M.G.R ND RESEARCH INSTITUTE

INIVERSIT

(An ISO 9001 20

TECHNICAL ENGLISH I 2 1 0/0 2/0

1. Vocabulary, Grammar and Usage - I

Meanings of words and phrases, synonyms and antonyms - affixes: prefixes and suffixes and word formation – nominal compounds, expanding using numbers and approximation – Verb: tense, auxiliary and modal – Voice: active, passive and impersonal passive

2. Vocabulary, Grammar and Usage - II

Infinitives and Gerunds – preposition, prepositional phrases, preposition + relative pronoun-'If' clause, sentences expressing 'cause and effect', 'purpose',

Instructions, suggestions and recommendations

3. Reading

Questions: Wh-pattern, Yes/no questions, tag questions

Comprehension: extracting relevant information from the text, by skimming and scanning and inferring, identifying lexical and contextual meaning for specific information, identifying the topic sentence and its role in each paragraph, comprehending the passage and answering questions - Précis writing

4. Writing

Adjectives: degrees of comparison

Concord: subject-verb agreement

Interpretation of tables and flowcharts: writing a paragraph based on information provided in a table using comparison and contrast, classifying the data and flowchart, describing logical steps involved in specific functions, note - making from a given passage- letter writing, formal: seeking permission to undergo practical training, letter to an editor of a newspaper complaining about civic problems and suggesting suitable solutions

5. Functional English and Practical Components

Listening : Listening to stories, conversation, dialogue, speeches of famous people, and identifying the grammar components

Speaking : Scripting and enacting role plays/ narrating incidents

Reading: Review of books, articles, fiction-Extensive reading/ user manuals, pamphlets, brochures

Writing : paragraph and essay writing using academic vocabulary

BMA17002

1. ALGEBRA

Binomial, Exponential, Logarithmic Series (without proof of theorems) - Problems on Summation, Approximation and Coefficients.

2. MATRICES

Characteristic equation - Eigen values and Eigen vectors of a real matrix - Properties of Eigen values -Cayley - Hamilton theorem(without proof) - Orthogonal reduction of a symmetric matrix to Diagonal form.

3.TRIGONOMETRY

Expansions of Sin n θ , Cos n θ in powers of Sin θ and Cos θ – Expansion of Tan n θ – Expansions of Sinⁿ θ and $\cos^n\theta$ in terms of Sines and Cosines of multiples of θ – Hyperbolic functions – Separation into real and imaginary parts.

4. DIFFERENTIATION

Basic concepts of Differentiation - Elementary differentiation methods - Parametric functions - Implicit function –Leibnitz theorem(without proof) – Maxima and Minima – Points of inflection.

5. FUNCTIONS OF SEVERAL VARIABLES

Partial derivatives – Total differential – Differentiation of implicit functions – Taylor's expansion – Maxima and Minima by Lagrange's Method of undetermined multipliers – Jacobians.

Total no. of periods: 60

BMA17002

BIO MATHEMATICS 3 1/0 0/0

1.MATRICES

Elementary operations on Matrices – Inverse of a Matrix – Solving simultaneous equations (atmost three equations with three unknowns) using Cramer's rule.

2. DIFFERENTIATION

Basic concepts of Differentiation - Elementary differentiation methods - Parametric functions - Implicit function – Maxima and Minima (simple problems).

3.INTEGRATION

Basic concepts of Integration – Methods of Integration – Integration by substitution – Integration by parts – Definite Integrals - Properties of Definite Integrals - Problems on finding Area using single integrals (simple problems).

4.INTERPOLATION

Interpolation: Newton's forward, Newton's backward formulae - Newton's divided differences -Lagrange's polynomial (simple problems).

5. NUMERICAL DIFFERENTIATION AND INTEGRATION (12)

Numerical differentiation with interpolation polynomials (Newton's forward and backward only) -Numerical integration by Trapezoidal and Simpson's (both 1/3rd & 3/8th) rules (simple problems).

M.G.R. ND RESEARCH INSTITUTE

ENGINEERING PHYSICS

UNIVERSITY

Madatansigni, Chuntai (An 150 9001 | 2008 Cartif Department of Civil Engineering

Bending moment – Depression of a Cantilever – Determination of Young's modulus by Depression of a Cantilever – Uniform and non uniform bending (Experiment) – I form of Girders. Viscosity - Definitions - Lubrication - Properties & Types of Lubricant. Acoustics of Buildings -Reverberation – Reverberation time – Sabine's formula for Reverberation Time – Absorption Coefficient and its Determination - Factors affecting Acoustics of Buildings and its Remedial Measures.

2. THERMAL PHYSICS

Thermal conduction – Thermal Expansion – Expansion joints – Bimetallic strips – Thermal conductivity (k) - Lee's Disc method (theory and experiment) - Radial flow of heat -Thermal conductivity of Glass -Thermal conductivity of Rubber Tube – Flow of heat through Compound Media – Thermal Insulation of buildings - Thermal radiation - Concept of Black body radiation - Fundamentals of Low Temperature Physics.

3. ULTRASONICS AND ITS APPLICATIONS

Properties & Production of Ultrosonics - Piezoelectric method - Magnetostriction method - Acoustic Grating - Industrial Applications - Ultrasonic flaw detection (Block Diagram) - Medical Application: Velocity Blood Flow Meter - PhonoCardiography - Ultrasound imaging - Hazards and safety of Ultrasound - NDT of Materials using Ultrasonics.

4. LASER & ITS APPLICATIONS

.Nature of Light - Laser Principle & Characteristics-Ruby laser - Nd- YAG Laser - He-Ne Laser - Co2 Laser - Semiconductor laser - Homo junction & Hetero Junction Laser - Engineering applications -Holography, Surveying – Industrial applications – Cutting, Welding – Medical applications – Surgery

5. FIBER OPTIC COMMUNICATION

Total Internal Reflection – Propagation of Light in Optical Fibres – Numerical aperture and Acceptance Angle – Types of Optical Fibres (material, refractive index, mode) – Fibre Optical Communication system (Block diagram) - Attenuation-Transmitter, Receiver, Dispersion, Modulation/Demodulation Advantages of Fibre Optical Communication System - IMT, PMT, Wavelength Modulated & Polarization Modulated Sensors – Endoscope Applications.

CAN ISO 9001 2009 Carithed Institution) Department of Civil Engineering ENGINEERING CHEMISTRY – I

1. CHEMICAL THERMODYNAMICS

Introduction, Terminology in thermodynamics –System, Surrounding, State and Path functions, Extensive and intensive properties. Laws of thermodynamics – I and II laws-Need for the II law. Enthalpy, Entropy, Gibbs free energy, Helmholtz free energy - Spontaneity and its criteria. Maxwell relations, Gibbs - Helmholtz equation (relating E & A) and (relating H & G), Van't Hoff equations.

2.TECHNOLOGYOF WATER

Water quality parameters – Definition and expression. Analysis of water – alkalinity, hardness and its determination (EDTA method only). Boiler feed water and Boiler troubles-Scales and sludges, Caustic embrittlement, Priming and Foaming and Boiler corrosion. Water softening processes – Internal and external conditioning – Lime soda, Zeolite, Demineralisation methods. Desalination processes-RO and Electrodialysis .Domestic water treatment.

3. ELECTROCHEMISTRY AND ENERGY STORAGE DEVICES

Conductance – Types of conductance and its Measurement. Electrochemical cells – Electrodes and electrode potential, Nernst equation – EMF measurement and its applications. Types of electrodes-Reference electrodes-Standard hydrogen electrode- Saturated calomel electrode-Quinhydrone electrode –

Determination of P^H using these electrodes.

Reversible and irreversible cells– Fuel cells- H₂–O₂ fuel cell, Batteries-Lead storage battery,Nickel–Cadmium and Lithium-Battery.

4. CORROSION AND PROTECTIVE COATING

Introduction–Causes of Corrosion–Consequences- Factors affecting corrosion. Theories of corrosion-Chemical corrosion and Electrochemical corrosion. Methods of corrosion control – corrosion inhibitors, Sacrificial anode and Impressed current cathodic protection.

Protective coatings- Metallic coatings- Chemical conversion coatings-paints-Constituents and functions.

5.POLYMERS AND COMPOSITES

Monomers – Functionality – Degree of polymerization-Tacticity.Polymers – Classification, Conducting Polymers,Biodegradable polymers- Properties and applications.Plastics – Thermoplastics and thermosetting plastics,Compounding of plastics – Compression moulding, injection moulding and extrusion processes.

Polymer composites-introduction-Types of composites-particle reinforced-fiber reinforced-structural composites-examples. Matrix materials, reinforcement materials-Kevlar, Polyamides, fibers, glass, carbon fibers, ceramics and metals.

ERSIT

BES17001 BASIC ELECTRICAL & ELECTRONICS ENGINEERING 3 2 0/1 0/0

1. ELECTRIC CIRCUITS

Electrical Quantities - Ohms Law - Kirchhoff's Law - Series and Parallel Connections - Current Division and Voltage Division Rule - Source Transformation – Wye (Y) – Delta (Δ), Delta (Δ) – Wye (Y) Transformation – Rectangular to Polar and Polar to Rectangular.

2. MACHINES & MEASURING INSTRUMENTS

Construction & Principle of Operation of DC motor & DC Generator - EMF equation of Generator - Torque Equation of Motor - Construction & Principle of operation of a Transformer - PMMC - Moving Iron types of meter - Single Phase Induction Type Energy Meter.

3. BASICS OF POWER SYSTEM

Generation of Electric Power (Thermal, Hydro, Wind and Solar) - Transmission & Distribution of Electric Power - Types of Transmission & Distribution Schemes - Representation of Substation.

4. ELECTRON DEVICES

Passive Circuit Components-Classification of Semiconductor-PN Junction Diode-Zener diode- Construction and Working Principle – Applications--BJT-Types of configuration-JFET.

5. DIGITAL SYSTEM

Number System – Binary, Decimal, Octal, Hexadecimal – Binary Addition Subtraction, Multiplication & Division– Boolean Algebra - Reduction of Boolean Expressions - Logic Gates - De-Morgan's Theorem, Adder - Subractor.

Department of Civil Engineering BASIC MECHANICAL & CIVIL ENGINEERING

BES17002

UNIT-I: THERMAL ENGINEERING

Classification of internal combustion engine – two stroke, four stroke petrol and diesel engines. Classification of Boilers – Cochran boiler – Locomotive boilers – Power plant classification – Working of Thermal and Nuclear power plant.

UNIT- II: MANUFACTURING PROCESS

Metal forming processes – Rolling, forging, drawing, extrusion and sheet metal operations- fundamentals only. Metal Joining processes – Welding - arc and gas welding, Soldering and Brazing. Casting process – Patterns -Moulding tools - Types of moulding - Preparation of green sand mould -Operation of Cupola furnace.

Basics of metal cutting operations – Working of lathe- parts-Operations performed. Drilling machine – Classification – Radial drilling machine - Twist drill nomenclature.

UNIT- III : MECHANICS

Stresses and Strains – Definition – Relationship – Elastic modulus – Centre of gravity – Moment of Inertia – Problems. (Simple Problems Only).

UNIT- IV : BUILDING MATERIALS AND CONSTRUCTION

<u>Materials</u>:Brick - Types of Bricks - Test on bricks - Cement – Types, Properties and uses of cement – Steel - Properties and its uses – Ply wood and Plastics.

<u>Construction</u>:Mortar – Ingredients – Uses – Plastering - Types of mortar - Preparation – Uses – Concrete – Types – Grades – Uses – Curing – Introduction to Building Components (foundation to roof) – Masonry – Types of masonry (Bricks & Stones)

UNIT- V: ROADS, RAILWAYS, BRIDGES & DAMS

Roads – Classification of roads – Components in roads – Railways -Components of permanent way and their function – Bridges – Components of bridges – Dams – Purpose of dams – Types of dams.

Total No. of Periods : 45

OBJECTIVES :

- 1. Learn to know what kind of pencils to be used to sketch lines, numbers, Letters and Dimensioning in drawing sheet.
- 2. Draw Projection of points, line, planes and solids using Drafters
- 3. To identify the angle of projection and development of surfaces, isometric projection and Orthographic projection
- 4. Know the basics of elevation and plan of building.
- 5. Learn the basics of Drafting using AutoCAD Software

COURSE OUTCOMES (Cos): (3-5)Students completing the course were able to Utilize the concept of Engineering Graphics Techniques to draft letters, Numbers, Dimensioning in Indian Standards CO1 CO2 Demonstrate the drafting practice visualization and projection skills useful for conveying ideas in engineering applications. Identify basic sketching techniques of engineering equipments CO3 CO4 Demonstrate the projections of Points, Lines, Planes and Solids. CO5 Draw the sectional view of simple buildings and utilize Auto CAD Software. Mapping of Course Outcomes with Program Outcomes (POs) COs/POs PO1 PO2 PO3 PO4 PO5 PO6 PO7 **PO8** PO9 **PO10** PO11 PO12 CO1 Η Η Н Μ Μ Μ Η Η Η CO₂ Η Η Η Μ Μ Μ Η Η Η CO3 Н Η Η L Μ Μ Μ Μ CO4 Η Η Η Н Μ Μ Μ Η Η CO5 Н H Н Μ L Η Н Η Η Μ H/M/L indicates strength of correlation H – High, M – Medium, L – Low Soft Skills Category Basic Engg Humanities Program Program Open Practical / Internships / Sciences Sciences & Social core Electives Electives Project Technical Sciences Skills $\sqrt{}$ Approval

B.Tech Regulation 2017 Approved by the Academic Council

Department of Civil Engineering **BASIC ENGINEERING GRAPHICS**

CONCEPTS AND CONVENTIONS (Not for examination)

Introduction to drawing, importance and areas of applications - BIS standards - IS: 10711 - 2001 : Technical products Documentation - Size and layout of drawing sheets - IS 9606 - 2001: Technical products Documentation -Lettering – IS 10714 & SP 46 – 2003: Dimensioning of Technical Drawings – IS : 15021 – 2001 : Technical drawings - Projections Methods - drawing Instruments, Lettering Practice - Line types and dimensioning - Border lines, lines title blocks Construction of polygons - conic sections - Ellipse, Parabola, Hyperbola and cyloids.

UNIT- I : PROJECTION OF POINTS, LINES AND PLANE SURFACES

Projection of points and straight lines located in the first quadrant - Determination of true lengths and true inclinations - projection of polygonal surface and circular lamina in simple position only.

UNIT-II: PROJECTION OF SOLIDS

Projection of simple solids like prism, pyramid, cylinder and cone in simple position Sectioning of above solids in simple vertical position by cutting plane inclined to one reference plane and perpendicular to the other.

