeling, Natural Language Generation, Parts of Speech Tagging, Morphology, Named Entity Recognition.

### UNIT –III WORDS AND WORD FORMS

Bag of words, skip-gram, Continuous Bag-Of-Words, Embedding representations for words Lexical Semantics, Word Sense Disambiguation, Knowledge Based and Supervised Word Sense Disambiguation.

### UNIT -IV TEXT ANALYSIS, SUMMARIZATION AND EXTRACTION

Sentiment Mining, Text Classification, Text Summarization, Information Extraction, Named Entity Recognition, Relation Extraction, Question Answering in Multilingual Setting; NLP in Information Retrieval, Cross-Lingual IR.

### UNIT -V MACHINE TRANSLATION

Need of MT, Problems of Machine Translation, MT Approaches, Direct Machine Translations, Rule-Based Machine Translation, Knowledge Based MT System, Statistical Machine Translation (SMT), Parameter learning in SMT (IBM models) using EM), Encoder-decoder architecture, Neural Machine Translation.

### **REFERENCE BOOKS:**

1. Speech and Language Processing: An Introduction to Natural Language Processing, Computational Linguistics and Speech Recognition Jurafsky, David, and James H. Martin, PEARSON

2. Foundations of Statistical Natural Language Processing, Manning, Christopher D., and Hinrich Schütze,

Cambridge, MA: MIT Press .

3. Natural Language Understanding, James Allen. The Benjamin/Cummings Publishing Company Inc..

4. Natural Language Processing with Python – Analyzing Text with the Natural Language ToolkitSteven Bird,

Ewan Klein, and Edward Loper

Subject Code	Subject Name	Ty/ Lb/ ETL	L	T/ S.Lr	P/R	С
EBIT22E41	BLOCK CHAIN TECHNOLOGIES	Ту	3	0/0	0/0	3

### UNITI INTRODUCTION TO BLOCKCHAIN

Blockchain- Public Ledgers, Blockchain as Public Ledgers -Bitcoin, Blockchain 2.0, Smart Contracts, Block in a Blockchain, Transactions-Distributed Consensus, The Chain and the Longest Chain - Cryptocurrency to Blockchain 2.0 - Permissioned Model of Blockchain, Cryptographic -Hash Function, Properties of a hash function-Hash pointer and Merkle tree

### UNITII BITCOIN AND CRYPTOCURRENCY

A basic crypto currency, Creation of coins, Payments and double spending, FORTH – the precursor for Bitcoin scripting, Bitcoin Scripts, Bitcoin blocks, Bitcoin P2P Network, Transaction in Bitcoin Network, Block Mining, Block propagation and block relay, Consensus introduction, Distributed consensus in open environments-Consensus in a Bitcoin network

### UNITIII BITCOIN CONSENSUS

Bitcoin Consensus, Proof of Work (PoW)- HashcashPoW, Bitcoin PoW, Attacks on PoW, monopoly problem- Proof of Stake- Proof of Burn - Proof of Elapsed Time - Bitcoin Miner, Mining Difficulty, Mining Pool-Permissioned model and use cases, Design issues for Permissioned Blockchains, Execute contracts-Consensus models for permissioned blockchain-Distributed consensus in closed environment Paxos.

### UNITIV DISTRIBUTED CONSENSUS

RAFT Consensus-Byzantine general problem, Byzantine fault tolerant system-Agreement Protocol, Lamport-Shostak-Pease BFT Algorithm-BFT over Asynchronous systems, Practical Byzantine Fault Tolerance

### UNIT V HYPER LEDGER FABRIC & ETHERUM

Architecture of Hyperledger fabric v1.1-Introduction to hyperledger fabric v1.1, chain code- Ethereum: Ethereum network, EVM, Transaction fee, Mist Browser, Ether, Gas, Solidity, Smart contracts, Truffle Design and issue Crypto currency, Mining, DApps, DAO Blockchain Applications Internet of Things-Medical Record Management System-Blockchain in Government and Blockchain Security-Blockchain Use Cases –Finance

Subject Code	Subject Name	Ty/ Lb/ ETL	L	T/ S.Lr	P/R	С
EBIT22E26	ROBOTICS	Ту	3	0/0	0/0	3

### UNITI BASIC CONCEPTS

Brief history- Types of Robot – Technology-Robot classifications and specifications-Design and control issues-Various manipulators – Sensors - work cell - Programming languages.

