We have been allowing students from MGR University as interns for the last 5 years and we could see some of the student's interest to gain knowledge about the industries and work culture during the Academic days itself. Even though few students show lack of interest in get to know things, but most of the students are really shrewd enough to observe latest technology and adopt to industries work culture easily.

We also suggest university to insist students to prepare a detailed report about the internship and their observations to be submitted to university as well as to industry in which they undergo training and also to get feedback from Companies in which they undergo training for their internal marks, so that all students take the internship seriously.

It was a good experience to have a campus drive with Dr. MGR college - Chennai, especially in this new norm, we all know how difficult it is to conduct an entire session of campus interview without any hassle that too virtual. Students were very active and focused throughout the interview process, and they performed really well. Placement Department who made it such a ease to get it done and have closures, looking forward to work with your premises again, Until then stay safe.

Well supported in pandemic time, it's show commitment towards work.