UNIT- III : DEVELOPMMENT OF SURFACES AND ISOMETRIC PROJECTION

Development of lateral surfaces of simple and truncated solids – prisms, pyramids, cylinders, and cones. Principles of isometric projection – isometric scale – isometric projections of simple solids, like prisms pyramids, cylinders and cones.

UNIT- IV : ORTHOGRAPHICS PROJECTIONS

Orthographic projection of simple machine parts - missing views

BUILDING DRAWING

Building components - front, Top and sectional view of a security shed.

UNIT- V : COMPUTER AIDED DRAFTING

Introduction to CAD – Advantages of CAD – Practice of basic commands – Creation of simple components drawing using CAD software. Total No. of periods:30

Note:First angle projection to be followed.

- Venugopal, K and Prabhu Raja, V. (2010) Engineering Graphics, New Age International (P) Limited 2.

Special Points applicable to University examinations on Engineering Graphics

- 1. There will be five questions, each of either or type covering all UNIT-s of the syllabus
- All questions will carry equal marks of 20 each making a total of 100 2.
- The answer paper shall consists of drawing sheets of A2 size only. The students will be permitted to use 3. appropriate scale to fit solution within A2 size.

Department of Civil Engineering BASIC ENGINEERING WORKSHOP

1 0 0/0 2/0.

BES17L01

MEP PRACTICE

1. FITTING :

Study of fitting tools and Equipments – Practicing, filing, chipping and cutting – making V-joints, half round joint, square cutting and dovetail joints.

2. CARPENTRY:

Introduction – Types of wood – Tools – Carpentry processes – Joints – Planning practice – Tee Halving Joint – Cross Lap Joint – Maritse and Tenon Joint – Dovetail Joint

3. SHEET METAL:

Study of tools and equipments – Fabrication of tray, cones and funnels.

CIVIL ENGINEERING PRACTICE

- 1. Study of Surveying and its equipments
- 2. Preparation of plumbing line sketches for water supply and sewage lines
- 3. Basic pipe connection using valves, laps, couplings, unions, reduces and elbows in house hold fittings

ELECTRICAL ENGINEERING PRACTICE

- 1. Study of Electronic components and equipments Resistor, colour coding measurement of AC signal parameter (peak-peak, rms period, frequency) using CR
- 2. Soldering practice Components Devices and Circuits Using general purpose PCB
- 3. Residential house wiring using switches, fuse, indicator, lamp and energy meter.
- 4. Fluorescent lamp wiring.
- 5. Stair case wiring

ELECTRONIC ENGINEERING PRACTICE

- 1. Measurement of electrical quantities voltage, current, power & power factor in RLC circuit.
- 2. Measurement of energy using single phase energy meter.
- 3. Measurement of resistance to earth of an electrical equipment.

Department of Civil Engineering C PROGRAMMING AND LAB

1. INTRODUCTION

BES17ET2

Fundamentals, C Character set, Identifiers and Keywords, Data Types, Variables and Constants, Structure of a C Program, Executing a C Program.

2.EXPRESSION AND STATEMENT

Operators, Types-Complex and Imaginary, Looping Statement-For, While, Do, Break, continue, Decision Statement-If, If else, Nested if, Switching Statement, Conditional Operator.

3.ARRAYS AND FUNCTIONS

Defining an Array, Using Array elements as counters, Generate Fibonacci number, Generate Prime Numbers, Initializing Arrays, Multidimensional Arrays, Defining a Function, Function call -types of Function calls -Function pass by value -Function pass by reference, Write a Program in Recursive Function.

4. STRUCTURES AND POINTERS

5. STRINGS AND FILE HANDLING

Strings -Syntax for declaring a string -Syntax for initializing a string -To read a string from keyboard, Files in C -File handling functions -Opening a File closing a file --example: fopen, fclose -Reading data from a File- Problem solving in C

variable -Accessing structure variables, Understanding Pointers -Introduction -Syntax of Pointer.

- 2. http://www.learn-c.org/

Reference :

- 1. Stephen G. Kochen" Programming in C- A complete introduction to the C Programming Language. Third Edition, Sams Publishing -2004
- 2. Ajay Mital, "Programming in C: A Practical Approach", Pearson Publication-2010

List of Programs

- 1. Write a program to check 'a' is greater than 'b' or less than 'b' Hint: use if statement.
- 2. Write another program to check which value is greater 'a', 'b' or 'c'. Hint: use else-if statement. (Take values of a, b, c as user inputs)
- 3. Write a Program to find the sum of the series : $x + X^3/3! + X^5/5! + \dots + X^n/n!$
- 4. Write a C Program to solve a Quadratic Equation by taking input from Keyboard
- 5. Write a C Program to arrange 20 numbers in ascending and descending Order. Input the Numbers from Kevboard
- 6. Write a C Program to Multiply a 3 x 3 Matrix with input of members from Keyboard
- Write a program that takes marks of three students as input. Compare the marks to see which student has 7. scored the highest. Check also if two or more students have scored equal marks.
- Write a program to display records of an employee. Like name, address, designation, salary. 8.
- 9. Write a C program, declare a variable and a pointer. Store the address of the variable in the pointer. Print the value of the pointer.
- 10. Write a C program to concatenate String 'best' and String 'bus'. Hint: strcat(char str1, char str2);
- 11. Explore the other functions in string library.
- 12. Write a program to create a file TEST. Write your name and address in the file TEST. Then display it on the console using C program.

Department of Civil Engineering BES17ET3 ENTREPRENEURIAL SKILL DEVELOPMENT & PROJECT LAB 1 0 0/0 2/0

1. CHARACTERISTICS OF A SUCCESSFUL ENTREPRENEUR

Introduction to entrepreneurship education – Myths about entrepreneurship – How has entrepreneurship changed the country – Dream it. Do it - Idea planes - Some success stories – Global Legends – Identify your own heroes – entrepreneurial styles – Introduction, concept & Different types - Barrier to Communication – Body language speaks louder than words

2. DESIGN THINKING & RISK MANAGEMENT

Introduction to Design thinking – Myth busters – Design thinking Process - Customer profiling – Wowing your customer – Personal selling – concept & process – show & tell concept – Introduction to the concept of Elevator Pitch - Introduction to risk taking & Resilience – Managing risks (Learning from failures, Myth Buster) – Understanding risks through risk takers – Why do I do? – what do I do ?

3.IDEA GENERATION & EVALUATION

Introduction – Finding your flow – Entrepreneurial CV – your draft action plan - D.I.S.R.U.P.T - A model for ideation – Let's ID8 – Mind mapping for ideas – build your own idea bank – Concept of Decision matrix & paired comparison analysis – 5Q framework.

4. ENTREPRENEURIAL OUTLOOK & CUSTOMER DISCOVERY

Effectuation – Start with your means – Segmentation & targeting – Niche marketing – Find your Niche – Drawing & mapping the consumption chain - outcome driven innovation – This is my customer

5. VALUE PROPOSITION& CAP STONE PROJECT PRESENTATION

Introduction – Value proposition design – customer segment – validation exercise – value propositions & assessing fit – Refine your value proposition – Blue ocean strategy - What is prototyping – Design your experiment – Design your MVP – Learning cards & Capstone Presentation.

BEN17002

Unit I Vocabulary, Grammar and Usage - I

Verbal analogy - picking out the odd one from a series -finding one word substitute - paragraph writing: using discourse markers, defining / describing an object / device / instrument / machine using topic sentence and its role, unity, coherence and use of cohesive expressionsEssay writing with due emphasis on features such as topical sentence, unity, coherence and cohesive devices

M.G.R ND RESEARCH INSTITUTE

ed h

UNIVERSIT Madatassial, Chuntai (An ISO 9001 | 2008 Cartifi

Department of Civil Engineering

UnitII Vocabulary, Grammar and Usage - II

Cloze - completion of sentences suitably, phrases and idioms, homophones - collocation -Techniques of formatting and drafting reports: writing newspaper reports on accidents, thefts and festivals

Unit III Reading

interpreting pie and bar charts

Unit IV Writing Register: formal and informal - using ellipses in dialogues- framing dialogues-Email: Job Application, Resume

Unit V Functional English and Practical Components

Listening: Media Advertisement

Speaking: oral practice- activities related to professional skills (e.g. Marketing, advertising etc.), role play activities using different speech functions (persuasion, negotiation, giving directions and guidance), conversational etiquette (politeness, strategies, turn-taking, body language).

Reading: reading newspaper/ magazine articles for gathering information

Writing: Note-making from newspaper and magazine articles- follow BEC method

Writing and speaking dialogue writing followed by role play in different situations such as asking permission, requesting and instructing, introducing oneself - activities based on BEC

BMA17003

1. INTEGRATION Basic concepts of Integration – Methods of Integration – Integration by substitution – Integration by parts – Definite integrals- Properties of definite integrals - Problems on finding Area and Volume using single integrals (simple problems).

Madamesical, Channal 600 09 (An ISO 9001 | 2009 Cartillad Insti-Department of Civil Engineering MATHEMATICS - II

ID RESEARCH INS ERSIT

2. MULTIPLE INTEGRALS

Double integral in Cartesian and Polar Co-ordinates - Change of order of integration - Triple integral in Cartesian Co-ordinates – Spherical Polar Co-ordinates – Change of variables (simple problems).

3.ORDINARY DIFFERENTIAL EQUATIONS

First order differential equations - Second and higher order linear differential equations with constant coefficients and with RHS of the form: e^{ax} , x^n , Sin ax, Cos ax, $e^{ax}f(x)$, x f(x) where f(x) is Sin bx or Cos bx – Differential equations with variable coefficients (Euler's form) (simple problems).

4. THREE DIMENSIONAL ANALYTICAL GEOMETRY

Direction Cosines and Ratios - Equation of a straight line - Angle between two lines - Equation of a plane - Coplanar lines - Shortest distance between skew lines - Sphere - Tangent plane.

5. VECTOR CALCULUS

Scalar and Vector functions - Differentiation - Gradient, Divergence and Curl - Directional derivatives - Irrotational and Solenoidal fields- Line, Surface and Volume integrals - Green's, Stoke's and Gauss divergence theorems (statement only) - Verification.

1. BASICS OF STATISTICS

Variables - Uni-variate Data - Frequency Distribution - Measures of Central Tendency - Mean - Median - Mode -Quartiles - Measures of Dispersion - The Range - Quartile Deviation - Standard Deviation.

(An ISO 9001 20

2. CORRELATION

Measures of Skewness& Kurtosis - Bi-variate data - Correlation & Regression.

3. PROBABILITY AND RANDOM VARIABLE

Definition of Random Experiment - Sample Space - Events: Mutually exclusive events - Exhaustive events -Dependent events and Independent events - Mathematical and Statistical definition of probability - Theorems of addition and multiplication laws of Probability (Without proof) - Conditional probability (Simple problems).

4. SAMPLING

Tests of Significance - Large Sample Tests - Mean - Proportions - Small Sample Tests - t, F & Chi-square Tests -Independence of Attributes - Goodness of Fit.

5. DESIGN OF EXPERIMENTS

Analysis of Variance: One Way & Two-Way Classification - Design of Experiments - Randomized Block Design -Completely Randomized Block Design - Latin Square Design.

Department of Civil Engineering MATERIAL SCIENCE

1. CRYSTAL PHYSICS

Space Lattice – Unit cell – Bravais lattice – Lattice planes – Miller indices – Calculation of number of atoms per unit cell – Atomic radius – Coordination number – Packing factor for SC, BCC, FCC and HCP structures – Ceramic Materials & Graphite Structures – Crystal GrowthTechniques (Slow Evaporation Method & Melt Growth)

2. CONDUCTING & SUPERCONDUCTING MATERIALS

Introduction - Classical Free electron theory of Metals – Derivation of Electrical conductivity – Thermal Conductivity – Deduction of Wiedemann Franz law – Fermi Energy &Fermi Function – Density of Energy States – Qualitative Analysis of Conductors, Semiconductors and Insulators – Some Examples of Important Electrical Materials Superconducting Materials:Transition temperature – BCS Theory – Properties of Superconductors – Type I &Type II Superconductors – Superconductors – Low & High Temperatures Superconductors – AC& DC Josephson Effects – Applications of Superconductors – Basic Concepts of SQUID, Magnetic Levitation.

3. SEMICONDUCTING MATERIALS

Bonds in Semiconductors – Types – Importance of Germanium & Silicon – Other Commonly Used Semiconducting materials - Carrier concentration in Intrinsic Semiconductors (Electron and Hole Density) – Band Gap Determination – Carrier Transport in Semiconductors – Drift, Mobility and Diffusion – Hall effect – Determination of Hall Coefficient and its Applications – Dilute Magnetic Semiconductors (DMS) & their Applications – Schottky diodes.

4.MAGNETIC& DIELECTRIC MATERIALS

Magnetic Materials: Types – Comparison of Dia, Para and Ferro Magnetism – Heisenberg's interpretation –Domain theory – Hysteresis – Soft and Hard Magnetic Materials – Application of Magnetic Resonance Imaging – Important Magnetic, Insulating & Ferro electric materials.

Dielectric Materials: Electrical Susceptibility – Dielectric Constant – Concept of Polarization – Frequency and Temperature Dependence of Polarization – Dielectric loss – Dielectric breakdown – Commomly used Dielectric materials and their practical applications.

5.OPTICAL, OPTOELECTRONIC AND NEW MATERIALS

Properties & Classification of Optical Materials – Absorption in Metals, Insulators & Semiconductors – Composite Materials – Nano Materials – Bio Materials – MEMS – NEMS – LED's – Organic LED's – LCD's – Laser diodes – Photodetectors – Tunneling – Resonant Tunneling Diodes (RTD's) – Carbon Nanotubes – Various Ttypes of Optical Materials with Properties.

Department of Civil Engineering ENGINEERING CHEMISTRY – II

M.G.R. ND RESEARCH INSTITUTE

1. PHASE EOUILIBRIA

Introduction – Definition of terms involved in phase rule. Derivation of Gibbs phase rule – Applications to one component system – water system. Binary system – Eutectic system – Pb – Ag system, Bi – Cd system .Thermal analysis – Cooling curves.

2. MATERIAL CHEMISTRY

Cement – Manufacture, Chemistry of setting and hardening .Lubricants – Requirements of good lubricants, Mechanism, Properties of lubricants, Classification – Examples. Abrasives–Classification –Moh's scale-Hard and soft abrasives, Preparation of artificial abrasives (silicon carbide, boron carbide), Applications of abrasives. Refractories – Classification, Properties-Refractoriness, RUL, Porosity, Thermal spalling Alloys Classification of alloys – Purpose of making alloys - Ferrous and non-Ferrous alloys - Heat treatment Nano materials – properties, carbon nano tubes – properties, fabrication – carbon arc method, laser vapourization method.