### UNITII DIRECT AND INVERSE KINEMATICS

Mathematical representation of Robots - Position and orientation – Homogeneous transformation- Various joints- Representation using the DenavitHattenberg parameters -Degrees of freedom-Direct kinematics-Inverse kinematics- SCARA robots- Solvability – Solution methods-Closed form solution.

### UNITIII MANIPULATOR DIFFERENTIAL MOTION AND STATICS

Linear and angular velocities-Manipulator Jacobian-Prismatic and rotary joints-Inverse -Wrist and arm singularity - Static analysis - Force and moment Balance.

### UNIT IV PATH PLANNING

Definition-Joint space technique-Use of p-degree polynomial-Cubic polynomial-Cartesian space technique -Parametric descriptions - Straight line and circular paths - Position and orientation planning.

### UNIT V DYNAMICS AND CONTROL

Lagrangian mechanics-2DOF Manipulator-Lagrange Euler formulation-Dynamic model -Manipulator control problem-Linear control schemes-PID control scheme-Force control of robotic manipulator.

### UNIT I INTRODUCTION

Subject Code

**EBIT22E27** 

Introduction: Definition – Relation to computer system components – Motivation – Relation to parallel systems – Messagepassing systems versus shared memory systems --Primitives for distributed communication --Synchronous versus asynchronous executions - Design issues and challenges. A model of distributed computations: A distributed program - A model of distributed executions -Models of communication networks -Global state - Cuts -Past and future cones of an event -Models of process communications. Logical Time: A framework for a system of logical clocks -Scalar time -Vector time - Physical clock synchronization: NTP.

### UNIT II MESSAGE ORDERING & SNAPSHOTS

Message ordering and group communication: Message ordering paradigms -Asynchronous execution with synchronous communication – Synchronous program order on an asynchronous system – Group communication – Causal order (CO) -Total order. Global state and snapshot recording algorithms: Introduction -System model and definitions -Snapshot algorithms for FIFO channels

### UNIT III DISTRIBUTED MUTEX & DEADLOCK

Distributed mutual exclusion algorithms: Introduction - Preliminaries - Lamport's algorithm - Ricart-Agrawala algorithm - Maekawa's algorithm - Suzuki-Kasami's broadcast algorithm. Deadlock detection in distributed systems: Introduction - System model - Preliminaries - Models of deadlocks - Knapp's classification - Algorithms for the single resource model, the AND model and the OR model.

### UNIT IV RECOVERY & CONSENSUS

Check pointing and rollback recovery: Introduction - Background and definitions - Issues in failure recovery - Checkpointbased recovery – Log-based rollback recovery – Coordinated checkpointing algorithm – Algorithm for asynchronous checkpointing and recovery. Consensus and agreement algorithms: Problem definition - Overview of results - Agreement in a failure - free system - Agreement in synchronous systems with failures.

### UNIT V P2P & DISTRIBUTED SHARED MEMORY

Peer-to-peer computing and overlay graphs: Introduction – Data indexing and overlays – Chord – Content addressable networks - Tapestry. Distributed shared memory: Abstraction and advantages - Memory consistency models - Shared memory Mutual Exclusion.

Ty/ Lb/

ETL

EDI I 22E20	ARTIFICIAL NEURAL NETWORKS	Ту	3	ĺ
				ĺ
		L		L

Subject

Name

#### **UNIT I: INTRODUCTION TO NEURAL NETWORKS**

History of Neural Networks, Structure and Functions of Biological Neuron and Artificial Neuron Models, Neural Network Architectures, Characteristics of ANN, Basic Learning Laws and Methods.

### UNIT II: BACK PROPAGATION NETWORKS

**Subject Code** 

EDITATEA

Architecture of feed forward network, single layer ANN, multilayer perceptron, back propagation learning, input - hidden and output layer computation, back propagation algorithm, applications, selection of tuning parameters in back propagation network, Numbers of hidden nodes, learning

### UNIT III: COMPETITIVE LEARNING NEURAL NETWORKS

Components of Competitive Learning network pattern cluster structure, vector quantization, Adaptive Resonance Theory networks, Simplified ART Architecture, Features of ART models, character recognition using ART network.

#### **UNIT IV: ASSOCIATIVE MEMORIES**

General Concepts of Associative Memory, Auto Associative Memory, Bi–directional Associative Memory, Hopfield memory, Iterative Auto Associative Memory Networks, Temporal Associative Memory Network.