3. APPLIED CHEMISTRY

Soaps and detergents : Soaps – Saponification of oils and fats, manufacture of soaps, classification of soap – soft soap, medicated soap, herbal soap, shaving soap and creams.

Detergents - Anionic detergents - manufacture and applications, Comparison of soaps and detergents.

Rocket propellants and explosives: Rocket propellants – characteristics, solid and liquid propellants – examples. Explosives- Introduction, characteristics, classification, Oxygen balance, preparation, properties and uses of detonators, low explosives and high explosives, Dynamites, Gun cotton, Cordite.

Food adulterants- Common adulterants in different foods – milk and milk products, vegetable oils, and fats, spices and condiments, cereals, pulses, sweetening agents and beverages, Contamination with toxic chemicals – pesticides and insecticides.

4. FUELS & COMBUSTION

Introduction to Fuels – classification – Calorific value – GCV, LCV. Solid Fuels–Coal-Proximate Analysis, Metallurgical Coke–Manufacture of Metallurgical Coke – Liquid Fuel–Refining of Petrol, Synthetic Petrol–Manufacturing Process–Hydrogenation of Coal, Polymerization, Cracking–Knocking–Octane Number–Leaded Petrol (or) Anti–knocking – Cetane Number–Ignition Lag–Gaseous fuels–CNG–LPG–Water Gas, Producer gas–Biogas- Combustion–Flue Gas analysis–Orsat's method.

5. ANALYTICAL AND CHARACTERIZATION TECHNIQUES

Electron microscopes: Scanning electron microscope & Transmission electron microscope, instrumentation and applications Absorption and Emission Spectrum - Beer - Lambert's law. Visible and UV Spectroscopy – instrumentation – Block diagram - working. IR Spectroscopy – instrumentation - Block diagram – molecular vibrations – stretching and bending – H_2O , CO_2 . –Characterization of some important organic functional groups. Chromatographic techniques – column, thin layer and paper.

Total number of periods : 45

B.Tech Regulation 2017 Approved by the Academic Council

Department of Civil Engineering ENVIRONMENTAL SCIENCE

Madurinesical, Chuntai (An 150 9001 | 2008 Cartif

ID RESEARCH INS ERSII

Unit I Environment and Ecosystem

Definition, Scope and Importance of environment – need for public awareness – concept, structure and function of an ecosystem - producers, consumers and decomposers - energy flow in the ecosystem. Biodiversity at national and local levels – India

Unit II Environment Pollution

Definition - causes, effects and control measures of: (a) Air pollution (b) Water pollution (c) Soil pollution (d) Marine pollution (e) Noise pollution (f) Nuclear hazards (g) E-Wastes and causes, effects and control measures

Unit III Natural Resources

Forest resources: Use and over-exploitation, deforestation. Water resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems. Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems.

Unit – IV Social Issues and the Environment

From unsustainable to sustainable development – urban problems related to energy – water conservation, rain water harvesting, watershed management - resettlement and rehabilitation of people; its problems and concerns climate change, global warming, acid rain, ozone layer depletion, nuclear accidents ,central and state pollution control boards-Public awareness.

Unit – V Human Population and the Environment

Population growth, variation among nations - population explosion, environment and human health - human rights value education - HIV/AIDS

- women and child welfare - role of information technology in environment and human health

Total Number of Periods : 45

BMA17005 MATHEMATICS III FOR MECHANICAL & CIVIL ENGINEERS

UNIT I: PARTIAL DIFFERENTIAL EQUATIONS

Formation of PDE by eliminating arbitrary constants and eliminating arbitrary functions – Solutions of standard types of first order equations – Lagrange's equation – Linear partial differential equations of second and higher order with constant coefficients.

UNIT II: FOURIER SERIES

Dirichlet's conditions – General Fourier series – Half range Sine & Cosine series – Complex form of Fourier series – Parseval's identity – Harmonic Analysis.

UNIT III: APPLICATIONS OF PARTIAL DIFFERENTIAL EQUATIONS

Classification of second order linear partial differential equations – Solutions of one dimensional wave equation, onedimensional heat equation – Steady state solution of two dimensional heat equation (Cartesian coordinates only) – Fourier series solutions.

UNIT IV: LAPLACE TRANSFORMS

Transforms of simple functions – Properties of Transforms – Inverse Transforms – Transforms of Derivatives and Integrals – Periodic functions – Initial and final value theorems – Convolution theorem – Applications of Laplace transforms for solving linear ordinary differential equations up to second order with constant coefficients and Linear simultaneous differential equations of first order with constant coefficients.

UNIT V: FOURIER TRANSFORMS

Statement of Fourier integral theorem – Fourier transform pairs – Fourier Sine and Cosine transforms – Properties – Transforms of simple functions – Convolution theorem – Parseval's theorem.

Total No. of Hours: 60

MECHANICS OF SOLIDS

Department of Civil Engineering

(An ISO 9001 20

UNIT I: INTRODUCTION TO FORCE CONCEPT

Equivalent system of forces, rigid bodies, external & internal forces-Application of Statics of Particles-Free body Diagram Concurrent & Non Concurrent Forces - Principles of transmissibility- Equivalent forces & Varignon's theorem. Tension, Compression and Shear stress - Lateral Strain- Poisson's Ratio- Volumetric Strain - Deformation of Simple and Compound Bars - Elastic constants - Composite Sections .

UNIT II: CENTRE OF GRAVITY AND MOMENT OF INERTIA

Areas and volumes - Centroid of simple areas and volumes by integration - Centroid of composite areas - Second moment of areas - Radius of Gyration - Parallel axis and Perpendicular axis theorems - Moment of Inertia of simple areas by Integration -Moment of Inertia of Composite Areas - Mass Moment of Inertia of thin plates and simple solids.

UNIT III: BENDING MOMENT & SHEAR FORCE

Introduction to Bending and S.F- Beams and support conditions - types of supports - types of loads - shear forces and bending moment diagrams for simply supported beams, cantilevers and overhanging beams with all loads.

UNIT IV: ANALYSIS OF STATICALLY DETERMINATE PLANE TRUSSES

Stability and equilibrium of plane frames - Perfect frames - Types of Trusses - Analysis of forces in trusses member - Method of joints - Method of Sections - Tension co-efficient method - Graphical method

UNIT V: BENDING STRESS IN BEAMS & TORSION OF SHAFTS

Theory of simple bending-expression for bending stress-Section modulus-bending stress in symmetrical sections-Theory of torsion-Torsion of circular, hollow circular shafts and power -close coiled helical springs and leaf springs

MECHANICS OF FLUIDS

UNIT I: DEFINITIONS AND FLUID PROPERTIES

Definitions - Fluid and Fluid Mechanics - Dimensions and Units - Fluid properties -Viscosity, Compressibility, Surface tension and Capillarity, Continuum - concept of system and control volume.

UNIT II: FLUID STATISTICS

Pascal's law and Hydrostatic equation - buoyancy -meta centric height - pressure measurement - gauges and manometers.

Stream, streak and path lines - classification of flows - continuity equation - stream and potential functions - flow nets - velocity and acceleration measurement-Problems

UNIT IV: FLUID DYNAMICS

Euler and Bernoulli's equations - application of Bernoulli's equation - discharge measurement -Hagen Poiseuille equation .

UNIT V: FLOW THROUGH PIPES AND DIMENSIONAL ANALYSIS

Darcy Weisbach formula -Major and minor losses of flow in pipes - pipes in series and in parallel - Dimensional analysis - Buckingham π -theorem.

BUILDING SCIENCE AND MATERIALS

UNIT I: BRICKS, AGGREGATES AND CEMENT

Bricks - Classification - Manufacturing process - Test on bricks - Aggregate: Natural Stone Aggregate -Industrial By- product - Crushing strength, impact strength, and flakiness - Abrasion resistance - Grading - sand -Bulking. Cement: Cement Ingredients - Manufacturing Process - Types - Testing of Cement

Department of Civil Engineering

(An 15O 9001 2)

UNIT II: MASONRY& MORTAR

BCE17ES1

Masonry - stone masonry - rubble and Ashlar masonry - Brick masonry - Bond - Definition need and scope - Types of bonds - English and Flemish bond - merits and demerits - composite masonry - solid and hollow block masonry-soilcement bricks-Load bearing and non-load bearing walls- Codal provisions. Mortar - Preparation of Lime and Cement Mortar- Concrete - Ingredients - Manufacturing Process - Batching Plant - Ready Mix Concrete - Paints -Plastics - Glass

UNIT III: SUB STRUCTURE AND SUPER STRUCTURE

Substructure - Setting Out of Foundation and Trenches - Excavation and Timbering - Foundation - Shallow Foundation - Deep Foundation. Super Structure.

UNIT IV: FLOOR, ROOF & STAIR CASE

Floors - Types of floor - Details of concrete and terrazzo floors - Roofs - Types of Roofs - Types of Flat roofs sloping roofs -different types and usage - shell roofs - roof coverings-AC sheets-GI sheets-FRP roofs Water proofing treatment of roofs -tar felt treatment- chemical treatment- Types of weathering courses .Stair Case - Definition -Types of Stair - General Dimension and Requirements - Layout of Stair Case.

UNIT V: BUILDING SERVICES

Damp Proofing- Acoustics Treatment - Thermal Insulation - Fire Protection - Ventilation - Earth Quake Protection-Integration of services in buildings - water supply & plumbing layout for a residential building - elevators & escalators - planning & installation - basic components of the electrical system for a residence .

ENGINEERING GEOLOGY

UNIT I : GENERAL GEOLOGY

BAR17I01

Geology in civil engineering - branches of geology - earth structure and composition - elementary knowledge on continental drift and plate tectonics. Seismo tectonics of the Indian plate, seismic zones of India, Weathering - work of rivers, wind, glaciers.

UNIT II: MINERALOGY

Physical properties of minerals - study of rock forming minerals - quartz family. Feldspar family, augite, hornblende, biotite, muscovite, calcite, garnet - properties, behavior and engineering significance of clay minerals -fundamentals of process of formation of ore minerals - coal and petroleum - their origin and occurrence in India.

UNIT III: PETROLOGY

Classification of Soil and Rock, Types of rock and origin: Igneous (extrusive and intrusive), sedimentary and metamorphic rocks, description occurrence, engineering properties of following rocks. Igneous rocks - granite, diorite, gabbro, pegmatite, dolerite and basalt sedimentary rocks sandstone, limestone, shale, conglomerate and breccia. Metamorphic rocks, quartzite, marble, slate, phyllite, gneiss and schist.

UNIT IV : STRUCTURAL GEOLOGY AND GEOPHYSICAL METHOD

Strength Behavior of Soil and Rock, Stress and strain in rock, failure and shear failure of soil and rock, folds, faults and joints in rock, consequences of failure (earthquakes), Bearing on engineering construction. Seismic and electrical methods for civil engineering investigations.

UNIT V : GEOLOGICAL INVESTIGATIONS IN CIVIL ENGINEERING

Geologic Mapping and Remote Sensing, Topographic maps, geologic maps, aerial photographs, LIDAR, SAR, interpretation for civil engineering projects - geological conditions necessary for construction of dams, tunnels, buildings, road cuttings, landslides - causes and preventions. Sea erosion and coastal protection.

ENGINEERING SURVEYING I

UNIT I: INTRODUCTIONS AND CHAIN SURVEYING

Definition - principles - classification - survey instruments - ranging and chaining - reciprocal ranging - setting perpendiculars -- errors - traversing.

UNIT II : COMPASS SURVEYING AND PLANE TABLE SURVEYING

Prismatic compass - surveyor's compass - bearing - systems and conversions - local attraction - magnetic declination dip - adjustment of error - plane table instruments and accessories - merits and demerits - methods - radiation intersection - resection.

UNIT III : LEVELLING AND APPLICATIONS

Level line - horizontal line - levels and staves - sprit level - bench marks - temporary and permanent adjustments - fly and check leveling - reciprocal leveling - longitudinal and cross sections.

UNIT V : THEODOLITE SURVEYING

Theodolite - vernier - description and uses - temporary and permanent adjustments of vernier transit - swinghorizontal angles - vertical angles - measurements of angles and distances - omitted measurements.

Total No. of Hours: 45

Department of Civil Engineering

BCE17ET1

UNIT IV : CONTOURING

Contouring - methods -characteristics and uses of contours - plotting - calculation of areas and volumes- earth work volume.

BUILDING DRAWING PRACTICE

Experiments

- Basic concept, purpose, function and types of building (Residential, Industrial and Institutional)
- Principles of site selection, orientation of buildings and distribution of space.
- Line plan. Development of plan from a line plan.
- Details of Doors, windows, foundation and stair case etc.
- Single storied residential building with flat and tiled roof.
- Public buildings like office, dispensary, post office, bank etc.
- Factory building with trusses supported on Brick walls and pillars.

Total No of Hours: 30 hrs

SURVEYING FIELD WORK

| UNIT I : CHAIN SURVEYING | 4Hrs |
|--|--------------|
| Ranging – Chaining – Traverse | |
| UNIT II : COMPASS SURVEYING | 4 Hrs |
| Traverse | |
| UNIT III : PLANE TABLE SURVEYING | 6 Hrs |
| Triangulation to find distance between inaccessible points with and without known scale – Three-Point Two-Point Problem. | Problem – |
| UNIT IV: LEVELLING | 8 Hrs |
| Study of levels and leveling staff - Fly leveling using dumpy level - Fly leveling using tilting level - Che | ck leveling. |
| UNIT V : THEODOLITE | 8 Hrs |

UNIT V : THEODOLITE

Study of Theodolite Measurement of angles by reiteration and repetition - Measurement of vertical angles

Total No of Hours: 30

GEOLOGY AND BUILDING MATERIALS LAB

COURSE CONTENT:

ENGINEERING GEOLOGY

- 1. Study of Geological map and section of local area
- 2. Study the various properties of igneous rocks, sedimentary and metamorphic through rocks samples.
- 3. Study the various properties of different minerals and mineral ores through samples.
- 4. Study the various types of folds and faults.
- 5. Physical properties of minerals such as, hardness, colour, streak, etc.
- 6. Numerical Problems related to Dip and Strike
- 7. Study of different geological features through models
- 8. Field visit

BUILDING MATERIALS

- 1. Assessment of physical properties of bricks such as absorption, shape and size, structure, soundness,
- Hardness, presence of soluble salts.
- 2. Hardness, impact and water absorption test etc for stones
- 3. Study on different types of bonds for bricks and stones
- 4. Study on defects in timber

BMA17010 NUMERICAL METHODS FOR MECHANICAL & CIVIL ENGINEERS

UNIT I : SOLUTION OF EQUATIONS

Solution of Algebraic and Transcendental equations - Method of false position - Iteration method - Newton-Raphson method -Linear system- Applications of: Gauss Elimination method - Gauss-Jordan method - Iterative methods -Gauss-Jacobi method - Gauss-Seidel method - Matrix Inversion by Gauss-Jordan method.

UNIT II: INTERPOLATION

Newton forward and backward differences - Central differences - Sterling's and Bessel's formulae - Interpolation with Newton's divided differences - Lagrange's method.

UNIT III: NUMERICAL DIFFERENTIATION AND INTEGRATION

Numerical Differentiation with interpolation polynomials - Numerical Integration by Trapezoidal and Simpson's (both 1/3 rd & 3/8 th) rules – Two and three point Gaussian Ouadrature formulae – Double integrals using Trapezoidal and Simpson's rules.

UNIT IV: NUMERICAL SOLUTIONS OF ORDINARY DIFFERENTIAL EQUATIONS 12 Hrs

Taylor's series - Euler's & Modified Euler's method - Runge Kutta method of fourth order for first & second order differential equations - Milne's predictor-corrector method - Adam-Bashforth's predictor-corrector method.

UNIT V: NUMERICAL SOLUTIONS OF PARTIAL DIFFERENTIAL EQUATIONS 12 Hrs

Finite difference solutions for one dimensional heat equation (both implicit & explicit) - Bender-Schmidt method -Crank-Nicolson method - One dimensional wave equation - Two dimensional Laplace and Poisson equations -Liebmann's method.

Total No. of Hours: 60

STRENGTH OF MATERIALS

UNIT I : ENERGY PRINCIPLES

Strain energy and strain energy density - Strain energy in tension, shear, flexure and torsion - Castigliano's & Engessor's energy theorems- Principle of Virtual Work- Application of energy theorems for computing deflection in Determinate structures - Maxwell's reciprocal theorem.

UNIT II : DEFLECTIONS

BCE17003

Methods of Deflection Determination of Deflection curve - computation of slopes and deflections in Determinate Beams - Double Integration method - Macaulay's method - Area Moment method - Conjugate Beam method.

UNIT III : INDETERMINATE BEAMS

Propped Cantilever and Fixed Beams - Fixed End Moments and Reactions for Standard cases of Loading -Continuous Beams - Theorem of Three Moments - Analysis of Continuous Beams - S.F. and B.M. Diagrams for Continuous Beams.

UNIT IV: COLUMNS

Eccentrically Loaded Short Columns Middle Third Rule - Core of Section - Columns of Unsymmetrical Sections -Rankine - Gordon Formula Eccentrically Loaded Long Columns. Theories of Failure - Principal Stress, Principal Strain, Shear Stress, Strain Energy and Distortion Energy Theories.

UNIT V: BENDING OF BEAMS

Bending of Beams of Symmetrical and Unsymmetrical Sections - Box sections and its importance --- Winkler Bach Formula - Shear Center Simple problems

APPLIED HYDRAULIC ENGINEERING

4.G.R ND RESEARCH INSTITUTE

FLOW IN OPEN CHANNEL

BCE17004

UNIT I : INTRODUCTION

Open channel flow - types and regime of flow - velocity distribution in open channel - specific energy - critical flow and its computation.

UNIT II : UNIFORM AND RAPIDLY VARIED FLOW

Uniform flow - velocity measurement - manning's and Chezy's formula - determination of roughness coefficients most economical sections- Rectangular, Circular and Trapezoidal channel sections. Hydraulic jump - types - energy dissipation - surges

HYDRAULIC MACHINES

UNIT III: ROTODYNAMIC PUMPS

Introduction - classification - Rotodynamic pumps: centrifugal pumps - work done - losses - specific speed minimum speed to start the pump- multistage pumps- parallel and series.

UNIT IV : POSITIVE DISPLACEMENT PUMPS

Positive displacement pumps - reciprocating pump –work done- slip - air vessels(theory only)

UNIT V : TURBINES

Classification - Pelton wheel turbine -work done-Francis turbine -work done- draft tube -Kaplan turbine -work done.

Total No of Hours: 60

BCE17005 CONCRETE AND CONSTRUCTION TECHNOLOGY

UNIT I : CONCRETE MAKING MATERIALS

Manufacture and Components of Portland Cement- Hydration Process- Types of Cement, Aggregates - Classification and Properties Admixtures.

UNIT II: MIX DESIGN

Properties of Fresh Concrete- Workability, Segregation and Bleeding of Concrete - Factors influencing Mix Proportions - I.S and ACI Methods of Mix Design.

UNIT III : PROPERTIES OF HARDENED CONCRETE

Strength - Creep and Shrinkage - Durability of Concrete - Chemical Attack - Different Types of FRC - Properties and Applications.

UNIT IV: SUB STRUCTURE CONSTRUCTION

Piling techniques – Sheet piles – Under water construction of Diaphragm wall and basement – Driving diaphragm walls – Driving well and caisson – Sinking coffer dam – Shoring for deep cutting – Well points – Dewatering and stand by plant equipment for underground open excavation.

UNIT V : SUPER STRUCTURE AND CONSTRUCTION EQUIPMENTS

Construction sequences in cooling Towers, Bunkers, Silos and Chimney – Pre- stressed construction – In situ prestressing in high rise structures – Erecting light weight components on tall structures. Types of earth work equipment's - Tractors, Motor graders, Scrappers - Equipment for compaction – Batching and mixing and concreting.

Total No of Hours : 45

REMOTE SENSING AND GIS

UNIT I: INTRODUCTION TO REMOTE SENSING

Definition – components of remote sensing –, Energy sources and radiation principles, electromagnetic radiation (EMR) – EMR spectrum, active and passive remote sensing – platforms — visible, infra red (IR), near IR, middle IR, thermal IR and microwave - black body radiation - Planck's law - Stefan-Boltzman law.

UNIT II : EMR INTERACTION WITH ATMOSPHERE AND EARTH MATERIALS 9 Hrs

Atmospheric characteristics, scattering of EMR - Raleigh, MIE, non-selective and Raman scattering - EMR interaction with water vapour and ozone - atmospheric windows - significance of atmospheric windows - EMR interaction with earth surface materials - radiance, irradiance, incident, reflected, absorbed and transmitted energy reflectance – specular and diffuse reflection surface- spectral signature – spectral signature curves – EMR interaction with water, soil and earth surface

UNIT III: OPTICAL AND MICROWAVE REMOTE SENSING SYSTEMS

Satellites - classification - based on orbits - sun synchronous and geo synchronous - based on purpose - earth resource satellites, communication satellites, weather satellites, spy satellites, spectral, radiometric and spatial resolutions, Multispectral, thermal and hyper spectral sensing, along and across track scanners - description of sensors in land sat, spot, irs series - current satellites - radar - speckle - back scattering - side looking airborne radar synthetic aperture radar - radiometer - geometrical characteristics

UNIT IV: GEOGRAPHIC INFORMATION SYSTEM

GIS – components of GIS, data – spatial and non-spatial – maps – types of maps – projection – types of projection raster and vector data structures - comparison of raster and vector data structure - GIS analysis using raster and vector data - DEM for Slope, Aspect, Flow direction, Flow pathways, Flow accumulation, Streams, Catchment area delineation, retrieval, reclassification, overlaying, buffering - data output.

UNIT V: IMAGE PROCESSING AND APPLICATIONS OF RS & GIS

Visual interpretation of satellite images - elements of interpretation - interpretation keys, Digital Image Processing application of remote sensing and GIS – urban applications - integration of GIS and remote sensing – Remote sensing applications for watershed management, Rainfall runoff modeling, Irrigation management, Flood mapping, Drought assessment, Environment and ecology, urban analysis -resources information systems.

> **Total No of Hours :** 45

SOFT SKILLS - I CAREER & CONFIDENCE BUILDING BEN17ET2 1012

UNIT - I

Creation of awareness of top companies / improving skill set matrix / Development of positive frame of mind / Creation of self-awareness.

UNIT – II

Group discussions / Do's and don'ts – handling group discussions / what evaluators look for interpersonal relationships / Preparation of Curriculum Vitae / Resume.

UNIT - III

Interview – awareness of facing questions – Do's and don'ts of personal interview / group interview, enabling students to prepare for different proce3dures such as HR interviews and Technical Interviews / self-introductions.

UNIT – IV

Verbal aptitude, Reading comprehension / narration / presentation / Mock Interviews.

UNIT - V

Practical session on Group Discussion and written tests on vocabulary and reading comprehension

Practical component P : Include case studies / application scenarios

Research component R : Future trends / research areas / Comparative Analysis

ENGINEERTING SURVEY- II

UNIT I: ENGINEERING SURVEYS

Curve ranging - Horizontal and vertical curves - Simple Curves - setting with chain and tapes, tangential angles by theodolite, double theodolite - Compound and reverse curves - Transition curves - Functions and requirements -Setting out by offsets and angles - Vertical curves

UNIT II : TACHEOMETRIC SURVEYING

Tacheometric systems - Tangential, stadia and subtense methods - Stadia systems - Horizontal and inclined sights -Vertical and normal staffing - Fixed and movable hairs - Stadia constants - Anallactic lens - Subtense bar.

UNIT III: CONTROL SURVEYING

Working from whole to part - Horizontal and vertical control methods - Triangulation - Signals - Base line -Instruments and accessories - Corrections - Satellite station - Reduction to centre - Trignometric levelling - Single and reciprocal observations - Modern trends.

UNIT IV : SURVEY ADJUSTMENTS

Errors - Sources, precautions and corrections - Classification of errors - True and most probable values -weighted observations - Principle of least squares - Normal equation - Correlates.

UNIT V: PHOTOGRAMMETRY -

Photogrammetry - Introduction - Terrestrial and aerial Photographs - Stereoscopy -Parallax - Electromagnetic distance measurement - Carrier waves - Principles - Instruments Hydrographic Surveying - Tides - MSL - Sounding and methods - Location of soundings and methods - Three point problem - Strength of fix -Sextants and station pointer - River surveys - Measurement of current and discharge -

BCE17L04

STRENGTH OF MATERIALS AND CONCRETE LAB

STRENGTH OF MATERIALS LAB

- 1. Tension test on mild steel and for steel rods.
- 2. Compression test on wooden specimen
- 3. Double shear test on mild steel and aluminum rods.
- 4. Torsion test on mild steel rod.
- 5. Impact test on metal specimen
- 6. Hardness tests on metals like mild steel, brass, copper and aluminum.
- 7. Deflection test on metal beam
- 8. Compression test on helical spring

Total No of Hours: 15

CONCRETE LAB

1. Tests on Cement

a.Specific Gravity,

- b. Normal consistency,
- c. Initial and Final setting time of cement
- 2. Test on Aggregate
 - a. Sieve analysis
 - b. Specific gravity
 - c. Water Absorption
- 3. Tests on Freshly Mixed Concrete
 - Compaction Factor,
 - Slump Value.

Total No of Hours: 15

BCE17TS1 ADVANCED SURVEYING FIELD WORK AND GIS LAB (Technical skill 1-Evaluation)

a. ADVANCED SURVEYING LAB

UNIT I : TACHEOMETRY

Tangential system (using theodolite, leveling staff)

Stadia system (using theodolite, leveling staff)

Sub tense system (using theodolite, tape, cross staff, leveling staff)

UNIT II: SETTING OUT WORKS

Foundation marking (using theodolite, tape, ranging rods)

Simple curve - right / left handed (using theodolite, tape, ranging rods)

Transition curve (using theodolite, tape, ranging rods)

UNIT III: FIELD ASTRONOMY

Field observation for the calculation of azimuth (using theodolite, tape), Total

Station

b. Applications of Remote Sensing and GIS Lab

- 1. Introduction to basics of digital images and Data (Vector and Raster)
- 2. Interpretation of satellite images
- 3. Understanding the basic principles of Photogrammetry.
- 4. An introduction to image classification.
- 5. Interpreting RADAR images.
- 6. Extracting information from thermal remote sensing data.
- 7. Using GIS Software for plotting points, lines, polygons on maps.
- 8. Use of GIS in selection of Landfill site.

Total No of Hours: 30 hrs

BCE17006

UNIT I: DEFLECTION OF DETERMINATE STRUCTURES

Principles of virtual work for deflections - Deflections of pin-jointed plane frames and rigid Plane Frames.

UNIT II: SLOPE DEFLECTION METHOD

Analysis of continuous Beams – cantilever beams - Continuous beams and rigid frames (with and without sway) - Symmetry and Asymmetry -Portal Frames.

UNIT III: MOMENT DISTRIBUTION METHOD

Stiffness and carry over factors –Balance – Distribution and carryover of moments - Analysis of continuous Beams - Plane rigid frames with and without sway – Structural frames

UNIT IV: SPACE STRUCTURES

Introduction to analysis of space trusses using method of tension coefficients – Beams curved in plan.

UNIT V: MOVING LOADS AND INFLUENCE LINES (DETERMINATE)

Influence lines for reactions in statically determinate structures – influence lines for member forces in pin jointed frames – Influence lines for shear force and bending moment in beam sections

Department of Civil Engineering

BCE17007 DESIGN OF CONCRETE STRUCTURES - I

UNIT I: INTRODUCTION AND LIMIT STATE DESIGN OF BEAMS

Properties of different grades of concrete and steel, Permissible stresses, - advantages of limit state method over other methods - understanding the behavior of R.C.C. members. Introduction to IS 456-2000, SP: 16. Characteristic values, partial safety factor, stress strain relationship - stress block parameters, failure criteria Analysis, design and detailing of singly reinforced & doubly reinforced beam.

UNIT II: LIMIT STATE DESIGN FOR SLABS

Design and detailing of one-way and two-way slab panels as per IS code provisions.

UNIT III: LIMIT STATE DESIGN FOR BOND ,ANCHORAGE SHEAR AND TORSION 12 Hrs

Behavior of RC beams in shear and torsion-shear and torsion reinforcement-Limit State Design of R C members for combined bending shear and torsion- use of design aids

UNIT IV : LIMIT STATE DESIGN OF COLUMNS

Basic assumptions - Types of columns - Slenderness' limits for column- minimum eccentricity - Design and detailing of reinforced concrete short columns of rectangular and circular cross sections under axial load.- column under compression and bi axial bending using IS 456;2000.Examples for practices

UNIT V: LIMIT STATE DESIGN OF FOOTINGS

Design and detailing of isolated footing for column subjected to axial loads, Design and detailing of Axially and eccentrically loaded Rectangular footings-Design and detailing of Combined Rectangular footings for Two Columns.