#### UNIT V: APPLICATIONS OF ARTIFICIAL NEURAL NETWORKS

Pattern classification – Recognition of Olympic games symbols, Recognition of printed Characters. Neocognitron – Recognition of handwritten characters. NET Talk: to convert English text to speech. Recognition of consonant vowel (CV) segments, texture classification and segmentation

EBIT22E29	GREEN COMPUTING	Ту	3	0/0	0/0	3

#### UNIT I **FUNDAMENTALS**

Green IT Fundamentals: Business, IT, and the Environment – Green computing: carbon foot print, scoop on power – Green IT Strategies: Drivers, Dimensions, and Goals – Environmentally Responsible Business: Policies, Practices, and Metrics.

#### **GREEN ASSETS AND MODELING** UNIT II

Green Assets: Buildings, Data Centers, Networks, and Devices - Green Business Process Management: Modeling, Optimization, and Collaboration – Green Enterprise Architecture – Green Supply Chains – Green Information Systems: Design and Development Models.

#### UNIT III **GRID FRAMEWORK**

Virtualization of IT systems – Role of electric utilities, Telecommuting, teleconferencing and teleporting – Materials recycling – Best ways for Green PC – Green Data center – Green Grid framework.

#### **UNIT IV GREEN COMPLIANCE**

Socio-cultural aspects of Green IT – Green Enterprise Transformation Roadmap – Green Compliance: Protocols, Standards, and Audits - Emergent Carbon Issues: Technologies and Future.

#### UNIT V **CASE STUDIES**

The Environmentally Responsible Business Strategies (ERBS) – Case Study Scenarios for Trial Runs – Case Studies – Applying Green IT Strategies and Applications to a Home, Hospital.

## FACULTY OF ENGINEERING AND TECHNOLOGY

Subject Code	Subject Name	Ty/ Lb/ ETL	L	T/ S.Lr	P/R	С
EBIT22E30	Service Oriented Architecture	Ту	3	0/0	0/0	3

#### UNIT I XML

XML document structure – Well-formed and valid documents – DTD – XML Schema – Parsing XML using DOM, SAX – XPath – XML Transformation and XSL – Xquery.

#### UNIT II SERVICE ORIENTED ARCHITECTURE (SOA) BASICS

Characteristics of SOA, Benefits of SOA, Comparing SOA with Client-Server and Distributed architectures – Principles of Service Orientation – Service layers

### UNIT III WEB SERVICES (WS) AND STANDARDS

Web Services Platform – Service descriptions – WSDL – Messaging with SOAP – Service discovery – UDDI – Service-Level Interaction Patterns – Orchestration and Choreography

#### UNIT IV WEB SERVICES EXTENSIONS

WS-Addressing – WS-Reliable Messaging – WS-Policy – WS-Coordination – WS - Transactions – WS-Security – Examples

#### UNIT V SERVICE ORIENTED ANALYSIS AND DESIGN

SOA delivery strategies – Service oriented analysis – Service Modelling – Service oriented design – Standards and composition guidelines — Service design – Business process design – Case Study

#### **BOOKS:**

 Thomas Erl, "Service Oriented Architecture: Concepts, Technology, and Design", Pearson education.
 Service-Oriented Computing: Semantics, Processes, Agents, Munindar P. Singh and Michael N. Huhns, John Wiley & Sons, Ltd., 2005

## FACULTY OF ENGINEERING AND TECHNOLOGY

Subject Code	Subject Name	Ty/Lb/ ETL	L	T/ S.Lr	P/R	С
FRE177837	FOUNDATIONS OF PARALLEL PROGRAMMING	Ту	3	0/0	0/0	3

#### UNIT I CONCURRENT PROGRAMMING CONCEPTS

**Concurrent programming concepts,** Techniques for parallelizing programs, Shared Variable Programming: Process and Synchronisation - Synchronization, atomic actions, and await statements, Semantics of concurrent programs; ways to avoid interference, Safety and liveness properties; Critical sections: spin locks , efficient spin locks; fair solutions , Parallel programming concepts; bag of tasks paradigm; Pthreads library , Barriers: counter, coordinator, combining tree , Symmetric barriers; data parallel algorithms , Parallel scientific computing

#### UNIT II SEMAPHORES AND MONITOR

**Semaphores:** mutual exclusion, signaling, split binary, resource counting, dining philosophers, readers/writers, passing the baton, resource allocation and scheduling, Implementations of Semaphores in kernels, multiprocessors;