Total No of Hours: 60

SOIL MECHANICS

UNIT I: SOIL CLASSIFICATION AND COMPACTION

Nature of soil - phase relationships - soil description and classification for engineering purposes - IS classification system - soil compaction - theory, comparison of laboratory and field compaction methods – Factors influencing compaction behaviour of soils.

UNIT II: SOILWATER AND WATER FLOW

Soil water - static pressure in water - Effective stress concepts in soils - capillary stress - permeability measurement in the laboratory and field - factors influencing permeability of soil - seepage - introduction to flow nets - simple problems.

UNIT III: STRESS DISTRIBUTIONS AND SETTLEMENT

Effective stress concepts in solids - stress distribution in soil media - use of influence charts - components of settlement - factors influencing settlement of soil - immediate and consolidation settlement - Tergazhi's one dimensional consolidation theory - computation of rate of settlement.

UNIT IV: SHEAR STRENGTH

Shear strength of cohesive and cohesion less soils - Mohr - Coulomb failure theory - saturated soil mass - Pore pressure parameters - Liquefaction.

UNIT V: SLOPE STABILITY

Slope failure mechanisms - types - infinite slopes - finite slopes - total stress analysis for saturated clay - method of slices - friction circle method - use of stability number.

TRANSPORTATION ENGINEERING

UNIT I HIGHWAY PLANNING AND ALIGNMENT

Significance of highway planning –History of road development in India – Classification of highways – Locations and functions – Factors influencing highway alignment – Soil suitability analysis - Engineering surveys for alignment, objectives, conventional and modern methods.

UNIT II GEOMETRIC DESIGN OF HIGHWAYS

Typical cross sections of Urban and Rural roads — Cross sectional elements - Sight distances – Horizontal curves, Super elevation, transition curves, widening at curves – Vertical curves - Gradients, Special consideration for hill roads - Hairpin bends – Lateral and vertical clearance at underpasses.

UNITIII RAILWAYS PLANNING CONSTRUCTION AND MAINTENANCE

Elements of permanent way – Rails, Sleepers, Ballast, rail fixtures and fastenings, - Track Stress, coning of wheels, creep in rails, defects in rails - Geometric design of railways, gradient, super elevation, widening of gauge on curves-Points and Crossings. Tunneling Methods, drainage and ventilation –Calculation of Materials required for track laying - Construction and maintenance of tracks – Modern methods of construction & maintenance

UNIT IV AIRPORT PLANNING & DESIGN

Airport planning, components of airports, airport site selection Runway design- orientation, geometric design and correction for gradients Terminal area, airport layout, airport buildings, passenger facilities, parking area and airport zoning

UNIT V HARBOUR ENGINEERING

Definition of terms - harbors, ports, docks, tides and waves. Harbors – requirements, classification – site investigation for locations, planning and layouts Terminal facilities – port buildings, warehouse, transit sheds, inter-modal transfer facilities, mooring accessories, navigational aids coastal structures piers, breakwaters, wharves, jetties, quays.

ENERGY CONSERVATION TECHNIQUES

UNIT I: INTRODUCTION

Fundamentals of energy- Energy Production Systems-Heating, Ventilating and Airconditioning – Solar Energy and Conservation - Energy Economic Analysis - Energy conservation and audits - Domestic energy consumption savings - challenges -primary energy use in buildings - Residential - Commercial - Institutional and public buildings - Legal requirements for conservation of fuel and power in buildings.

UNIT II : ENVIRONMENTAL

Energy and resource conservation - Design of green buildings - Evaluation tools for building energy -Embodied and operating energy - Peak demand - Comfort and Indoor Air quality - Visual and acoustical quality - Land, water and materials ..

UNIT III: DESIGN

Natural building design consideration - Energy efficient design strategies - Contextual factors - Longevity and process Assessment - Renewable Energy Sources and design - Advanced building Technologies - Smart buildings - Economies and cost analysis.

UNIT IV: SERVICES

Energy in building design - Energy efficient and environment friendly building - Thermal phenomena - thermal comfort - Indoor Air quality - Climate, sun and Solar radiation, - Psychometrics - passive heating and cooling systems - Energy Analysis - Active HVAC systems - Preliminary Investigation - Goals and policies - Energy audit -Types of Energy audit- Energy flow diagram - Energy consumption / Unit Production - Identification of wastage-Priority of conservative measures.

UNIT V: ENERGY MANAGEMENT

Energy management of electrical equipment - Improvement of power factor - Management of maximum demand -Energy savings in pumps – Fans – Compressed air systems – Energy savings in Lighting systems – Air conditioning systems – Applications.

BCE17ET4 WATER RESOURCES & IRRIGATION ENGINEERING

UNIT I :WATER RESOURCES

Water resources survey - Water resources of India and Tamilnadu - Description of water resources planning -Estimation of water requirements for irrigation and drinking- Single and multipurpose reservoir - Multi objective -Fixation of Storage capacity -Strategies for reservoir operation - Design flood-levees and flood walls.

UNIT II WATER RESOURCE MANAGEMENT

Economics of water resources planning; - National Water Policy - Consumptive and non- consumptive water use -Water quality - Scope and aims of master plan - Concept of basin as a unit for development - Water budget-Conjunctive use of surface and ground water

UNIT III: IRRIGATION ENGINEERING

Irrigation - Need and mode of Irrigation - Merits and demerits of irrigation - Need - Merits and Demerits - Duty, Delta and Base period – Irrigation efficiencies – Crops and Seasons - Crop water Requirement – . Canal irrigation – Lift irrigation – Tank irrigation – Flooding methods – Merits and Demerits – Sprinkler irrigation – Drip irrigation

UNIT IV : DIVERSION AND IMPOUNDING STRUCTURES

Weirs – elementary profile of a weir – weirs on pervious foundations - Types of Impounding structures - Tanks, Sluices and Weirs - Gravity dams - Earth dams - Arch Dams - Spillways - Factors affecting location and type of dams - Forces on a dam - Hydraulic design of dams

UNIT V: CANAL IRRIGATION

Alignment of canals - Classification of canals - Canal drops - Hydraulic design of drops - Cross drainage works -Hydraulic design of cross drainage works - Canal Head works - Canal regulators - River Training works.

Total No of Hours: 45

GEOTECHNICAL ENGINEERING LABORATORY

LIST OF EXPERIMENTS

- 1. Specific gravity of soil solids
- 2. Grain size distribution Sieve analysis Hydrometer analysis
- 3. Atterberg limits test Liquid limit, Plastic limit and shrinkage limit tests
- 4. Field density Test
- 5. Determination of moisture Density relationship using standard proctor.
- 6. Permeability determination (constant head and falling head methods)
- 7. Direct shear test on cohesion less soil
- 8. Unconfined compression test in cohesive soil
- 9. Tri axial compression test in cohesion less soil
- 10. Laboratory Vane shear test in cohesive soil
- 11. One dimensional Consolidation test (Determination of coefficient of consolidation only)

Total No of Hrs = 30 hrs

BAR17IL2 BUILDING DRAWING USING CIVIL ENGINEERING SOFTWARE

EXPERIMENTS

- 1. Learn and use basic AutoCAD commands manage drawing using layers, colour and line types complete basic cad drawings, with borders, text and dimensions use and edit text and text styles Method of scales in various drawing understand and the use of blocks.
- 2. Development of line plan for residential building. one for single storied building and another for two storied building.
- 3. Submission drawing for residential building including its planning and with area and parking statements and all other details as per the norms and local bye-laws.
- 4. Industrial buildings with roof truss.
- 5. To draw the 3D view of residential building.

Total No of Hours: 30 hrs

BCE17L07

INPLANT TRAINING

INDUSTRIAL TRAINING

Soil Investigation

Construction-different types of foundation, Highways and Embankments

Prestressing- Bridges

Industrial Structures- steel-fabrication and erection

Specification for various works- measurement and Billing

OFFICE TRAINING

Architectural plan

Latest civil Engineering softwares based on design and analysis

Students have to visit at least one industry relevant to civil engineering as part of industrial training and spend a minimum of 15 days during semester break between VI and VII semester. A report of the same should be submitted at the beginning of the 7th semester and evaluation shall be conducted based on the report, presentation and viva-voce.

STRUCTURAL ANALYSIS II

UNIT I: ARCHES

Arches structural forms - Examples of arch structures - Types of arches - Analysis of three hinged, two hinged and fixed arches, parabolic and circular arches - Settlement and temperature effects

UNIT II: SUSPENSION BRIDGES

Analysis of suspension bridges – Un stiffened cables and cables with three hinged stiffening girders – Influence lines for three hinged stiffening girders.

UNIT III: MATRIX METHOD FOR INDETERMINATE FRAMES

Equilibrium and compatibility - Determinate Vs indeterminate structures --Indeterminacy - primary structure -Compatibility conditions - Analysis of indeterminate pin-jointed plane frames, continuous beams. Element and global stiffness and flexibility matrices- Co-ordinate transformations - transformations of stiffness matrices - Analysis of Continuous Beams.

UNIT IV : PLASTIC ANALYSIS OF STRUCTURES

Statically indeterminate axial problems - Beams in pure bending - Plastic moment of resistance - Plastic modulus -Shape factor - Load factor - Plastic hinge and mechanism - Plastic analysis of indeterminate beams and frames -Upper and lower bound theorems.

UNIT V: FINITE ELEMENT METHOD

Introduction- Discretisation of a structure- Displacement functions- Truss element- Beam element- Plane stress and plane strain- Triangular elements

FOUNDATION ENGINEERING

UNIT I: SOIL EXPLORATION

BCE17011

Scope and objectives - method of exploration - auguring and boring - wash boring and rotary drilling - depth of boring - spacing and depth of bore hole - sampling - representative and undisturbed - sampling techniques - split spoon sampler, thin tube sampler, stationary piston sampler - bore log and report - penetration tests (SPT and SCPT) - Selection of foundation.

UNIT II: SHALLOW FOUNDATION

Introduction - location and depth of foundation - codal provision - bearing capacity of shallow foundation on homogeneous deposits - Terzaghi's formula and BIS formula - factors affecting bearing capacity - problems- bearing capacity from in situ tests (SPT, SCPT and plate load) allowable bearing pressure - components of settlement determination of settlement of foundation on granular and clay deposit - total and differential settlement - allowable settlement - codal provision.

UNIT III: FOOTINGS AND RAFTS

Types of foundation - contact pressure distribution below footings, design of footings, isolated footing, combined footing, mat foundation - types - Applications - proportioning- floating foundation - codal provision.

UNIT IV: PILE FOUNDATION

Types of piles and their function - factors influencing the selection of pile - load carrying capacity of single pile in granular and cohesive soils - static formulae - dynamic formulae (engineering news and hiley's) - capacity from insitu tests (SPT and SCPT) - negative skin friction - uplift capacity - group capacity by different methods (feld's rule, converse - Labarra formula and block failure criterion) - settlement of pile groups -interpretation of pile load test (routine test only) - under reamed piles - capacity under compression and uplift .

UNIT V: RETAINING WALLS

Plastic equilibrium in soils - active and passive states - Rankine's theory - cohesionless, effect of water table andcohesive soil - coloumb's wedge theory - condition for critical failure plane - earth pressure on retaining wallsof simple configurations - Rebhann and Culmann's graphical method - stability analysis of retaining walls.

Total No of Hours: 45

BEN17ET5

SOFT SKILL- II

(Common to all E&T courses)

UNIT I Logical Reasoning I

Logical Statements – Arguments – Assumptions – Courses of Action.

UNIT II Logical Reasoning II

Logical conclusions – Deriving conclusions from passages – Theme detection.

UNIT III Arithmetical Reasoning I

Number system – H.C.F & L.C.M – Problem on ages – Percentage – Profit & Loss – Ratio & Proportion – Partnership.

UNIT IV Arithmetical Reasoning II

Time & Work – Time & Distance – Clocks – Permutations & Combinations – Heights & Distances – Odd man out and Series.

UNIT V Data Interpretation

Tabulation – Bar graphs – Pie graphs – Line graphs.

Department of Civil Engineering ENVIRONMENTAL AND HYDRAULIC STRUCTURES DRAWING

UNIT I: WATER SUPPLY AND TREATMENT

Design & Drawing of flocculate, clarifier - Rapid sand filter - House service connection for water supply and drainage.

UNIT II: SEWAGE TREATMENT & DISPOSAL

Design and Drawing of screen chamber - Grit channel - Primary clarifier - Activated sludge process - Aeration tank - Secondary clarifiers - Sludge digester - Sludge drying beds - Waste stabilization ponds - Septic tanks and disposal arrangements - Manholes.

UNIT III: IMPOUNDING STRUCTURES

Gravity dam, Tank Surplus Weir, Tank Sluice with tower road - Drawing showing plan, Elevation, half section including foundation details.

UNIT IV: CANAL TRANSMISSION STRUCTURES

Aqueducts – Syphon Aqueducts – Super passage – Canal siphon – Canal Drops- Drawing Showing plan, elevation and foundation details.

UNIT V: CANAL REGULATION STRUCTURES

Canal head works- Canal Regulator - Canal escape- Proportional Distributors - Drawing showing detailed plan, elevation and foundation.

BCE17L10 STRUCTURAL ANALYSIS AND DESIGN BASED ON CIVIL ENGINEERING SOFTWARE

LIST OF EXPERIMENTS

- 1. Introduction to staad pro Joint, Member/Element, Mesh Generation with flexible user-controlled numbering
- 2. Analyse and design any beam with any loading type and any kind of supports.
- 3. Analyse and design of any 2D Frame with any loading type for any load sets.
- 4. Portal frame with 5 load combinations- Analysis
- 5. Analysis of beam with moving load
- 6. Analyse steel structures with truss elements.

BCE17L11

MINI PROJECT OBJECTIVE

The objective of project work is to enable the students to work in convenient groups of not more than four members in a group on a project involving design related to civil engineering. Every project work shall have a guide who is a member of the faculty of the university.

Three periods per week shall be allotted in the time table for this important activity and this time shall be utilized by the students to receive directions from the guide, on library reading, laboratory work, computer analysis or field work as assigned by the guide and also to present in periodical seminars the progress made in the project. Each student shall finally produce a comprehensive report covering background information, design data, design, detailing, drawing and conclusions. This final report shall be typewritten form as specified in the guidelines. The continuous assessment and semester evaluation may be carried out as specified in the guidelines to be issued from time to time.