**Monitors:** basic concepts, signaling disciplines, synchronization techniques, larger examples; use in Java, Pthreads, Implementation of Monitors in Kernel

### UNIT III MESSAGE PASSING AND RMI

**Message passing**: basic concepts and examples , clients and servers , file servers, interacting peers, Synchronous, Message passing in MPI, and Java; **Remote operations**; RPC; Java RMI , **Rendezvous, distributed readers and writers** 

#### UNIT IV PROCESS INTERACTION AND DISTRIBUTED PROGRAMMING 9Hrs

**Process interaction Paradigms**: Managers/Workers, heartbeat algorithms; pipeline algorithms, Probe/Echo Algorithm, Broadcast Algorithm, Token Passing Algorithms - **Distributed programming**: replicated files, dining philosophers, distributed file systems

#### UNIT V PARALLEL PROGRAMMING

Speed and Efficiency, Overhead and Challenges – Scientific Computing : Grid Computations, Particle Computations, Matrix Computations – Case Study of Parallel Programming Libraries in Pthread, MPI and OpenMP – Parallelizing Compilers – Other Parallel Programming Models – Parallel Programming Tools Total Hours: 45

### **TEXT BOOK:**

1. Greg Andrews ,2000, Foundations of Multithreaded, Parallel, and Distributed Programming. Addison-Wesley, Digitized in 16 Nov 2007, ISBN 0201357526, 9780201357523

## **REFERENCE BOOK:**

EBIT22E33	HADOOP AND BIG DATA TECHNOLOGY	Ту	3	0/0	0/0	3

#### UNIT I **HADOOP INTRODUCTION**

Distributed and parallel computing - HDFS and MapReduce – Hadoop function – cloud deployment and delivery model - In memory computing technology - Hadoop ecosystem - Hadoop distributed file system -HDFS architecture – HDFS files – HDFS high availability – Hadoop YARN – Hbase and HDFS – Hive – Pig – Sqoop – ZooKeeper – Flume – Oozie.

#### MAPREDUCE, HBASE AND BIG DATA TECHNOLOGY UNIT II

MapReduce framework – optimize MapReduce job – roles of HBase in Big Data Processing. Big Data stack – Virtualization and Big Data – Virtualization Approaches – CAP Theorem – non-relational database – polyglot persistence – Big Data analytics and Data warehouse – simple MapReduce application – designing MapReduce.

#### **UNIT III** YARN AND HIVE

Background of YARN - Advantages - Architecture -schedulers - configurations - commands - YARN containers – Registry – Hive Services – data types – built in functions – Hive DDL – data manipulation in Hive - Data retrieval Queries - using JOINS in Hive.

#### UNIT IV **PIG AND OOZIE**

Pig architecture – running Pig – Pig Latin – working with operators in Pig – Debugging Pig – functions in pig – Error Handling in Pig – Oozie – benefits – configuration – Oozie workflow – Oozie coordinator – Oozie bundle - Oozie parameterization - Oozie job execution model - Oozie SLA.

#### UNIT V NOSQL, FLUME AND SQOOP

Characteristics of NoSQL - Types of NoSQL data Models - Schema less databases - materialized view distribution models – sharding – Flume – Flume Architecture – Sqoop – importing data – Mahout – machine learning – collaborative filtering – clustering – classification – Mahout algorithms – Environment for Mahout **Total Hours: 45** 

#### **TEXT BOOKS:**

EBIT22E	4 DIGITAL MARKETING TECHNIQUES	Ту	3	0/0	0/0	3

#### UNIT I INTRODUCTION

Digital-Marketing Past, Present & Future – Digital-Marketing Landscape, Digital-marketing's Past - Web 1.0, Digital Marketing Present - Web 2.0, Future -Web 3.0, Strategic Digital-Marketing and Performance Metrics – E-Business Models, Performance Metrics Inform Strategy, Balanced Scorecard, Social Media Performance Metrics.

#### UNIT II DIGITAL MARKETING PLAN

Process, Creating a Digital-Marketing Plan, Seven Steps – Situation Analysis, Strategic Planning, Objectives, Digital-Marketing Strategies, Implementation plan, Budget, Evaluation.