DETAILING OF R.C. AND STEEL STRUCTURES

TECHNICAL SKILL III (EVALUATION)

Course Outline:

Student should learn about detailing of Reinforced concrete structures and steel structures detailing and quantity of steel calculation.

R.C.C Member

- 1. One way slab
- 2. Two way slab
- 3. Cantilever slab
- 4. Beam
- 5. Column
- 6. Footing

Steel Structures

- 1.Roof Trusses
- 2. Beam Column joint
- 3.Gantry Girder
- 4.Plate Girder

DESIGN OF STEEL STRUCTURES

UNIT I INTRODUCTION

BCE17012

Properties of steel – Structural steel sections – Limit State Design Concepts – Loads on Structures – Connections using rivets, welding, bolting – Design of bolted and welded joints – Eccentric connections - Efficiency of joints.

UNIT II TENSION MEMBERS

Types of sections – Net area – Net effective sections for angles and Tee in tension – Design of connections in tension members – Use of lug angles – Design of tension splice – Concept of shear lag

UNIT III COMPRESSION MEMBERS

Types of compression members – Theory of columns – Basis of current codal provision for compression member design – Slenderness ratio – Design of single section and compound section compression members – Design of laced and battened type columns – Design of column bases – Gusseted base

UNIT IV BEAMS

Design of laterally supported and unsupported beams – Built up beams – Beams subjected to uniaxial and biaxial bending – Design of plate girders - Intermediate and bearing stiffeners – Flange and web splices.

UNIT V ROOF TRUSSES AND INDUSTRIAL STRUCTURES

Roof trusses – Roof and side coverings – Design of purlin and elements of truss; end bearing – Design of gantry girder.

Total No of Hours: 60

CONSTRUCTION MANAGEMENT

UNIT I: NETWORK TECHNIQUES

Introduction to network techniques - Use of CPM and PERT for planning - Scheduling and control of construction work, bar charts Error in networks, Types of nodes and node numbering systems.

UNIT II: CONSTRUCTION PLANNING

Basic concepts in the development of construction plan - Planning for construction and site facilities using networks -Preparation of construction schedules for jobs, materials, and equipment using CPM.

UNIT III: COST CONTROL OF CONSTRUCTION

Construction quality control and inspection - Significance of variability and estimation of risks - Construction cost control - Crashing of networks.

UNIT IV : QUALITY AND SAFETY DURING CONSTRUCTION

Importance of Quality and safety - Organizing for quality and safety - safety measures - Prevention of fire at construction site - Elements and organization of quality - Quality assurance techniques.

UNIT V MANAGEMENT INFORMATION SYSTEM

Definition of MIS - Requirement of MIS - Database approach - Types of project information - Accuracy and use of information.

Total No of Hours: 60

PRINCIPLES OF MANAGEMENT

OBJECTIVES:

BMG17001

To increasing organizational effectiveness, To achieve optimum utilization of various resources.

To have co-ordination between various department in the organization.

UNIT-I

UNIT-II

Management: Importance - Definition - Nature and Scope of Management Process - Role and Functions of a Manager - Levels of Management - Development of Scientific Management and other Schools of thought and approaches.

Planning: Nature - Importance - Forms - Types - Steps in Planning - Objectives - Policies - Procedures and Methods – Natures and Types of Policies – Decision – making – Process of Decision – making – Types of Decision.

UNIT-III

Organisation: Types of Organisations - Organisation Structure - Span of Control and Committees -Departmentalisation - Informal Organisation.

UNIT-IV

Authority - Delegation - Decentralisation - Difference between Authority and Power - Responsibility - Recruitment - Sources, Selection, Training - Direction - Nature and Purpose.

UNIT-V

Co-ordination - Need, Type and Techniques and requisites for excellent Co-ordination - Controlling - Meaning and Importance - Control Process.

Department of Civil Engineering ESTIMATION AND EVALUATION PRACTICAL

BCE17L13

LIST OF EXPERIMENTS:

- 1. Detailed Estimate [Duration and Cost] for a two storey building.
- 2. Detailed estimate for following projects:

[i] a culvert.

- [ii] stretch of road about 1 Km long including earthwork.
- [iii] Elevated water tanks.
- [iv] Manholes, Septic tanks.
- [v] Water supply Scheme and
- [vi] Drainage Scheme.
- 3. Estimate of Electrification Work for a Material Testing Laboratory.
- 4. Time Estimate by Network Analysis.
- 5. Estimation of Air Conditioning requirements for a Library.
- 6. Valuation reports for:
- [i] A hotel
- [ii] A Theatre
- [iii] An Educational Building

Total No of Hours : 30

PROJECT PHASE-I

OBJECTIVE

To guide the students such a way that the students carry out a comprehensive work on the chosen topic which will stand them in good stead as they face real life situations

The objective of project work is to enable the students to work in convenient groups of not more than four members in a group on a project involving theoretical and experimental studies related to civil engineering. Every project work shall have a guide who is a member of the faculty of the university.

Each student shall finally produce a comprehensive report covering background information, literature survey, problem statement, project work details and conclusions. This final report shall be typewritten form as specified in the guidelines.

The continuous assessment and semester evaluation may be carried out as specified in the guidelines to be issued from time to time.

TOTAL QUALITY MANAGEMENT

OBJECTIVE

BMG17003

Meeting the customer's requirements is the primary objective and the key to organisational survival and growth.; The second objective of TQM is continuous improvement of quality. The management should stimulate the employees in becoming increasingly competent and creative.

UNITI: INTRODUCTION

Definition of quality, dimensions of quality, quality planning, quality costs - analysis techniques for quality costs, basic concepts of total quality management, historical review, principles of TQM, leadership - concepts, role of senior management. Quality council, quality statements, strategic planning, Deming philosophy, BARRIEs to TQM implementation.

UNIT II: TQM PRINCIPLES

Customer satisfaction – customer perception of quality, customer complaints, service quality, customer retention, employee involvement - motivation, empowerment, teams, recognition and reward, performance appraisal, benefits, continuous process improvement – juran trilogy, pdsa cycle, 5s, kaizen, supplier partnership – partnering, sourcing, supplier selection, supplier rating, relationship development, performance measures - basic concepts, strategy, performance measure.

UNIT III: STATISTICAL PROCESS CONTROL (SPC)

The seven tools of quality, statistical fundamentals – measures of central tendency and dispersion, population and sample, normal curve, control charts for variables and attributes, process capability, concept of six sigma, new seven management tools.

UNIT IV: TQM TOOLS

Benchmarking - reasons to benchmark, benchmarking process, quality function deployment (QFD) - house of quality, QFD process, benefits, taguchi quality loss function, total productive maintenance (TPM) - concept, improvement needs, FMEA - stages of FMEA.

UNIT V : QUALITY SYSTEMS

Need for iso 9000 and other quality systems, iso 9000:2000 quality system - elements, implementation of quality system, documentation, guality auditing, gs 9000, iso 14000 – concept, requirements and benefits.

PROJECT PHASE-II

OBJECTIVE

The objective of project work is to enable the students to work in convenient groups of not more than four members in a group on a project involving theoretical and experimental studies related to civil engineering. Every project work shall have a guide who is a member of the faculty of the university.

Fourteen periods per week shall be allotted in the time table for this important activity and this time shall be utilized by the students to receive directions from the guide, on library reading, laboratory work, computer analysis or field work as assigned by the guide and also to present in periodical seminars the progress made in the project. Each student shall finally produce a comprehensive report covering background information, literature survey, problem statement, project work details and conclusions. This final report shall be typewritten form as specified in the guidelines. The continuous assessment and semester evaluation may be carried out as specified in the guidelines to be issued from time to time.

ENVIRONMENTAL ENGINEERING

UNIT I : PLANNING FOR WATER SUPPLY SYSTEMS

UNIT II: WATER TREATMENT

Scope of environmental engineering – role of environmental engineer – Public water supply systems – objectives – design period – population forecasting – water demand – sources of water – sources selection – water quality – characterization – sources of wastewater –estimation of storm runoff.

Screening - types of screening - plain sedimentation – sedimentation with coagulation – settling & flotation - filtration - disinfection

UNIT III : SEWAGE TREATMENT – PRIMARY TREATMENT

Objectives – unit operations & processes – principles, functions and design of screen, grit chambers and primary sedimentation tanks.

UNIT IV : SEWAGE TREATMENT – SECONDARY TREATMENT

Secondary treatment – activated sludge process and trickling filter; other treatment methods – stabilization ponds and septic tanks – advances in sewage treatment.

UNIT V: SEWAGE DISPOSAL AND SLUDGE MANAGEMENT

Methods – dilution – self purification of surface water bodies – oxygen sag curve – land disposal – sewage farming – deep well injection – soil dispersion system. Thickening – sludge digestion – biogas recovery - drying beds – conditioning and dewatering – sludge disposal.

BCE17E04 SMART STRUCTURES AND SMART MATERIALS

UNIT I: INTRODUCTION

Introduction to Smart Materials and Structures – Instrumented structures functions and response – Sensing systems – Self diagnosis – Signal processing consideration – Actuation systems and effectors.

UNIT II: MEASURING TECHNIQUES

Strain Measuring Techniques using Electrical strain gauges, Types – Resistance – Capacitance – Inductance – Wheatstone bridges – Pressure transducers – Load cells – Temperature Compensation – Strain Rosettes.

UNIT III: SENSORS

Sensing Technology – Types of Sensors – Physical Measurement using Piezo Electric Strain measurement – Inductively Read Transducers – The LVOT – Fiber optic Techniques. Chemical and Bio-Chemical sensing in structural Assessment – Absorptive chemical sensors – Spectroscopes – Fibre Optic Chemical Sensing Systems and Distributed measurement.

UNIT IV: ACTUATORS

Actuator Techniques – Actuator and actuator materials – Piezoelectric and Electrostrictive Material – Magnetostructure Material – Shape Memory Alloys – Electro rheological Fluids– Electro magnetic actuation – Role of actuators and Actuator Materials.

UNIT V: SIGNAL PROCESSING AND CONTROL SYSTEMS

Data Acquisition and Processing – Signal Processing and Control for Smart Structures – Sensors as Geometrical Processors – Signal Processing – Control System – Linear and Non-Linear.

Total No of Hours : 45

ESTIMATION AND QUANTITY SURVEYING

Types of estimates- units of measurements-methods of estimates - advantages- estimation of load bearing and framed structures -estimate of quantities in residential building- calculation of quantities of brick work, RCC, PCC, white washing ,color washing and painting / varnishing – calculation of brick work and RCC works in arches – estimate of joineries for paneled and glazed doors ,windows, ventilators, handrails etc.

UNIT II: ESTIMATE OF OTHER STRUCTURES

Estimating of septic tank, soak pit – Sanitary and water supply installations – Water supply pipe line – Sewer line – Tube well - Open well - Estimate of bituminous and cement concrete roads-estimation of retaining walls and culverts.

UNIT III: SPECIFICATIONS AND TENDERS

Data -schedule of rates- analysis of rates-specifications-sources-detailed and general specifications - tenders- etender contracts- contracts types- preparation of tender notice and documents-arbitration and legal requirements

UNIT IV: VALUATION

BCE17E05

UNIT I: ESTIMATION

Necessity – basics of value engineering –capitalized value – depreciation and its methods – escalation _ value of building - calculation of standard rent - mortgage- lease.

UNIT V: REPORT PREPARATION AND CASH FLOW

Principle of report preparation - report on estimate of residential building- commercial building -culvert - roads water supply and sanitary installations - tube wells - open wells.

HOUSING - PLANNING AND DESIGN

UNIT I: INTRODUCTION TO HOUSING

Definition of Basic Terms - House, Home, Household, Apartments - Objectives of National Housing Policies, Principle of Sustainable Housing, Housing Laws at State level, Local bodies' Bye-laws at Urban and Rural Level and Development Control Regulations, Institutions for Housing at National, State and Local levels.

UNITII: HOUSING PROGRAMMES

Basic Concepts - Contents and Standards for Housing Programmes - Sites and Services, Neighbourhood, Open Development Plots, Apartments, Rental Housing, Co-operative Housing, Slum Housing Programme, Role of Public, Private and Non-Government Organisations.

UNIT III: PLANNING AND DESIGN OF HOUSING PROJECTS

Formulation of Housing Projects - Site Analysis, Layout Design, Design of Housing Units (Design Problems).

UNIT IV: CONSTRUCTION TECHNIQUES AND COST-EFFECTIVE MATERIALS 9Hrs

New Constructions Techniques - Cost Effective Modern Construction Materials, Building Centers - Concept, Functions and Performance Evaluation.

UNIT V: HOUSING FINANCE AND PROJECT APPRAISAL

Appraisal of Housing Projects - Housing Finance, Cost Recovery - Cash Flow Analysis, Subsidy and Cross Subsidy, Pricing of Housing Units, Rents, Recovery Pattern (Problems).

BCE17E07 BUILDING TECHNOLOGY AND HABITAT ENGINEERING

UNIT I BUILDING STONES

Requirement of good building stone- characteristics - testing.Lime: Properties- Classifications -Manufacture -Testing of lime. Pozzolona: Natural and Artificial pozzolonas. Timber - Defects - Seasoning - Decay - Preservation, Tiles-Flooring and roofing tiles-specification-tests. Paints varnishes and distempers, Common constituents, types and desirable properties.

UNIT II MISCELLANEOUS MATERIALS

Insulating Materials - Thermal and sound insulating material desirable properties and type. Geosynthetics and its applications .Lintels -Arches - Stairs- different types and its components. Doors, Windows and Ventilations -Classification - Technical terms-Classification and Types

UNIT III ROOF

REFERENCES:

Types of roofs - wooden trusses .Finishing works - Plastering, pointing, painting, white washing, colour washing, distempering; Damp proofing ant termite treatment.

UNIT IV CLIMATE AND COMFORT

Global climatic factors - Elements of climates - Classification of tropical climates- site climate .The desirable conditions- Thermal comfort factors-Thermal comfort indices - Effective temperature

UNIT V THERMAL CONTROL

Means of thermal control - Mechanical control- structural control- ventilation and air movement

BCE17E08 COST EFFECTIVE BUILDINGS

UNIT I: INTRODUCTION TO COST EFFECTIVE CONSTRUCTION

Introduction to the concept of cost effective construction -Uses of different types of materials and their availability -Stone and Laterite blocks- Burned Bricks- Concrete Blocks- Stabilized Mud Blocks- Lime-Poszolana Cement-Gypsum Board- Light Weight Beams- Fiber Reinforced Cement Components- Fiber Reinforced Polymer Composite-Bamboo- Availability of different materials-Recycling of building materials – Brick- Concrete- Steel- Plastics -Environmental issues related to quarrying of building materials.