#### UNIT III GLOBAL E-MARKETS

Overview of Global Digital-Marketing Issues, Country and Market Opportunity Analysis, Technological Tipping Points, Wireless Internet Access: Mobile Phones, The Digital divide, Building Inclusive Digital markets, Social Networking, Ethical and Legal Issues: Overview, Privacy, Digital Property, Online Expression, Emerging issues.

#### UNIT IV DIGITAL-MARKETING MANAGEMENT

Product: The Online Offer – Creating customer value online, Product Benefits, Digital Marketing enhanced product development, Price: Buyer and Seller Perspectives, Payment options, Pricing Strategies; Internet for Distribution: Distribution Channel Overview, Online Channel Intermediaries, Distribution Channel Metrics, Digital Marketing Communication – Owned Media, Paid media, Earned Media.

#### UNIT V DIGITAL MARKETING COMMUNICATION

Digital marketing communication: Owned Media, Content Marketing, Sales Promotion Offers, Paid Media, Social Media Advertising, Mobile Advertising, Earned Media: Engaging Individuals to Produce Earned Media, Techniques for Engaging Users, Customer Relationship Management, Three Pillars of Relationship Marketing, CRM Benefits, CRM Building Blocks.

EBIT22E35 PERVASIVE COMPUTING	Ту	3	0/0	0/0	3

#### UNIT I PERVASIVE COMPUTING CONCEPTS

Perspectives of Pervasive Computing, Challenges, Technology; The Structure and Elements of Pervasive Computing Systems: Infrastructure and Devices, Middleware for Pervasive Computing Systems, Pervasive Computing Environments.

#### UNIT II RESOURCE MANAGEMENT IN PERVASIVE COMPUTING

Context Collection, User Tracking, and Context Reasoning; Resource Management in Pervasive Computing: Efficient Resource Allocation in Pervasive Environments, Transparent Task Migration, Implementation and Illustrations.

#### UNIT III HCI INTERFACE IN PERVASIVE ENVIRONMENTS

HCI Service and Interaction Migration, Context- Driven HCI Service Selection, Scenario Study: Video Calls at a Smart Office, A Web Service– Based HCI Migration Framework.

#### UNIT IV PERVASIVE MOBILE TRANSACTIONS:

Mobile Transaction Framework, Context-Aware Pervasive Transaction Model, Dynamic Transaction Management, Formal Transaction Verification, Evaluations.

#### UNIT V CASE STUDIES

Case Studies: iCampus Prototype, IPSpace: An IPv6-Enabled Intelligent Space.

#### **TEXT BOOK:**

- 1. Minyi Guo, Jingyu Zhou, Feilong Tang, Yao Shen ,"Pervasive Computing: Concepts, Technologies and Applications", CRC Press, 2016.
- 2. Obaidat, Mohammad S., Mieso Denko, and Isaac Woungang, eds. Pervasive computing and networking. John Wiley & Sons, 2011.

# FACULTY OF ENGINEERING AND TECHNOLOGY

Subject Code	Subject Name	Ty/Lb/ ETL	L	T/ S.Lr	P/R	С
EBIT22E36	WEARABLE COMPUTING	Ту	3	0/0	0/0	3

#### UNIT I INTRODUCTION TO WEARABLE TECHNOLOGIES

Fundamentals of Wearable Technologies - History of wearable Technologies - User Experience Design for Internet of Things - Social Aspects of Wearability - Internet of Things - Applications - Wearable Chemical and Biochemical Sensors - Technology of Connected Devices - Device Types, Sensors, Actuators.

#### UNIT II WEARABLE COMPUTING APPLICATIONS

Medical Applications of Wearable Technologies - Wearable Technologies - Energy Expenditure and Energy Harvesting - Technology of Connected Devices - Energy Considerations - Flexible Electronics and Textiles for Wearable Technologies.

#### UNIT III WEARABLE COMPUTING ARCHITECHTURE

Wearable Algorithms - Web of Things - Architecture Standardization- Data Mining for Body Sensor Network - Internet of Things – Embedded Device UX Design

#### UNIT IV **COMMUNICATION TECHNOLOGIES**

Physical Activity Modeling and Behavior Change - Internet of Things – Interface and Interaction Design -Human Body Communication for a Data Rate Sensor Network. Internet of Things - Networking. - Wireless Body Area Networks - Wearable computing as a form of urban design

#### UNIT V WEARABLE COMPUTING CASE STUDIES

Wearable Sensors for Monitoring of Physical and Physiological Changes and for Early Detection of Diseases -Wearable and Non-Invasive Assistive Technologies.