UNIT II: TECHNOLOGIES & METHODS IN CONSTRUCTION 12 Hours

Environment friendly and cost effective Building Technologies - Different substitute for wall construction Flemish Bond - Rat Trap Bond – Arches – Panels - Cavity Wall - Ferro Cement and Ferro Concrete constructions – different pre cast members using these materials - Wall and Roof Panels – Beams – columns - Door and Window frames -Water tanks - Septic Tanks - Alternate roofing systems - Filler Slab - Composite Beam and Panel Roof -Preengineered and ready to use building elements - wood products - steel and plastic - Contributions of agencies

UNIT III: GLOBAL WARMING & THE RELEVANCE OF GREEN BUILDINGS 07 Hours

Global Warming – Definition - Causes and Effects - Contribution of Buildings towards Global Warming - Carbon Footprint – Global Efforts to reduce carbon Emissions - Green Buildings – Definition - Features- Necessity – Environmental benefit - Economical benefits- Health and Social benefits - Major Energy efficient areas for buildings – Embodied Energy in Materials- Green Materials - Comparison of Initial cost of Green V/s Conventional Building -Life cycle cost of Buildings.

UNIT IV: GREEN BUILDING

Green Buildings – Definition - Features- Necessity – Environmental benefit - Economical benefits - Health and Social benefits - Major Energy efficient areas for buildings - Embodied Energy in Materials-Green Materials -Comparison of Initial cost of Green V/s Conventional Building - Life cycle cost of Buildings.

UNIT V: GREEN DESIGN

Green Design – Definition - Principles of sustainable development in Building Design - Characteristics of Sustainable Buildings – Sustainably managed Materials - Integrated Lifecycle design of Materials and Structures (Concepts only)

INDUSTRIAL WASTE MANAGEMENT

UNIT I: INTRODUCTION

BCE17E09

Types of industries and industrial pollution – Characteristics of industrial wastes – Population equivalent – Bioassay studies – effects of industrial effluents on streams, sewer, land, sewage treatment plants and human health – Hazardous Wastes – Environmental legislations related to prevention and control of industrial effluents and hazardous wastes – Pollution Control Boards.

UNIT II: CLEANER PRODUCTION

Waste management Approach – Waste Audit – Volume and strength reduction – material and process modifications – Recycle, reuse and byproduct recovery – Applications.

UNIT III: TREATMENT OF INDUSTRIAL WASTEWATER

Equalisation – Neutralisation – removal of suspended and dissolved organic solids - Chemical oxidation – Removal of dissolved inorganics – Combined treatment of industrial and municipal wastes – Residue management.

UNIT IV: 4. TREATMENT AND DISPOSAL OF HAZARDOUS WASTES

Physio chemical treatment - solidification - incineration - Secured landfills - Legal Provisions.

UNIT V: CASE STUDIES

Sources, Characteristics, waste treatment flow sheets for selected industries such as Textiles, Tanneries, Dairy, Sugar, Paper, distilleries, Steel plants, Refineries, fertilizer, thermal power plants.

Total No. of Hours: 45

BCE17E10

UNIT I : INTRODUCTION

Sustainable Development - Indicators of Sustainability - Sustainability Strategies - Barriers to Sustainability -Cleaner Production (CP) in Achieving Sustainability - Environmental Policies and Legislations - Regulations to Encourage Pollution Prevention and Cleaner Production - Regulatory versus Market Based Approaches

CLEANER PRODUCTION

UNIT II : CLEANER PRODUCTION CONCEPT

Definition - Importance - Benefits - Promotion - Barriers - Role of Industry, Government and Institutions -Environmental Management Hierarchy - Source Reduction Techniques - Process and equipment optimisation, reuse, recovery, recycle, raw material substitution.

UNIT III: CLEANER PRODUCTION PROJECT DEVELOPMENT AND IMPLEMENTATION 9 Hrs

Overview of CP Assessment Steps and Skills, Preparing for the Site Visit, Information Gathering, and Process Flow Diagram, Material Balance, Establishing a Program - Organizing a Program - Preparing a Program Plan - Measuring Progress - Pollution Prevention and Cleaner Production Awareness Plan - Waste audit - Environmental Statement.

UNIT IV: LIFE CYCLE ASSESSMENT

Elements of LCA - Life Cycle Costing - Eco Labelling - Design for the Environment - International Environmental Standards - ISO 14001 - Environmental audit.

UNIT V: CASE STUDIES

Industrial applications of CP, LCA, EMS and Environmental Audits.

Total No of Hours : 45

BCE17E11 ARCHITECTURE AND TOWN PLANNING

UNIT I: ARCHITECTURAL DEVELOPMENT:

Natural and built environment, historic examples, factors influence architectural development.

UNIT II: PRINCIPLES OF ARCHITECTURAL DESIGN:

Design methods, primary elements, form, space, organization, circulation, proportion and scale, ordering principles;

UNIT III: FUNCTIONAL PLANNING OF BUILDINGS:

Planning, designing and construction, general building requirements, permit and inspection (as per the National building Code);

UNIT IV: EVOLUTION OF TOWNS:

History and trends in town planning: origin and growth, historical development of town planning in ancient valley civilizations; Objects and necessary of town planning; Surveys and analysis of a town; New Concepts in town planning: Garden city movement, Linear city and Satellite city concepts, Neighborhood Planning;

UNIT V: PLANNING PRINCIPLES, PRACTICE AND TECHNIQUES: 9Hr

Elements of City plan, Estimating future needs, Planning standards, Zoning - its definition, procedure and districts, height and bulk zoning, F. A. R., Master Plan; Concepts of Urban planning, Design and Landscaping.

Total No of Hours: 45

BCE17E12

UNIT I: INTRODUCTION

Types of Dam, merits and demerits, dam site selection, selection of dam, Forces acting on gravity Dam, Methods of analysis of gravity Dam, Modes of failure and stability requirements, Design criteria and factor of safety.

UNIT II: GRAVITY DAM

Elementary profile of a gravity dam, Low and high gravity dams, Zoning of dams, Galleries in dams, Temperature control in mass concrete; gravity dams subjected to earthquakes.

UNIT III: BUTTRESS AND ARCH DAMS

Buttress and Arch dams, Types, selection, merits and demerits, Elementary design Principles of Arch and Buttress dams.

UNIT IV: EARTH DAM

Earth Dam their component and functions, causes of failure. Factors influencing the design of an earthdam. Design criteria for Earth Dam.

UNIT V: **SPILLWAY**

Elementary idea of design for spillway and energy dissipaters.

BCE17E13 STRUCTURAL DYNAMICS AND EARTH QUAKE ENGINEERING

UNIT I : SINGLE DEGREE OF FREEDOM SYSTEMS

Formulation of equation of motion-free and forced vibrations-response to dynamic Loading-effect of damping

UNIT II : MODAL ANALYSIS

Free and forced vibration of un-damped and damped MDOF systems- equation of Motions- evaluation of natural frequencies and modes

UNIT III : INTRODUCTION TO EARTH QUAKE ENGINEERING

Elements of engineering seismology- characteristics of earth quake engineering- earth quake history- Indian seismicity.

UNIT IV : BEHAVIOUR OF STRUCTURES AND SOIL

Performance of structures under past earth quakes- lessons learnt from past earth Quakes- behavior of soil under earth quake loading- soil liquefaction- soil structure Interaction effects.

UNIT V : EARTH QUAKE RESISTANT DESIGN

Concept of Earth quake resistant design- provisions of seismic code IS-1893 (part I)- 2002- response spectrum-design spectrum- seismic coefficient- design of buildings.

BRIDGE STRUCTURES

Design of through type steel highway bridges for IRC loading - Design of stringers, cross girders and main girders -Design of deck type steel highway bridges for IRC loading - Design of main girders.

UNIT II: STEEL BRIDGES

UNIT I: INTRODUCTION

BCE17E14

Design of pratt type truss girder highway bridges - Design of top chord, bottom chord, web members - Effect of repeated loading - Design of plate girder railway bridges for railway loading - Wind effects - Design of web and flange plates - Vertical and horizontal stiffeners.

UNIT III: REINFORCED CONCRETE SLAB BRIDGES

Design of solid slab bridges for IRC loading - Design of kerb - Design of tee beam bridges - Design of panel and cantilever for IRC loading.

UNIT IV: REINFORCED CONCRETE GIRDER BRIDGES

Design of tee beam - Courbon's theory - Pigeaud's curves - Design of balanced cantilever bridges - Deck slab - Main girder - Design of cantilever - Design of articulation.

UNIT V: PRESTRESSED CONCRETE BRIDGES

Design of prestressed concrete bridges - Preliminary dimensions - Flexural and torsional parameters -Courbon's theory - Distribution coefficient by exact analysis - Design of girder section - Maximum and minimum prestressing forces - Eccentricity - Live load and dead load shear forces - cable zone in girder -Check for stresses at various sections - Check for diagonal tension - Diaphragms - End block - Short term and long term deflections.

BCE17E15

Design of rectangular riveted steel water tank - Tee covers - Plates - Stays - Longitudinal and transverse beams -Design of staging – Base plates – Foundation and anchor bolts – Design of pressed steel water tank – Design of stays - Joints - Design of hemispherical bottom water tank - side plates - Bottom plates - joints - Ring girder - Design of staging and foundation.

STORAGE STRUCTURES

UNITH: CONCRETE WATER TANKS

UNIT I: STEEL WATER TANKS

Design of Circular tanks - Hinged and fixed at the base - IS method of calculating shear forces and moments - Hoop tension - Design of intze tank - Dome - Ring girders - Conical dome - Staging - Bracings - Raft foundation -Design of rectangular tanks - Approximate methods and IS methods - Design of under ground tanks - Design of base slab and side wall - Check for uplift.

UNIT III: STEEL BUNKERS AND SILOS

Design of square bunker – Jansen's and Airy's theories – IS Codal provisions – Design of side plates – Stiffeners – Hooper – Longitudinal beams – Design of cylindrical silo – Side plates – Ring girder – stiffeners.

UNIT IV: CONCRETE BUNKERS AND SILOS

Design of square bunker - Side Walls - Hopper bottom - Top and bottom edge beams - Design of cylindrical silo -Wall portion – Design of conical hopper – Ring beam at junction.

UNIT V: PRESTRESSED CONCRETE WATER TANKS

Principles of circular prestressing - Design of prestressed concrete circular water tanks.

TALL BUILDINGS

UNIT I: INTRODUCTION

BCE17E16

The Tall Building in the Urban Context - The Tall Building and its Support Structure - Development of High Rise Building Structures - General Planning Considerations. Dead Loads - Live Loads-Construction Loads -Snow, Rain, and Ice Loads - Wind Loads-Seismic Loading - Water and Earth Pressure Loads - Loads - Loads Due to Restrained Volume Changes of Material - Impact and Dynamic Loads - Blast Loads - Combination of Loads.

UNIT II: THE VERTICAL STRUCTURE PLANE

Dispersion of Vertical Forces- Dispersion of Lateral Forces - Optimum Ground Level Space - Shear Wall Arrangement - Behaviour of Shear Walls under Lateral Loading. The Floor Structure or Horizontal Building Plane Floor Framing Systems-Horizontal Bracing- Composite Floor Systems The High - Rise Building as related to assemblage Kits Skeleton Frame Systems - Load Bearing Wall Panel Systems - Panel - Frame Systems - Multistory Box Systems.

UNIT III: Common high-rise building structures and their Behaviour under load 9Hrs

The Bearing Wall Structure- The Shear Core Structure - Rigid Frame Systems- The Wall - Beam Structure: Interspatial and Staggered Truss Systems - Frame - Shear Wall Building Systems - Flat Slab Building Structures -Shear Truss - Frame Interaction System with Rigid - Belt Trusses - Tubular Systems-Composite Buildings -Comparison of High - Rise Structural Systems Other Design Approaches Controlling Building Drift Efficient Building Forms - The Counteracting Force or Dynamic Response.

UNIT IV: APPROXIMATE STRUCTURAL ANALYSIS AND DESIGN OF BUILDING 9Hrs

Approximate Analysis of Bearing Wall Buildings The Cross Wall Structure - The Long Wall Structure The Rigid Frame Structure Approximate Analysis for Vertical Loading - Approximate Analysis for Lateral Loading -Approximate Design of Rigid Frame Buildings-Lateral Deformation of Rigid Frame Buildings The Rigid Frame -Shear Wall Structure - The Vierendeel Structure - The Hollow Tube Structure.

UNIT V: OTHER HIGH-RISE BUILDING STRUCTURE

Deep - Beam Systems -High-Rise Suspension Systems - Pneumatic High -Rise Buildings - Space Frame Applied to High - Rise Buildings - Capsule Architecture.

BCE17E17

UNIT I: INTRODUCTION

Definition & Scope- Practical applications-Hydrological cycle – Transitory systems- formation, Types and forms of precipitation – Winds and their movement–Climate & weather season in India-Catchment area

HYDROLOGY

UNITII: PRECIPITATION

Measurement of Precipitation-Recording & Non- Recording Rain Gauges-Intensity duration Analysis-Intensity frequency duration Analysis- Average depth of precipitation over an areas-Depth area duration analysis-Rain gauge network.

Introduction- Evaporation process- Factors affecting Evaporation- Evaporation Eestimation-Evaporation measurement- Evapotranspiration- Factors affecting infiltration-measurement of infiltration- Infiltration Equations

UNITIV: STREAM FLOW MEASUREMENT & HYDROGRAPH ANALYSIS 9Hrs

Introduction-Measurement of stage-discharge measument –area velocity method (Current meter method)-moving boat method- Stage discharge relationships – Flow measurements – Features of hydrograph- base flow-Hydrograph seperation

UNIT V: GROUND WATER HYDROLOGY

UNITHI EVAPORATION & INFILTRATION

Occurrence of ground water – Types of aquifer – Dupuit's assumptions – Darcy's law – Estimation of aquifer parameters – Pump tests.

MUNICIPAL SOLID WASTE MANAGEMENT

UNIT I: SOURCES AND TYPES

BCE17E18

Sources and types of solid wastes in a Municipality; Quantity - factors affecting generation of solid wastes; characteristics - methods of sampling and characterization; Effects of improper disposal of solid wastes - public health effects. Principle of solid waste management - social & economic aspects; Public awareness; Role of NGOs; Legislation.

UNIT II: ON-SITE STORAGE & PROCESSING

On-site storage methods – materials used for containers – on-site segregation of solid wastes – public health & economic aspects of storage - options under Indian conditions - Critical Evaluation of Options.

UNIT III: COLLECTION AND TRANSFER

Methods of Collection – types of vehicles – Manpower – collection routes; transfer stations – selection of location, operation & maintenance; options under Indian conditions.

UNIT IV: OFF-SITE PROCESSING

Processing techniques and Equipment; Resource recovery from solid wastes - composting, incineration, options under Indian conditions.

UNIT V: DISPOSAL

Dumping of solid waste; sanitary landfills – site selection, design and operation of sanitary landfills.

BCE17E19 PRESTRESSED CONCRETE STRUCTURES

UNIT I : INTRODUCTION - THEORY AND BEHAVIOUR

Basic concepts - Advantages - Materials required - Systems and methods of pre -stressing - Analysis of sections - Stress concept - Strength concept - Load balancing concept - Effect of loading on the tensile stresses in tendons.

UNIT II: DEFLECTION

Deflections - Factors influencing deflections - Calculation of deflections - Short term and long term deflections -Losses of pre-stress - Losses of prestress - types - losses due to elastic deformation of concrete - shrinkage of concrete - creep of concrete - friction - anchorage slip - Estimation of crack width

UNIT III: DESIGN

Flexural strength - Simplified procedures as per codes - strain compatibility method - Basic concepts in selection of cross section for bending - stress distribution in end block, Design of anchorage zone reinforcement - Limit state design criteria.

UNIT IV : CIRCULAR PRESTRESSING 9Hrs General features & Design of prestressed concrete tanks - Prestressed concrete Poles, Shapes, Features &

Design- Prestressed concrete sleepers - Development - Types- Design, Static & dynamic loads

UNIT V: COMPOSITE CONSTRUCTION

Analysis for stresses – Estimate for deflections – Flexural and shear strength of composite members– General aspects - pretension pre-stressed bridge decks - Post tensioned pre-stressed bridge decks -Advantages over R.C.C bridges- Design Principles of post tensioned prestressed concrete slab bridge deck, T Beam slab bridge deck & Continuous two span beam deck

UNIT I: INTRODUCTION

BCE17E20

Need for prefabrication - Principles - Materials - Modular coordination - Standardization - Systems - Production -Transportation - Erection.

UNIT II: PREFABRICATED COMPONENTS

Behaviour of structural components - Large panel constructions - Construction of roof and floor slabs - Wall panels Columns – Shear walls.

UNIT III: DESIGN PRINCIPLES

Disuniting of structures- Design of cross section based on efficiency of material used - Problems in design because of joint flexibility - Allowance for joint deformation.

UNIT IV: JOINT IN STRUCTURAL MEMBERS

Joints for different structural connections – Dimensions and detailing – Design of expansion joints.

UNIT V: DESIGN FOR ABNORMAL LOADS

Progressive collapse - Code provisions - Equivalent design loads for considering abnormal effects such as earthquakes, cyclones, etc., - Importance of avoidance of progressive collapse.

BCE17SE1 REPAIR AND REHABILITATION OF STRUCTURES

UNIT I MAINTENANCE AND REPAIR STRATEGIES

Maintenance- Repair and Rehabilitation. Facts of Maintenance - Importance of Maintenance- Various aspects of Inspection- Assessment procedure for evaluating a damaged structure, Causes of deterioration.

UNIT II STRENGTH AND DURABILITY OF CONCRETE

Quality assurance for concrete – Strength, Durability and Thermal properties, of concrete - Cracks, different types, causes – Effects due to climate, temperature, Sustained elevated temperature, Corrosion - Effects of cover thickness.

UNIT III SPECIAL CONCRETES

Polymer concrete, Sulphur infiltrated concrete, Fibre reinforced concrete, High strength and High-performance concrete, Vacuum concrete, Self-compacting concrete, Whisper concrete Geopolymer concrete, Reactive powder concrete, Concrete made with industrial wastes.

UNIT IV TECHNIQUES FOR REPAIR AND PROTECTION METHODS

Non-destructive Testing Techniques, Epoxy injection, Shoring, Underpinning, Corrosion protection techniques – Corrosion inhibitors, Corrosion resistant steels, Coatings to reinforcement, Cathodic protection.

UNIT V RETROFITTING AND DEMOLITION TECHNIQUES

Strengthening of Structural elements, Repair of structures distressed due to corrosion, fire, Leakage, earthquake – Engineered demolition methods - Case studies.

INTELLIGENT BUILDINGS

UNIT I : Intelligent building characteristics:

Features and benefits of intelligent buildings. The anatomy of intelligent buildings. Environmental aspect. The marketplace and other driving forces behind the emergence of intelligent buildings.

UNIT II: Building automation systems & controls:

Philosophy, system configuration, system modules, distributed systems, communication protocol and on-line measurements. Fire protection, security and energy management. Control objectives. Sensors, controllers and actuators. Control system schematics system design. Microprocessor based controllers & digital controls. Examples of sub-systems such as: Digital Addressable Lighting Interface (DALI)

UNIT III : Modern intelligent vertical transportation systems:

Sky lobby, double-deck lifts, twin lifts, advanced call registration systems, large scale monitoring systems, applications of artificial intelligence in supervisory control, energy saving measures related to lift systems/escalator systems, other modern vertical transportation systems, such as: gondola systems, materials handling systems, etc.

UNIT IV : Communication and security systems:

Voice communication systems, local area network, wireless LAN, Digital TV, CCTV, digital CCTV, teleconferencing, cellular phone system, and CABD. SMATV. Data networking. Short- and long-haul networks. Wideband network. Office automations. Public address/sound reinforcement systems. Digital public address system. Modern security systems

UNIT V : Integrating the technologies and systems:

The impact of information technology on buildings and people. Shared tenant services. Interaction and integration between building structure, systems, services, management, control and information technology. Application & design software packages.

Total No of Hours: 45

BCE17SE3 FINITE ELEMENT ANALYSIS

UNIT I: INTRODUCTION – VARIATIONAL FORMULATION

General filed problems in Engineering – Modelling – Discrete and Continuous models – Characteristics – Difficulties involved in solution – The relevance and place of the finite element method – Historical comments – Basic concept of FEM, Boundary and initial value problems – Gradient and divergence theorems – Functionals – Variational calculus – Variational formulation of VBPS. The method of weighted residuals – The Ritz method.

UNIT II: FINITE ELEMENT ANALYSIS OF ONE DIMENSIONAL PROBLEMS 8Hrs

One dimensional second order equations – discretisation of domain into elements – Generalised coordinates approach – derivation of elements equations – assembly of elements equations – imposition of boundary conditions – solution of equations – Cholesky method – Post processing – Extension of the method to fourth order equations and their solutions – time dependant problems and their solutions – example from heat transfer, fluid flow and solid mechanics.

UNIT III: FINITE ELEMENT ANALYSIS OF TWO DIMENSIONAL PROBLEMS 9Hrs

Second order equation involving a scalar-valued function – model equation – Variational formulation – Finite element formulation through generalised coordinates approach – Triangular elements and quadrilateral elements – convergence criteria for chosen models – Interpolation functions – Elements matrices and vectors – Assembly of element matrices –boundary conditions – solution techniques.

UNIT IV: ISOARAMETRIC ELEMENTS AND FORMULATION

Natural coordinates inn 1, 2 and 3 dimensions – use of area coordinates for triangular elements in - 2 dimensional problems – Isoparametric elements in 1,2 and 3 dimensional – Largrangean and serendipity elements – Formulations of elements equations in one and two dimensions - Numerical integration.

UNIT V: APPLICATIONS TO FIELD PROBLEMS IN TWO DIMENSION 1

Equations of elasticity – plane elasticity problems – axis symmetric problems in elasticity Bending of elastic plates – Time dependent problems in elasticity – Heat – transfer in two dimensions – incompressible fluid flow.

Total No. of Hours : 45

ENVIRONMENTAL IMPACT ASSESSMENT BCE17SE4

UNIT I: INTRODUCTION

Impact of development on environment and Environmental Impact Assessment (EIA) and Environmental Impact Statement (EIS) - Objectives - Historical development - EIA capability and limitations - Legal provisions on EIA.

UNIT II: METHODOLOGIES

Methods of EIA - Strengths, weaknesses and applicability - Appropriate methodology - Case studies.

UNIT III: PREDICTION AND ASSESSMENT

Socio Economic Impact - Assessment of Impact on land, water and air, energy impact; Impact on flora and fauna; Mathematical models; public participation – Reports – Exchange of Information – Post Audit – Rapid EIA.

UNIT IV: MATHEMATICAL MODELS FOR ASSESSMENT

Use the mathematical models in EIA – Water quality, air quality and noise; assumptions and limitations.

UNIT V: ENVIRONMENTAL MANAGEMENT PLAN

Plan for mitigation of adverse impact on environment – options for mitigation of impact on water, air and land, flora and fauna, addressing the issues related to the project affected people.

PROFESSIONAL ETHICS

UNIT I: ENGINEERING ETHICS

Senses of engineering ethics – variety of moral issues – types of inquiry – moral dilemmas. Moral autonomy – kohlberg's theory – gilligan's theory – consensus and controversy – professions and professionalism – professional ideals and virtues - theories about right action - self-interest - customs and religion - use of ethical theories

UNIT II: ENGINEERING AS SOCIAL EXPERIMENTATION

Engineering as experimentation – engineers as responsible experimenters – codes of ethics – a balanced outlook on law - the challenger case study.

UNIT III : ENGINEER'S RESPONSIBILITY FOR SAFETY

Safety and risk – assessment of safety and risk – risk benefit analysis – reducing risk – the three mile island and chernobyl case studies

UNIT IV: RESPONSIBILITIES AND RIGHTS

Collegiality and loyalty - respect for authority - collective bargaining - confidentiality - conflicts of interest occupational crime - professional rights - employee rights - discrimination.

UNIT V : GLOBAL ISSUES

Multinational corporations – environmental ethics – computer ethics – weapons development – engineers as managers - consulting engineers - engineers as expert witnesses and advisors - moral leadership - sample code of conduct.

BCE170E2 ENVIRONMENT, HEALTH AND SAFETY IN INDUSTRIES

UNIT I : INTRODUCTION

Need for developing Environment, Health and Safety systems in work places, Status and relationship of Acts, Regulations and Codes of Practice, Role of trade union safety representatives .International initiatives, Ergonomics and work place.

UNIT II: OCCUPATIONAL HEALTH AND HYGIENE

Definition of the term occupational health and hygiene, Categories of health hazards, Exposure pathways and human responses to hazardous and toxic substances, Advantages and limitations of environmental monitoring and occupational exposure limits, Hierarchy of control measures for occupational health risks, Role of personal protective equipment and the selection criteria.

UNIT III: WORKPLACE SAFETY AND SAFETY SYSTEMS

Features of the satisfactory design of work premises HVAC, ventilation. Safe installation and use of electrical supplies, Fire safety and first aid provision, Significance of human factors in the establishment and effectiveness of safe systems, Safe systems of work for manual handling operations, Control methods to eliminate or reduce the risks arising from the use of work equipment, Requirements for the safe use of display screen equipment, Procedures and precautionary measures necessary when handling hazardous substances, Contingency arrangements for events of serious and imminent danger.

UNIT IV: TECHNIQUES OF ENVIRONMENTAL SAFETY

Functions and techniques of risk assessment, inspections and audits, Investigation of accidents- Principles of quality management systems in health and safety management.

UNIT V: EDUCATION AND TRAINING

Factors to be considered in the development of effective training programmes, Principles and methods of effective training, Feedback and evaluation mechanism.

BCE170E3 CLIMATE CHANGE AND SUSTAINABLE DEVELOPMENT

UNIT I : EARTH'S CLIMATE SYSTEM

Introduction-Climate in the spotlight — Climate Classification - Global Wind Systems -Cloud Formation and Monsoon Rains – Storms and Hurricanes – The Hydrological Cycle – Global Ocean Circulation – Solar Radiation – The Earth's Natural Green House Effect – Green House Gases and Global Warming – Carbon Cycle.

UNIT II : OBSERVED CHANGES AND ITS CAUSES

Observation of Climate Change – Changes in patterns of temperature, precipitation and sea level rise – Observed effects of Climate Changes – Patterns of Large Scale Variability – Drivers of Climate Change – Climate Sensitivity and Feedbacks – The Montreal Protocol – UNFCCC – IPCC.

UNIT III : IMPACTS OF CLIMATE CHANGE

Impacts of Climate Change on various sectors -Methods and Scenarios – Projected Impacts for Different Regions– Uncertainties in the Projected Impacts of Climate Change – Risk of Irreversible Changes.

UNIT IV: CLIMATE CHANGE ADAPTATION AND MITIGATION MEASURES 9 Hrs

Adaptation Strategy/Options in various sectors -Key Mitigation Technologies and Practices –Carbon sequestration – Carbon capture and storage (CCS)- Waste (MSW & Bio waste, Biomedical, Industrial waste – International and Regional cooperation.

UNIT V : CLEAN TECHNOLOGY AND ENERGY

Clean Development Mechanism –Carbon Trading examples of future Clean Technology – Biodiesel – Natural Compost – Eco- Friendly Plastic – Alternate Energy – Hydrogen – Bio-fuels – Solar Energy – Wind – Hydroelectric Power.

Total No. of Hours: 45

Department of Civil Engineering INTELLIGENT TRANSPORTATION SYSTEMS

UNIT I INTRODUCTION TO INTELLIGENT TRANSPORT SYSTEM

Definition - Role and Responsibilities - Advanced Traveller Information System - Fleet Oriented ITS Services -Electronic Toll Collection - Critical issues - Security - Safety 21

UNIT II ITS ARCHITECTURE AND HARDWARE

Architecture - ITS Architecture Framework - Hardware Sensors - Vehicle Detection - Techniques - Dynamic Message Sign - GPRS - GPS - Toll Collection

UNIT III INTERSECTION MANAGEMENT

Video Detection - Virtual Loop - Cameras - ANPR - IR Lighting - Integrated Traffic Management - Control Centre - Junction Management Strategies

UNIT IV ADVANCED TRANSPORT MANAGEMENT SYSTEM

ATMS - Route Guidance - Issues - Travel Information - Pre Trip and Enroute Methods - Historical - Current -Predictive Guidance - Data Collection - Analysis - Dynamic Traffic Assignment (DTA) - Components - Algorithm

UNIT V ADVANCED TRAVELLER AND INFORMATION SYSTEM

Basic ATIS Concepts - Smart Route System - Data Collection - Process - Dessemination to Travelers - Evaluation of Information - Value of Information - Business Opportunities

Total No. of Hours: 45