#### **Total Hours: 45**

#### **TEXT BOOKS:**

- "Practical Electronics for Inventors, Third Edition," by Paul ScherzandSimon Monk. 2016 1.
- 2. Intel Galileo and Intel Galileo Gen 2API Features and Arduino Projects for Linux Programmers, Ramon, Manoel 2014 (Open Access)

#### **REFERENCE BOOKS:**

- 1. Fundamentals of Wearable Computers and Augmented Reality, Second Edition by Woodrow Barfield 2015
- 2. Making Sense of Sensors: End-to-End Algorithms and Infrastructure Design by Omesh Tickoo, Ravi Iyer 2016
- 3. Programming Interactivity, Second Edition By Josha Noble, 2012
- 4. Programming the Raspberry Pi: Getting Started with Python 2E, 2016

<b>EBIT22E37</b>	WIRELESS ADHOC AND MESH NETWORKS	Ту	3	0/0	0/0	3

#### UNIT I MAC IN ADHOC NETWORKS

Introduction - Issues and challenges in ad hoc networks - Design Goals of a MAC Protocol for Ad Hoc Wireless Networks- Classifications of MAC protocols- Contention-Based MAC protocols - MAC Protocols Using Directional Antennas - Multiple-Channel MAC Protocols.

#### **UNIT II ROUTING IN ADHOC NETWORKS**

Introduction – Issues in designing a routing protocol in ad hoc networks –Classifications of routing protocols– Table-Driven Routing Protocols- Hybrid Routing Protocols - Hierarchical Routing Protocols-Power-Aware Routing Protocols.

#### TRANSPORT LAYER IN ADHOC WIRELESS NETWORKS **UNIT III**

Issues in designing a Transport layer protocol in AD HOC wireless networks-design goals of a transport layer protocol in ad hoc wireless networks-classification of Transport layer solutions-TCP over ad hoc wireless networks.

#### UNIT IV **OOS IN WIRELESS SENSOR NETWORKS**

Introduction - issues and challenges in providing QOS in ad hoc wireless networks-classifications of QOS solutions - network layer solutions- QOS frameworks for ad hoc wireless networks.

#### UNIT V SECURITY IN ADHOC AND SENSOR NETWORKS

Network security requirements- Security Attacks - Key Distribution and Management - Intrusion Detection -Software based Anti-tamper techniques – Water marking techniques – Defense against routing attacks - Secure Ad hoc routing protocols - Broadcast authentication WSN protocols - TESLA - Biba - Sensor Network Security Protocols - SPINS.

Subject Code	Subject Name	Ty/Lb/ ETL	L	T/ S.Lr	P/R	С
<b>EBIT22E38</b>	NEXT GENERATION NETWORKS	Ту	3	0/0	0/0	3

#### **UNIT I PERVASIVE CONNECTED WORLD AND 5G INTERNET**

Historical Trend of Wireless Communications–Evolution of LTE Technology to Beyond 4G,5G Road map– Ten Pillars of 5G–Internet of Things and Context Awareness–Networking Reconfiguration and Virtualization Support– Mobility– Quality of Service Control –Emerging Approach for Resource over Provisioning.

#### UNIT II SMALL CELLS FOR 5G MOBILE NETWORKS

Introduction to Small Cells–Capacity Limits and Achievable Gains with Densification –Mobile Data Demand–Demands. Capacity–Small Cell Challenges.

#### UNIT III COOPERATION FOR NEXT GENERATION WIRELESS NETWORKS 9 hrs

Introduction – Cooperative Diversity and Relaying Strategies: Cooperation and Network Coding, Cooperative ARQ MAC Protocols – PHY Layer Impact on MAC Protocol Analysis: Impact of Fast Fading and Shadowing on Packet Reception for QoS Guarantee, Impact of Shadowing Spatial Correlation–Study: NCCARQ, PHY Layer Impact.

#### UNIT IV MOBILE CLOUDS AND COGNITIVE RADIO

Introduction–The Mobile Cloud–Mobile Cloud Enablers–Network Coding–Overview of Cognitive Radio Technology in 5G Wireless–Spectrum Optimization using Cognitive Radio –Relevant Spectrum Optimization Literature in 5G–Cognitive Radio and Carrier Aggregation–Energy Efficient Cognitive Radio Technology.

#### UNIT V SECURITY AND SELF ORGANIZING NETWORKS

Overview of Potential 5G Communications System Architecture–Security Issues and Challenges in 5G Communications Systems – Self Organising Networks: Introduction, Self Organising Networks in UMTS and LTE, The Need for Self Organising Networks in 5G, Evolution towards Small Cell Dominant HetNets. Total Hours 45

#### EBFL22I01 FRENCH - Details in English for contents of each unit

#### Unit- I

Introduction to French words through the greetings and simple vocabulary like numbers, languages, nationalities are taught. Concept of conjugation of regular and irregular verbs.

#### Unit-II

More focus on grammatical elements like prepositions and articles. Various scenarios inclusive of the parts of speech learnt are to be discussed and practiced. Complete vocabulary for numbers and therefore practices how to say time.

#### **Unit-III**

Comprehension of demonstrative and possessive adjectives and the concept of model verbs is introduced. Simple understanding of 'Futurprôche' which enables the student to speak in future tense. Building negative sentences with different verbs.

#### **Unit-IV**

Learning vocabulary in most common categories like colours, places etc. and picking up on creating French phrases of right construct. Focus primarily on speaking and writing.

#### Unit-V

Learning essential verbs of regular actions in French that are more frequent in our daily life and thus mastering conjugations and speaking from the top of our heads. More familiarity towards language is therefore attained.

# FACULTY OF ENGINEERING AND TECHNOLOGY

Course Code	Course Title	Ty/Lb/ ETL	L	T/ S.Lr	P/R	С
EBIT22OE1	WEB DESIGN	Ту	3	0/0	0/0	3

#### **UNIT I: Introduction to Network**

Introduction to computer networks and uses - Network: devices, topology and types – Communication media. Introduction to OSI layers, Port and Protocols, Network applications. Client / Server architecture. Internet server provider, DNS and Hosting.

#### **UNIT II: Web Design Principles**

Brief History of Internet - What is World Wide Web - Why create a web site - Web Standards - Audience requirement. Basic principles involved in developing a web site - Planning process - Five Golden rules of web designing - Designing navigation bar - Page design - Home Page Layout - Design Concept.

#### **UNIT III: HTML**

Introduction to HTML- HTML version- Basic structure of an HTML document – Creating HTML document – HTML Elements - HTML Tags - Working with Text - Working with Lists, Tables and Frames - Working with Hyperlinks, Images and Multimedia - Working with Forms and controls .

#### **UNIT IV: Cascading Style Sheet**

Concept of CSS - Creating Style Sheet - CSS Properties – CSSS tyling (Background, Text Format, Controlling Fonts) - Working with block elements and objects - Working with Lists and Tables - CSS Id and Class - Box Model(Introduction, Border properties, Padding Properties, Margin properties) - CSS Advanced(Grouping, Dimension, Display, Positioning, Floating, Align, Pseudo class, Navigation Bar, Image Sprites, Attribute sector) - CSS Color - Creating page Layout and Site Designs.

#### **UNIT V: Scripting Languages**

JavaScript introduction – control structures – functions – arrays – objects – simple web applications. Web hosting and maintenance.

#### **Text Books:**

- 1. Computer Networks by A Tanenbaum 5th edition, Pearson Education
- 2. Mastering HTML, CSS & JavaScript Web Publishing by Laura Lemay, Rafe Coburn, Jennifer Kyrnin, Pearson Education.
- 3. HTML & CSS: The Complete Reference, Fifth Edition by Thomas A. Powell, McGraw-Hill publication.

EBIT22OE2	DIGITAL MARKETING	Ту	3	0/0	0/0	3

#### **UNIT I: INTRODUCTION**

Digital-Marketing Past, Present & Future – Digital-Marketing Landscape, Digital-marketing's Past - Web 1.0, Digital Marketing Present - Web 2.0, Future -Web 3.0, Strategic Digital-Marketing, and Digital -Business Models – Online Revenue Models, Value Models, and Strategic Digital-Business Models.

#### **UNIT II: DIGITAL MARKETING PLAN**

Process, Creating a Digital-Marketing Plan, Seven Steps –Situation Analysis, Strategic Planning, Objectives, Digital-Marketing Strategies – Product, Price, Distribution, Communication, Relationship Management; Implementation plan, Budget, Evaluation.

#### UNIT III: DIGITAL -MARKETING ENVIRONMENT

Overview of Digital-Marketing Environment, Global Digital -Markets, Wireless Internet Access, Digital divide, Building inclusive Digital markets, social networking, Ethical and Legal Issues – Overview, Digital Property, Emerging issues.

#### UNIT IV: DIGITAL-MARKETING MANAGEMENT

Online offer – Creating customer value online, Product Benefits, Digital Marketing enhanced product development, Payment options, Pricing Strategies; Internet as distribution, Digital Marketing Communication – Owned Media, Paid media, Earned Media.

#### **UNIT V: EMERGING TRENDS**

Emerging trends in Digital-marketing, Content Marketing, Social Media Marketing, Email Marketing, Affiliate Marketing, Video Marketing, Mobile Marketing, Interactive advertising, International Online Marketing, Search Engine Marketing, Online Partnership, Viral Marketing, E-CRM, E-Business, E-Tailing.

#### **Total Hours: 45**

# 1. Strauss Judy, Frost Raymond (2013), E-Marketing, 7/e; New Delhi: Prentice Hall.

#### **REFERENCE BOOKS:**

**TEXT BOOK:** 

1. Chaffey Dave and Smith PR (2013), E marketing Excellence: Planning and Optimizing your Digital Marketing; 4/e; Routledge.

2. Ryan Damian, (2014), Understanding Digital Marketing: Marketing Strategies for Engaging the Digital Generation, 3/e; Kogan Page Limited.

EBIT22OE3	CYBER SECURITY ESSENTIALS	Ту	3	0/0	0/0	3

#### UNIT I CYBER SECURITY FUNDAMENTALS

Network And Security Concepts: Information Assurance Fundamentals-Basic Cryptography-Public Key Encryption- The Domain Name System(DNS)-Firewalls

#### UNIT II ATTACKERS TECHNIQUE AND MOTIVATIONS

Trackers Cover Their Tracks (Antiforensis), How And Why Attackers Use Proxies-Tunnelling Technique- Fraud Technique: Phising, Smishing, Vishing And Mobile Malicious Code- Rogue Antivirus- Threat Infrastructure: Botnets-Fast Flux.

#### UNIT III EXPLOITATION

Techniques To Gain A Foothold: Shellcode- Integer Overflow Vulnerabilities- Stack Based Buffer Overflows- SQL Injections – Malicious PDF Files.

#### UNIT IV MALICIOUS CODE

Self-Replicating Malicious Code Worms-Viruses Persistent S/W Techniques: Basic I/P-O/P System- Legacy Text Files- Autostart Registary Entirier Root Kits- Spyware- Attacks Against Privileged User Accounts- Virtual MachineDetection.

#### UNIT V DEFENCE AND ANALYSIS TECHNIQUE

Memory Forensics- Honeypots- Malicious Code Naming- Automated Malicious Code Analysis System-Intrution Defection System. Case study :Defence Special File Investigation Tools.

#### 1. VISUAL BASIC

- 1. Adding menus to forms
- 2. Creating dialog boxes with various options
- 3. MDI applications
- 4. Writing code for various keyboard and mouse events
- 5. OLE container control
- 6. Data access through Data control and DAO.
- 7. Active X control
- 8. Active X Document
- 9. Active X DLL 2.
- 2. VISUAL C++
  - 1. Creating applications with App wizard
  - 2. Working with MFC
  - 3. Exception handling
  - 4. Loading Editing and Adding resources Linking resources to applications
  - 5. Drawing bitmaps
  - 6. Threads
  - 7. OLE
  - 8. Graph Applications

LEARNING OUTCOMES: Upon completion of this course, the student will be able to:

a. Design, create, build, and debug Visual Basic applications.

b. Explore Visual Basic's Integrated Development Environment (IDE).

EBIT22OL5	PHP / MySQL PROGRAMMING LAB	Lb	0	0/0	3/0	1

1.Use of select statements for queries

- 2. Nested queries using SQL
- 3. Built in functions in SQL
- 4. Update operations using SQL.
- 5. Use of index, creating views and querying in views
- 6. Create a php program to find odd or even number from given number
- 7. Write a php program to find maximum of three numbers.
- 8. Write a PHP program to swap two numbers.
- 9. Write a PHP Program to demonstrate the variable function: Gettype():
- 10. Write a PHP program to drop table using MySQL.
- 11. Create a student Registration in PHP and Save and Display the student Records
- 12. Write a program to Develop student registration form and display all the submitted data on another page.
